> You will see another posting that more accurately reflects my views.

I didn't think the first one was all that bad. I didn't agree with it, but it wasn't expressed in a manner that really offended me. And, no matter what, I believe strongly that negative views (expressed as opinions or questions) about the League should not be swept away. Heck, I even agree with some of them, and have learned a lot from my discussions with people abou them.

> I agree that most gear from ICOM, YAESU, KENWOOD is NOT junk. But I have
> had lemons. But lemons are just that - lemons. The majority of the same
> equipment made by the manufacturer actually works as designed.

I would be curious to know what radios you thought were lemons and whether you think the Product Review reasonably reflected the performance of the rig. Unfortunately, the Product Reviews reflect only the "new" performance of the equipment, not the long-term reliability of same. Even a survey of owners would be somewhat nebulous, if anyone has some good ideas about how QST could address things like long-term reliability, please send them to me and I will put them all together and talk to AA1GW about them (or send them directly to aa1gw@arrl.org). Ditto on any comments about the specific content of reviews; I think the reviews are pretty good, but anything can be made better, and member input does have an impact.

> The ARRL Labs does a great job testing various pieces of hardware. I don't
> ever question whether ARRL labs actually obtained the performance numbers
> that are published in QST. But I wonder whether a typical HAM who buys the
> same piece of equipment off the shelf will obtain the same performance
> numbers.

QST buys these things right off the shelf, too, usually from one or more of the distributors. From the number of problems "right out of the box," it sure doesn't look to me like we are getting "gold plated" units. :-) If we feel it necessary, we order them through a local ham, or less-known HQ staffer.

> It is my understanding that various manufacturers send to ARRL rig's and
> other pieces of equipment to be tested and reviewed by the ARRL. Sometimes

> little sceptical of the performance figures (e.g. intercept points etc)
> obtained by the ARRL labs. They may not reflect the performance of the same
> piece of equipment bought off the shelf.

They should, with the caveat that it is a sample of 1. The vast majority of the time, the numbers in that test table reflect the first-measured performance of the Product Review rig. Occasionally, we determine that a rig is defective, and we then report the numbers measured after the rig has been serviced (or occasionally from another rig), but this is always discussed in the text, usually with the measured results we got the first time. If we do find problems, we often borrow a radio from Lentini, a local ham retailer, to determine whether we have an anomaly, or have discovered a problem in the model. All in all, we do our best to determine that the numbers in the table will represent typical performance of the radio. We occasionally have to made judgement calls, and do discuss and explain our justification in the text.

> I suggest that you use the same technique that CONSUMER REPORTS uses -- ARRL
> should go out to one of the retailers and buy the rig (or other piece of
> equipment) off the shelf! (Perhaps ARRL now does this. I apologise if I am
> misinformed)

Yes, we do indeed do this, for the very reasons you suggest.

> Yes, I did read the 1996 article comparing various QRP rigs. The article
> was excellent! But that article is fairly old now. After doing some
> research, there are a lot more small companies that make interesting QRP
> rigs (either in kit form or ready built). I would encourage ARRL to update
> this article and perhaps include some more manufacturers (who make kits or
> ready built gear).

Already in the works, but perhaps with a new twist. We did a post a couple of months ago on QRP-L, a QRP mailing list, asking for those who have built them to send them in for Lab testing. I expect that we will see a new article mid to late spring, but just a guess.

> I especially liked that 1996 QRP article since it COMPARED the various rigs
> in the SAME article. I would strongly encourage ARRL to write more articles
> (eg similar articles comparing HF (100 and 200 watts) rigs currently being
> sold even if the ARRL did a separate review on one of the rigs and the
> design of the rig is fairly old now. If the rig is still being sold its
> fair game).

We try to do "full-size" reviews on major pieces of equipment (translate: expensive), to give readers as much info as we can. HTs, mobile rigs and the like are often grouped together into comparative reviews, with, of course, less space devoted to each rig. This is, of course, balanced against page-space and rig availability considerations; if there are few new rigs, we may do separate reviews on different

mobile rigs, for example.

> Yes, I can point out some items of GENERAL interest that are not very often

> Better yet, ARRL should consider publishing articles comparing the various
> SSTV programs available (either shareware or freeware), the various PSK31
> programs, the various LOGGING programs, the various contesting programs etc.
> ARRL would provide a great service in publishing such articles. Many Hams
> do not have the time to try out all the various SSTV, PSK31, LOGGING and
> contesting programs.

I will pass along your ideas to Joe. I agree, though; QST has not done
much work reviewing software.

> Most people find out about these SSTV, PSK31, LOGGING, CONTESTING, SATELLITE
> etc programs by talking to other Hams. QST is usually not that informative.

Well, perhaps not about the software, although, IMHO, the coverage of
PSK-31 (and the Hell modes in the January 2000 QST) has been quite good.
The QST bibliographies on satellite articles takes up many many pages.

> It would appear that the ARRL lab is not that involved with software
> reviews. It is my understanding that QST typically waits for Hams to write
> such articles on software. If that is the case, perhaps I should be quiet
> and write one of these articles myself!

You are right; the Lab does not generally get very involved with
software articles; they don't usually require any testing. I know that,
by policy, Product Reviews are done by HQ staff, Directors/officers or
ARRL Technical Advisors (an appointed non-field-organization position).
Many "real" articles, though, are supplied by members, and an article
about several different related software packages might have some
appeal. First, see http://www.arrl.org/qst/ for info on writing for
QST, then contact Steve Ford, wb8imy@arrl.org, to discuss any article

ideas you may have.

Thanks for the dialogue. :-)

14.313 HRBR was a cesspool of intolerance before Riley showed up. (HRBR means Ham Radio Before Riley). We had on there all sorts of filthy bigots spouting off the kind of stuff which truly degrades our wonderful hobby/service. Schoenbohm and his lackeys were attacking the wonderful Ruth Hoffman and Intercon based upon the hideous philosophy of "Intercon was run by Jews to steal money from phone companies." He's one to talk about stealing! And of course there was the demented Mike Galego,KA4MUJ, Schoenbohm's Reichsfuehrer SS, who cursed out one Jew too many and God gave him his. It's in the Old Testament: God says, "I will bless those who blesseth you and curse those who curseth thee." And of course we had that rotund fella from Gray, Tennessee, KB4GWC, calling certain people "Kakes" which is redneck hillbilly for "kikes." How about WB4GDP? Remember wild Billy with his famous QSO about "microwave crematoria and using the ashes to make india ink..etc.." and then he met up with,so I've been told, baseball bats. But we must not leave out the famous Polly,W4FQF, who now has been, in his own mind, canonized as Saint George. I found a tape dated 8/26/97 in which the bigot and I had a QSO. The transcript goes as follows:
W4FQF:"And you're a greasy kind of person and I wouldn't put anything past you. This is W4FQF"
AF2Y: "Wait a minute. I want to know one thing. Why do you have this obsession? If any statement is made about you that you don't like, you attack me on religious principles.Why do you do something like that? Over."
W4FQF:"Because I don't like you. You figured that one out, didn't you."
AF2Y:"But what is not liking a person have to do with religious slurs? I don't throw religious slurs at you or at anybody else whom I don't particularly like, but it seems that you have a prediliction for doing somethng like this. Is this your upbringing or were you taught to be like this? I don't understand it?
W4FQF:"I don't have to answer any question you give.The fact is that I don't particularly like you. . You're a low down sneak; you're a cheap Jew and I'm telling it like it is. W4FQF"
As we see, persons of Polly's less than intelligent IQ, MUST resort to religious and ethnic slurs to get points across. Yes, I am the irreverant type who oftimes sees religion and hypocrisy as "soulmates," but I'm not the type of person to ever base my dislikes on religion, race, nationality or sexual preference. I judge people on how they act and speak while redneck bigots never heard of this kind of intelligent approach to the human equation. I'm posting this right before Christmas because if you haven't realized it, Riley has given us the present of removing intolerant garbage from ham radio and when the ugly "Liberty Net" goes, then it'll be a complete job. The other reason is that Christ represented the Prince of Peace and due to his teachings and that of Paul, a religion grew which has 33.3% of the world as adherents. If we read the tenets of Christianity, the most basic is LOVE with compassion, brotherhood, respect , forgiveness and dignity included. The faith is OPPOSED to oppression of anyone based on any characterisitc whatsoever and when intolerant lunatics

run loose on amateur radio, lunatics who profess to be Christians and might be elders and might wear vestments and might have had a father in the clergy and so on and so forth, the entire concept of Christianity shatters and so does the integrity of our ham radio hobby/service. Beginning now, let's all of us in and out of Christendom work for a MAJOR improvement in personal communications.
Merry Christmas and Happy New Year.

Hi, John,

Specifics are not necessary; I know exactly what you mean and I agree.
Over the years, the editors have sometimes just assumed that everyone
would have the same familiarity as they do about the meaning of those
test results. IMHO, for things like -20 dB PEP IMD products, sharp rise
and fall times, poor intercept point, etc., the Product Reviews should
have some text or caption discussion of those points. I had that very
discussion with the Product Review editor a couple of months ago, and we
agreed in principle that this should happen, but that we were going to
work on the details after the QST "restructuring" was complete. The
January issue just hit the streets, so Joe and I need to talk. :-)

> BTW I hate magazine layouts with colored text on colored backgrounds.
> The loss in contrast makes for significantly lower readability.

Consider that reported. I cc'ed Steve Ford. :-)

R10 Reference page "NEW" URL

Hello,

The R10 reference page first created by Joost van Stuyvenberg has moved to its new location on The ScanShack.

http://members.aol.com/scanshack/r10/index.htm
or via the selection on
http://www.ScanShack.com

Joost began the R10 reference page more than a year ago but due to other commitments he was unable to continue. Joost put out the word of his intentions and asked if anyone desired to continue his efforts. I answered his request and he was kind enough to accept my offer. I hope that I am able to do justice to this effort and continue in Joosts foot steps. He has given me his original html files to tailor as needed. The look and content will remain much the same.ï¿½ï¿½Thank you to Joost for your trust and for allowing me to continue this effort !

I'd like to wish all a very Happy Holiday !

Have a GREAT one !

Looking for one or more examples of 861 transmitting tubes.
This is for a restoration project of the USS Slater, now docked
as a museum at Albany NY. This WWII vintage ship is being made
operational (!!) by some nutcase volunteers who are also restoring
the radio room and the transmitters and antennas.

This can be a charitable donation.

If you have a similar tube that might fit into the same slot
like a TL-750 or TL 1000 (as a retrofit) that might be of
interest too...

Please contact me via email.

Thanks in advance!

Source record: 124622
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Hi Ed,

Well here are some of the details you requested!

EXAMPLE 1

In the late eighties, I was considering upgrading my HF rig which was an ICOM IC-751. After reading the glowing review of the TS-940s in QST, I decided to trade up to the TS-940s "contest class" rig. But I waited at least a year before buying the TS-940s. I wanted to give Kenwood a chance to work out any bugs it might have had on the production line.

I regretted my decision to upgrade to the TS-940s ever since. My TS-940s gave my nothing but troubles. (It was in the repair shop many times. Some of the problems like the internal speaker cutting in and out could never be fixed). In addition, I found the receiver in the TS-940s very very poor (even though the measurements made by ARRL labs showed no significant differences between the receiver in the IC-751 and the TS-940). I liked the receiver in the IC-751 much better. My old IC-751 was much more sensitive.

In addition, I had troubles with the VFO or PLL system that the TS-940s used. Sometimes the frequency display would go totally blank and only display little dots. I could not receive or transmit. Again this was intermittent.

Furthermore, I had some problems with the TS-940s on the digital modes. It would work fine on RTTY and AMTOR with the 500 Hz filter but when the new PACTOR mode came around, the TS-940s would NOT work on Pactor at all with the 500 Hz filter. The 500 Hz filter was too narrow for PACTOR which should not have been the case. Other Hams using the TS-940s on PACTOR with the 500 Hz filter had no problems. Again, the problem with my rig could not be found.

Some HAMS really liked their TS-940s. I did not. I looks like I might have had a real lemon. I got rid of it.

In stark contrast to the QST's product review of the TS-940s, my TS-940s was a very poor performer at least in my opinion.

EXAMPLE 2

In 1998, I bought a R7000 vertical from Cushcraft after reading the great review in QST published in August 1997. The reviewer claimed that the R7000 met the specifications published by CUSHCRAFT. In particular, the reviewer

claimed that the R7000 showed 250 Kc of 2.0:1 SWR bandwidth on 20 meters.

My experiences with the R7000 were different. My R7000 only showed a 70 Kc of 2.0:1 SWR bandwidth on 20 meters. A far cry from that observed by your reviewer (and claimed by CUSHCRAFT). It made no difference where I placed the R7000 (e.g. in the middle of a field, on a tower etc, the bandwidth on 20 meters was extremely narrow). To make things worse, if I tuned the R7000 for low SWR on the CW sub-band of 20 meters, the R7000 was way out of whack on 30 meters (i.e. the SWR on 30 meters was very high). The same adjustment affects not only 20 meters but also 30 meters.

I since learned that my problem with the narrow bandwidth on 20 meters was NOT unique. Many other HAMS had the same problem. Finally I heard that CUSHCRAFT apparently admitted that there was a design flaw with the original R7000. CUSHCRAFT made available a R7000 Trap Field Replacement Kit to solve the narrow bandwidth problem. The kit consisted of new tubing and two new traps. The spacing between the traps had changed.

I am very surprised that the reviewer (or ARRL labs) did not pick up this narrow bandwidth problem with the R7000 evaluated way back in 1997! I can only speculate that the ARRL received a "defective" R7000 with low Q traps which provided satisfactory SWR bandwidth. In my view, at least the product review for the R7000 should have mentioned that tuning the R7000 for low SWR on the CW sub-band of 20 meters may cause high SWR on 30 meters (due to one adjustment for both bands). Many Hams who like CW, like operating both on 20 and 30 meters CW!

My R7000 is much better with the new R7000 trap field replacement kit. But If I tune the R7000 for low SWR on 20 meter CW, my SWR on 30 meters is still very high.

Overall, the R7000 is a great performer on 10, 12, 15, 17 meters. But on 20 meters, it leaves a lot to be desired.

Perhaps, QST should mention the R7000 Trap field replacement kit in one of its issues (if it hasn't already). Perhaps, another review of the R7000 is in order.

SOME SUGGESTIONS

Please don't get the wrong impression. The ARRL labs do a great job in evaluating rigs and other pieces of hardware. Some manufacturers take notice of bad reviews and make changes to their designs. I can appreciate that since the ARRL generally only tests one piece of equipment of a particular model, it is very hard for the ARRL to determine the overall reliability of the product (either bought new or over time)

As you can see, I have had some lemons. I am sure you can appreciate my frustration when I compare one of QST's product reviews with one of my lemons!

I do have one small suggestion. In some product reviews, the reviewer states that a particular performance specification is not very good without stating what would be a good number. If at all possible, it would be great if the product review mentioned an acceptable performance specification. (Or at least state that the performance of XXXX is not typical of equipment in this price range which I do sometimes see in QST's product reviews. We need more of that!).

For example, with some of the product reviews of VHF mobile rigs that claim to be "9600 baud" packet ready, the reviewer states that the Bit Error Rate (BER) is not very good for 9600 baud. (It would appear that many of the VHF/UHF mobile rigs are terrible on 9600 baud packet). But what would the ARRL lab consider a good BER?? If the ARRL has a number in mind, it should be stated in the product review. If the BER is really bad, then the review should clearly state that the rig is really NOT 9600 baud packet ready!

I realize that a determination of a good or acceptable BER is somewhat arbitrary. But without some sort of "yard stick" (or at least a "rough yard stick") it is very hard to tell how good or bad the VHF/UHF rig is on 9600 baud packet. (QST did publish a good article on VHF/UHF rigs which I believe was entitled "9600 baud ready or Not". Perhaps this article could help the ARRL Lab to set an arbitrary "yard stick" for an acceptable or good BER on 9600 baud packet). This is only a suggestion. Perhaps, there is another way to convey to QST's readers how well a rig performs on 9600 baud packet.

In my view, more critical product reviews on poor performing VHF/UHF rigs for 9600 baud packet will encourage the various HAM manufacturers to actually make some more VHF/UHF rigs with good (or at least acceptable) BER's on 9600 baud packet. To date, it would appear that only a few VHF/UHF rigs perform well on 9600 baud packet. (At least that is my understanding)

In addition, I have noticed that some of the rigs are tested thoroughly in the lab but NOT on the air in ALL its modes. For example, if my memory serves me right, some recent product reviews on VHF/UHF rigs state that the rig was tested on the air on 1200 baud packet BUT not on 9600 baud packet. Sometimes on air testing can reveal interesting quirks not found in the lab. (e.g. like my old TS-940s not working at all on PACTOR with the 500 Hz filter on). The ARRL might consider encouraging (or insisting) that its product reviewers test the rig or other piece of equipment on the air in ALL the modes directly supported by the equipment under review (e.g. AM, FM, SSB, 9600 baud packet, 1200 baud packet, RTTY FSK, etc) and perhaps some of the modes indirectly supported (e.g. SSTV using SSB, GTOR using SSB, CLOVER using SSB).

I hope you find my comments useful as "constructive" criticism.

73's and Have a Merry Christmas

> don't you ?

Sure I am biased; I live and work with RF quite a bit. If it is dangerous, I want to be the first to know.

The League maintains the ARRL RF Safety Committee, a panel of physicians and notable experts in the field of RF Safety. Two work in industry, one is a researcher and the rest are practicing physicians. The ARRL "policy position" on RF safety is based in part on their recommendations. It is also based on ARRL's contact and participation with the IEEE RF Safety Committee (SCC-28). SCC-28 is composed of a mix of medical people, engineers, researchers and industry. (I am a voting member.) The knowledgeable people on this committee have set a standard that is very similar to standards set worldwide, and the FCC rules are based on two such standards.

I don't think I would characterize ARRL's response to the original 50-watt evaluation threshold as "bonkers." The League's petition for reconsideration was based on a reasonable assumption, IMHO. The FCC agreed. The rules have permitted exposure levels that vary with frequency. Yet the rules when first enacted, had a flat 50-watt limit across the board as the threshold for evaluation. The ARRL asked that the 50-watt limit be scaled by frequency, to match the exposure level in the rules. When you consider that the "worst-case" required distance for uncontrolled/general-public exposure from a 50-watt continuous carrier on 1.8 MHz into a half-wave dipole calculates to be 0.6 feet, as an extreme example, it can readily be seen that the 50-watt evalaution-threshold limit was arbitrary and not necessary. On 28 MHz, pretty close to the 30-300 MHz frequency range with the most strigent requirements, a 50-watt carrier into a 3-element Yagi calculates to 18.4 feet. (These are worst-case estimates, assuming full carrier and exposure in the main beam of an antenna. Actual exposure on the ground is usually much less.)

> Face it, folks, the government never wants to admit to anything that
> will harm you, if it affects commerce. If they admit to a need for a
> radiation survey, and issue guidelines, you know it's ten times worse.

Actually, with the safety factors built in, and the way the standard was developed, IMHO, this is not at all likely.

Info on RF exposure and Amatuer Radio can be seen at:

http://www.arrl.org/news/rfsafety/

A good, balanced-view site on RF exposure can be seen at:

http://iago.lib.mcw.edu/gcrc/cop/cell-phone-health-FAQ/toc.html

Now, as to the legal limit stuff, my present station is high powered --
about 900 milliwatts on 40 meters. :-)

73,
Ed Hare, W1RFI
ARRL Lab

This would never work. You know all the people that call 911 because their
TV does not work! Those people should not have unfiltered
access to cops on the street.

I have to admit I sympathize quite a bit with the concept
presented here. I don't think 100 watts needs to be the limit, but
I could easily see reducing the current 1500 watt limit to
something around 500. After all, what does that amount
to in signal level difference...only about 4.5 db. Surely
we have gained far more than that over the years with
the better recievers and antennaes as noted by mf.

Cheers,
Bill K2UNK

Anyone have a suggestion on how to obtain a flexible, 2 meter CB-style, err HT-style, 800 MHz antenna such as a trunked system user would have ?

I tried getting loosening the BNC on a police officer's at a traffic detail as she was eating tofu doughnuts and staring into a large subterranean crevasse, but was unsuccessful.

I did have diner with her however...

Anyway, I checked the web and don't see any references.

I need to touch up my reception a tad, and don't want to bother with outdoor antennas for my sideline hobby.

Danker.

The ARRL doesn't do shit for Hams. It took a lone government FCC
official to finally clean up the bands. Gone are some of the slime of
ham radio and more should be gone before too long. Looks like most of
the slime has slithered down into this newsgroup from the looks of it.
Posting how big someones home is from property deeds. What a bunch of
losers.

The League doesn't have regulatory powers; they're practically
helpless to do anything other than plead with amateurs to police
themselves. Do you ask the NRA to do something about gun-related
crime? Of course not; so don't blame the ARRL for on-the-air vio-
lations. And while we're on the subject, you need a history lesson
-- I suggest you read some books on the history of amateur radio --
you'll realize that if the League hadn't been fighting for us the
last 85 years, there wouldn't be an amateur radio service today.
(Of course, since you're not licensed you'd probably find radio
history a bore.)

>A well reasoned reply. How refreshing.

Yeah, it's amazing what the brain can accomplish when you don't waste its gray matter on memorizing trivial stuff like Morse code.

>The only thing I might say is that as you spent most of the past 3
>decades listening, you are different. 75 percent of hams, you know, are
>more concerned with endlessly flapping their gums.

A week ago I might have disagreed with you. However, this afternoon I heard another ham time out the same repeater three times during one QSO. I checked the Buckmaster database and found out that the guy's an Extra who ought to know better. I can see someone doing it ONCE if it's a repeater they're not familiar with and thus don't know what the timer is set for, but three times during the same QSO?

>Thus, they never learn how to use the tools their radios give them
>properly, such as DSP.

Hey, give 'em time, they'll get there. First they have to master setting the clock on their VCR, then maybe they'll get to the trivial stuff like how to run a radio. :-)

Some of the things that I, as a no-code Tech, have seen licensees with a General or above do while operating the club station during a contest:

1. Try to work 40 meter phone with the radio in CW mode. (The guy couldn't figure out why the phone portion of 40 was so totally dead in the middle of a contest. The packet cluster was spewing out line after line of multipliers on 40. He darn near turned green when I reached over and put the radio into LSB mode, thus switching in the wider phone filters and allowing him to hear - and work - the LU6 that was calling "CQ Contest" on the frequency we happened to end up on.)

2. Start calling CQ Contest in the portion of 10 meters that is reserved, during the 10 meter CW/SSB contest, for non-contest use.

3. Turn the RF output down to tune the antenna using the radio's built-in antenna tuner, and then forget to turn it back up again before resuming operation...then spending about five minutes wondering why he couldn't bust the pileup before the guy running the logging computer looked over and noticed the rig was only putting out about three watts.

4. Tune through about 100 Khz of the 20 meter phone band with the Timewave DSP set on CW while wondering why everybody sounded like Donald Duck on dexadrine.

>We are a distinct minority.

You mean those of us whose VCR's haven't been flashing 12:00 for the last six months? I agree. :-)

>You can't work them if you don't hear them.

Some guys I've seen could hear them but STILL couldn't work them because they couldn't understand them. That LU6 that I mentioned above, the guy still couldn't have worked him even after I put the radio in LSB where it belonged, because he couldn't understand the operator down there in Argentina giving his callsign due to the accent. I had to tell him the guy's callsign.

Maybe that's why guys like Hiram Percy Roll stay on CW...perhaps they just can't hear worth a <expletive deleted>.

I would like to purchase a speaker mic for my Yaesu FT-50. Below is a list of choices. Any suggestions on which one to buy? Which one(s) NOT to buy? Construction? Sound Quality? Comments are also welcome from VX-1R and VX-5R owners.

Premier (Pryme) SPM-102
Premier (Pryme) SPM-602
MAHA MH-800Y
Yaesu MH34B4B
(Did Yaesu fix the "muffled" transmitted audio that the MH34B4B is [was] famous for)?

Thanks,
John

On last night's 10:00 TV regional newscast, there was mention made of terrorist threats issued online and in person. The perpetrators face 5 years in the hoosegow if convicted but their family and friends all had the same excuse, "He was just kidding." Kidding my foot; the FBI neither realized nor approved of it and they moved in fast. Keep in mind that your server guartantees confidentiality but still must own up to law enforcement agencies because the welfare of this nation is a hell of a lot more important that your confidentiality. Some things we kid about but keep your fingers tied and your mouths shut when it comes to national security. The FBI will swoop down on you in the wink of an eye at the slightest hint of anything bordering on terrorism and thank God it does. Unfortunately it took the catastrophic Oklahoma City bombing to wake us up and by the way, wasn't McVeigh sentenced to die for it? What then is he still doing using taxpayers' money to keep his carcass on top of the soil? This frivolous appeal stuff gotta go!
"Doc," AF2Y (Always Friendly 2 You)

Wrong, Wrong the ARRL is in bed with the FCC.
The FCC does what the ARRL really wants done.

Welcome to ham radio-set your watch back 40 years

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. How you know you are a ham.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

> Does anyone have any experience converting Commercial Radio
> microphones over to amateur use?

Yes.

> I have both a G.E. mobile mic and a G.E. (made by Shure) desk mic,
> that both have unshielded wire (strange)

On the contrary. These microphones are obviously intended for use with FM transmitters. RF feedback is seldom an issue with an FM transmitter. Even the most horrific installations are unlikely to cause squealing and howling on FM. The easiest way to confirm is to see if the hanger/nubby on the back of the microphone has a wire attached to it. This is for tone squelch which I've never seen used on any other service.

> and the mobile G.E. has some
> sort of single stage pre-amp.... Or maybe it is the power supply for a
> condenser mic? Not sure.

Not a GE expert, but it is quite likely a pre-amp of some description. It could be a circuit that injects a DC bias from another one of the microphone leads though.

> Can anyone advise?

FM microphones are either dynamic or condenser (duh!). The dynamic units are either unpowered or have a built-in preamplifier. This preamplifier is almost always powered from the microphone line. If they are condenser they will also require a + bias on the microphone line. However, many radios also have a V output pin that could be used to generate the bias in the microphone. The voltage could be between 6V and 13.8V - it all depends upon the unit. A typical ham radio uses a condenser microphone also with bias on the microphone line so using the GE microphone on it shouldn't be too large of an engineering exersize. Of course, you may want to replace that un shielded cable!

Yeah verily, as I stand on the threshold of a new century - I will go
forth and convert all the heathens to..... [Morse code]

: If you think just because you have a license, your voice is any louder, get
: a grip. It's like having a drivers license and thinking just because you
: do, you can change the driving laws. Only through numbers will things
: happen. If you don't like league policy, then change the policy through the
: system.

Duuuuu, the ARRL was one the LAST groups that wanted changes made!!!!

: Sitting on your ass, griping and moaning is typical of those who don't do,
: but simply whine about those who are doing.

Tell that to NCI.

: Join the ARRL and start speaking with a united voice for change, whatever
: that change may be. Vote for things, send your letters. But get involved.

We've been through this several times. It is better for a person to join
a group that -already- thinks the same way he does than join a group that
DOESN'T want what he wants and then try to change the group.

Besides, it's -much- better to send your letters to the FCC. Don't mess
with the middle men.

Looking for the exact replacement antenna relay for the TS-830S Transceiver.

This relay was manufactured by OMRON and has a 12v coil, DPDT, plug-in type
with a manufactures number of G2E.

Kenwood's part number was S51-1404-05, reference RL1.

Please e-mail me if you have one or more of these relays available for sale.

TNX & 73.

Sorry chum, I happen to be an Extra Class holder and have been a ham since '80. I just don't care to have my name and call slandered in this cesspool of a newsgroup. The slime that filtered down here is the same reason I left HF 3 years ago. The ARRL is what got ham radio in the mess it's in now with the no code and relaxed testing. Now they're trying to get the 20 wpm test down to 12 or even10 or just plain done away with. Just think what will crawl out from under the rocks when that happens. The same crap that goes on now will be multiplied times 10 thanks to the ARRL. 73 is almost belly up, CQ is crap with nothing but advertising and the rag the ARRL publishes has seen better days and only cares about DX. I may try and get back on HF just to see if things have died down since Big Al's suspension and OTK's swan song. If you believe the ARRL is doing you a favor I have some land near the South Pole I'll sell you.

You obviously didn't read the message did you? There is nothing in my note about code or any other mode of operation. You are not interested in meaningful conversation, but simply stand on the stump and scream about things of which you know nothing, evidently. Typical of a licensed ham who is jealous of those who operate at a different level. If you want to speak with authority, then do the deeds then speak from experience.

You have not a clue of my likes and dislikes, but you read into things, those fears and confusions you have in your own mind.

I said, CHANGE FROM WITHIN, you idiot. I am not a code nazi or anything else your obviously inferiority complex leads you to believe.

As for the NCI, a small, little band of delusional people with no real following or standards, I wouldn't mind helping, but you are far worse than the league or any other group including BARF.

Now re-read my message and see if you find the appropriate words with which to respond. Don't put words in my mouth and I won't talk about your obvious ignorance.

And dream on about sending letters to the FCC. If you think you stand a chance in hell of changing things with a single view, you are truly nuts. It's the government, STUPID.

7 3, Merry and Happy to you.

Most hams are programmed to start wishing Merry Christmas after
Thanksgiving.
they do not really mean it, it is just a variation on 73.

Welcome to ham radio-set your watch back 40 years

Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. How to pass the A+ Certification
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. How you know you are a ham.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

> At most Happy Ramadan... but do you consider a month of fasting "happy"?

This shows how little you know about Ramadan. It is a very nice time of the year for Moslems, and at the end of Ramadan there are celebrations. Try to learn more about the observance. You might be pleasantly surprised. ...
I've lived in 3 Moslem countries - Saudi Arabia (operated HZ1AB on numerous occasions), Iran and Indonesia (operated as YB0AWU/YB2 in Yogyakarta) and often teach foreign military students from Moslem countries at Lackland AFB.

Source record: 124481

"The League doesn't have regulatory powers; they're practically
helpless to do anything other than plead with amateurs to police
themselves. "

Other than a monthly magazine of dubious value one does not garner much from
a membership. I can voice my opinions sans the shield of the ARRL, an
organization that does NOT speak for me. It is no surprise that only about
one fourth of all licensed Hams belong to the ARRL.
I'd rather spend the $$$ on something more worth while.
How about a little less "contesting" out here also? The ARRL seems to LOVE
that and for what?
Naaahhhh......no ARRL for me.

provide the group even thinks the same. The group in question seems to
follow the direction of its 11 brethren with little if any regard for the
wishes of the "membership" I love the part about the majority of NCI
members stated..classic. How would they know what the majority thinks if
they never ask?

: In my opinion this concept would not work, Police dispatching has to be
: kep't organizized so that they can keep tracked of the officers in the
: field. If every "responsible?" adult had a transceiver I think it would
: be caos for the police. Even screening the idividuals who had transmit
: privelidges would not work, as anyone can buy a radio, and anyone who
: knows how to solder can equip it with the proper crystal to transmit on
: police frequencies. With the current system the police learn to
: recognize the dispatcher's voices, and would not be foolish eneogh to
: respond to a bogus call sending them all to the opposite end of town
: while the anonymous dispatcher robs a bank in an area that he has just
: cleared of all law enforcement.anyways wouldn't carrying a cell phone
: that is equiped with a 9 and a 1 button have the same effect?

First off, as any ham radio operator would know, it is illegal
to operate on police frequencies without the authority of the
chief of police. And that isn't going to happen.

Cell phones and scanners can do the job just as well.

5881. KN4CF and WB2CLN have some "wetback" trouble..

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-25 00:00:00 UTC
From: Arch Stanton <torxman@bellsouth.net>
Message-ID: <eN594.3041$GF1.167113@newsread1.prod.itd.earthlink.net>
Source record: 124492

Iffen you weren't listenin to 3.860 at around 12:30 Am last night
you missed a good un! 3.860 has been used for a number of Years
by a group of Hispanic Op's in tghe NNJ/NYC/Conn area. Recently
two clowns from the 3.950 goose-steppin skinheads Liberty Net have
taken up to "occupying" 3.860 fo the "white man" as CF calls it.
Last night (on Xmas Eve!) all you-know-what broke loose when KN4CF
and WB2CLN (the cloistered hermit mean-old-white-man from Brooklin)
Decided to conduct a panty-raid on 3.860 Ya should have heard it!
CF in there spouting off with his racist militia KKK stuff and
surprise of surprises (get ready folks!) WB2CLN hurling almost every
4-letter
and 5-letter cuss word known to the Anglo Saxon at the
Spanish-speaking
stations. (..and a new ham radio *low* was reached on XMAS Eve as
KN4CF took to reading the Xmas story to QRM right atop the
NYC/NNJ/Conn Hispanic
Net) Half an hour later, these two babbling-bigot-bookends were joined
by
some of the regulars from 3.950 and the "QRM war" between then went on
until 3:00 AM by some accounts.

KN4CF refered to this incident several times as having "wetback
trouble" on the USA ham bands....

Or was it too much egg nog perhaps??

Even better. Happy New Year in late February like I heard several times
last year. This year will be a real target for those with "joy" in the
hearts, what with it not actually being the millennnium and all.

I know about it Cliff.

Of course, we'd be happy too at the end of a fast.

I was simply saying it's very stupid to wish a greeting that refers to a
Christian event to a Muslim.

That's not to say they'd be insulted nor return it.

It's just dumb.

Learn the right greetings and use them... sparingly.

I did not say they'd be insulted. I said you'd look stupid, unless they
were your friends. Unless you know what they are, there is no need for
the automated ham:

"73's and hope to hear you on again and hope your lights don't go out on
Y2K and Merry Christmas and Good DX and 73's again."

> >How many Chinese are Christian ? The chances of finding a ham who is is

I never said anyone would be insulted. But do you hear Arabs doing what
Americans do ? No. How about Chinese ? No. They don't go around wishing
us their happy holidays. Why should Americans wish them ours ?

> >Better yet, why is that it's always some American making the mistake ?

You jump to too many conclusions. A typical spastic mathematician.

What you described is appropriate. Merry Christmas to a Jew or Arab is
not.

> How you can find fault with that is beyond me. (Are you and Burt

THere is one flaw in all this, if all adults are given these radio's,
would not one think that the criminals would also end up with the same
radio's?

It's time for hams to take over the ARRL.
For most of it's existance--it's number one goal was to sell magazines subscriptions...and advertising space.

Why hasn't the league been more involved in the jamming situations on many of the bands? I've yet to hear of the ARRL doing anything to stop the jamming and illegalities on the bands. Why didn't the league petitioned the FCC back in the late 80's and most of the 90's to enforce part 97 more agressively? For that period of time, the FCC and the ARRL abandoned the ham bands with the rediculous notion of "SELF POLICING." What the hell is that?
With no way to enforce the laws and almost no way to ID the jammers and no legal way to aprehend the radio criminals, self policing as pushed by the League was a big joke.
You could call the Leauge and they would say...."You need to call the FCC about any complaint of jamming and illegal operation."
You would then call the FCC and they would say..."You need to call the ARRL because they took on the responsibility of self policing...."
Looks as if the ARRL dropped the ball.
I know this ...I would not want anyone who was so inept at what they said they were going to do......be in charge of any advocacy for my hobby and service.

Maybe a takeover by the people who make the ARRL payroll is in order. Someone with the guts to stand up to jammers, and the FCC.

An original poem.

Credit mf_luder.

==========

Twas the day after Christams and all through the shack, not a signal was stirring so I thought that I'd hack.

The bands were all dead and so were the hams, the younger folks couldn't give a damn.

About the "last two" phenomenon that Bernie's obsessed with or the top band reflector owner you just do not mess with.

These people began to think they could control the net, with moans about bandwidth, don't they get it yet ?

You're not on the air, you're not at the rig, on the net with millions, you're nobody "big". Your towers don't matter your power is less, no one cares if your signal sounds "best".

When out in the shack there arose such a clatter, I sprang from my shack to see what was the matter. I turned on the rig, to 3950, it being Saturday, the chatter was nifty.

There was a fed, working overtime, trying to sell the Clinton line. No disputes, Prozac rules, free breakfasts and vouchers for magnet schools.

We fixed Y2K, we think it might be, just in case, say 73. Riley has ordered this frequency clear, picking the libertarian one from considerable fear.

That the lights will go off and 1AW will be left, in the midst of staight key night, keyer batteries bereft. A-1 ops will be confused, unable to send, their QSO's 599 CT again and again.

They claim to be technologically ahead, but how can that be, when CW ops want PSK31 strung from a tree. So they will continue from Newington, that night, to use CW despite what is right.

Ten years it's been, when renovations did end and I know that I heard it again and again. Donations, donations, we need your reserves, now a decade hence I see they had nerve.

Who uses ASCII, RTTY is old, why can't these old farts break out of the mold ? "The station will incorporate new digital modes for HF " 'twas said, but judging by Baudot I think the idea is dead.

So shall we see come six nights hence, for if they are needed, slow speed t'will make us wince.

Will the Motorola MaxTrac 100/300 models do the same thing. I have several of these radio's that are wide band UHF and are former Federal sector radio's therefore they are going away due to the Federal spectrum narrow band mandates? If so I would be interested in trying to make them work.

5892. FRS Terrorism on Christmas Morning

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-25 00:00:00 UTC
From: rfenforcer@aol.com
Message-ID: <19991225122327.20436.00002044@nso-bh.aol.com>
Source record: 124503

Got up this morning and tuned the scanner to my bank of FRS frequencies. Since FRS radios have become the modern-day "walkie-talkies", I guessed plenty of kids would find them in their stockings come Christmas morning. My hunch was correct: several channels were active by 0900 hours, especially Channel 1.

After monitoring the action for about an hour, my attention focused on one particular conversation. A father was attempting to talk to his son on their new FRS radios, but was being maliciously interferred with by another adult. The second adult let loose with a tirade of obscenities, profanities, and threats which he directed towards the child. Upon hearing this, the child's father confronted this "radio terrorist" with a few choice words of his own. Within seconds, a free-for-all ensued, with the two adults threatening each other repeatedly and using language that would make a Mafia hit-man blush. This continued for several minutes. Wonderful! Looks like FRS gives us CB Channel 19 all over again, only this time the abuse is directed towards small children and on Christmas Day.

Just another example of how much we have deteoriated as a society here in America. After hearing crap like this, I almost hope the doomsdayers are correct in their predictions that the world will end one week from today.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

>Except that the FCC attaches great weight to anything the League says
>and is much more likely to implement a League suggestion than any
>suggestion you or I might make. Example: The League brought back
>incentive licensing, even when the FCC itself was opposed to it, as were
>the majority of hams.

Today's exams (if you're even licensed) should include questions
pertaining to amateur radio history:

Incentive licensing has been around almost as long as ham radio itself.
The idea of an IL structure was created in 1923. Back then the government
developed the Extra First Class amateur license; to be awarded the ticket
one had to be licensed for at least two years, take a test similar to the
First Class exam of that period, copy 20 wpm, and have a clean record.
Extras were then permitted to operate on a band that those with lessor
grade licenses were forbidden to use. That band (200-220 meters) had
originally been open to all hams.

Moreover, in 1959, the FCC asked hams, via a Notice of Inquiry, what
incentives could be tacked on to the Extra Class license.

It was the FCC which first suggested incentive licensing, not the ARRL.

>The hobby then began to slowly die, and has continued to do so to this
>day.

We have 670 kilohams -- more than at any time in our 90 year history.

>Where would we be without the League?

There'd be no amateur radio today. Lots of radio history books
available on the subject -- after you get licensed, study our
history and learn how many times during the last 85 years of
the League's existence they saved the hobby/service from
demise. If Congress had had it's way, there'd be no ARS today.

>Listen, once the Radio Amateur's Handbook discovered the transistor in
>the early '70's (about 15 years late), the projects in it came up to at
>least 1950's standards. Today, the Handbook is up to at least 1970's
>technology. That's progress, man! That's cutting edge!!

Let's look in the index of the 1961 (1961!!) edition of the ARRL
Handbook to see the entries appeared under the heading "Transistors":

Transistors pp 81-85
Transistor base diagrams p V31
Transistor current transfer ratio pp 83,84

Transistor Grid-Dip oscillator p 519
Transistor I.F. Amplifier pp 99-100
Transistor Mixers p 96
Transistor Power Supplies p 494
Transistor R.F. Amplifier p 107
Transistor Symbols pp 82, V31

Those topics appeared in the 1961 edition, which was prepared in
1960. That means QST had transistor projects in the 1960 issues,
if not earlier. Probably no other amateur publications even mentioned
transistors until after QST and the Handbook pulled them into amateur
literature.

>Where would we be without the League?

Since you publicly lie about them, I'm sure the League doesn't care
to be associated with you nor represent your weird views.

>technology. That's progress, man! That's cutting edge!!

Let's look in the index of the 1961 (1961!!) edition of the ARRL
Handbook to see entries appearing under the heading "Transistors":

Transistors pp 81-85
Transistor base diagrams p V31
Transistor current transfer ratio pp 83,84
Transistor Grid-Dip oscillator p 519
Transistor I.F. Amplifier pp 99-100
Transistor Mixers p 96
Transistor Power Supplies p 494
Transistor R.F. Amplifier p 107
Transistor Symbols pp 82, V31

Those topics appeared in the 1961 edition, which was prepared in
1960. That means QST had transistor projects in the 1960 issues,
if not earlier. Probably no other amateur publications even mentioned
transistors until after QST and the Handbook pulled them into amateur
literature.

Wasn't it somewhat like Peer Review? A system where one ham looked after another?

> With no way to enforce the laws and almost no way to ID the jammers and no
> legal way to aprehend the radio criminals, self policing as pushed by the
> League was a big joke.

Not unless you had an up-to-date callsign book.

> You could call the Leauge and they would say...."You need to call the FCC
> about any complaint of jamming and illegal operation."
> You would then call the FCC and they would say..."You need to call the ARRL
> because they took on the responsibility of self policing...."

Catch 22? How sad :(

Wasn't self-policing supposed to reduce the workload of the FCC? Maybe the ARRL
thought self-policing would be a good idea, since peers stand up for each other.

5909. IFR 1000 Service Manual needed.

Yes.

But I wonder the intelligence of those A-1 Op DXers who are so attuned to foreign cultures that they wish Merry Christmas to a station in Israel. Or perhaps the neutered "Happy Holidays" three weeks after the "Festival of Lights."

How many Chinese are Christian ? The chances of finding a ham who is is zero.

My favorite- last year a parade of goofs wished 9K2MU "Merry Christmas". At most Happy Ramadan... but do you consider a month of fasting "happy" ?

Then why are there DX Cluster Christmas greetings to stations in Taiwan floating acrosss my screen, wasting space ?

Better yet, why is that it's always some American making the mistake ?

Maybe the same reason why I have no problem copying all the idiots who send CW at 35 wpm, but then when I reply at 20 wpm I have to repeat my call at least two or three times.

No, it's not my antenna, I have no problem working DX at will.

Many, many U.S. "A-1" operators are just plain bad. Their bad operating often equates with an Anglo-American centered world-view that makes the enlightened laugh.

And to all a good night.

The following is a cut-n-paste from another group.
==========

WISCONSIN GOVERNOR ADDRESSES STATE'S HAMS
Wisconsin Gov Tommy Thompson took to the Amateur Radio airwaves December 16 to express his appreciation to the Badger State's ham community--and especially to those volunteering to remain on alert during the Y2K changeover.

"I want to take this opportunity to thank all the ham radio operators out there who are volunteering their time on December 31 and January 1 to make sure that we do not have any problems," Thompson said. The governor made his remarks from the Wisconsin Emergency Management emergency operations center radio room in Madison during a pre-arranged contact with Wisconsin Section Emergency Coordinator Stan Kaplan, WB9RQR. The contact was carried out on 40 meters. Dane County EC Sam Rowe, KG9NG, served as control operator. Thompson and his cabinet were visiting the Wisconsin Division of Emergency Government headquarters to review Y2K preparedness.

During the contact, Kaplan told the governor that about 1000 of Wisconsin's 12,000 amateurs are regularly involved in emergency communication. Because of Y2K, many hams not normally active in emergency communication would be standing by on New Year's Eve, Kaplan added. Hams across the state have been recruited by public safety agencies, utilities, hospitals and local government to stand by during the Y2K transition.

Calling amateurs "valuable citizens of the State of Wisconsin," the governor said it was comforting to know that they were willing to spend their own time "to make sure that other citizens are taken care of." Thompson also took the opportunity to wish happy holidays to everyone who had tuned in for the occasion. The scheduled contact had received some advance publicity. After the scheduled contact, Thompson stayed around to greet other amateurs who checked in.

"As each ham announced his town or county, it was obvious that the governor understood--and was delighted--that the circuit he had just used had connected him to the whole length and breadth of Wisconsin," said Daniel Gomez-Ibanez, W9NXE, who was among those on hand for the occasion. Gomez-Ibanez said equipment used was a Kenwood TS-440 and a vertical antenna.--thanks to Bette Kratz, KF9ZU; Daniel Gomez-Ibanez, W9NXE, and Jim Romelfanger, K9ZZ

How much would you like to wager that I'm not a ham as you say? Make
it easy on yourself. E-mail me and I'll give you my call. Leave out
"nospam". But since you're so smart, I guess you knew that already.

5917. Re: New Radio reform Catches more Criminals

THere is one flaw in all this, if all adults are given these radio's,
would not one think that the criminals would also end up with the same
radio's?

In article <84141n$vo3$1@nnrp1.deja.com>, <mf_luder@my-deja.com> wrote:
>Then why are there DX Cluster Christmas greetings to stations in Taiwan
>floating acrosss my screen, wasting space ?

The two major religions of Taiwan are Christianity and Buddhism. Wish
a Buddhist a Merry Christmas and they'll smile and warmly say "thank-you."
If you knew anything about their religion, you'd realize they're not
insulted by such a greeting. I have many Buddhist friends in Hawaii.

>How many Chinese are Christian ? The chances of finding a ham who is is
>zero.

There have been hundreds of thousands of Bibles smuggled into China.
Christianity in China is practiced as an underground religion.

>My favorite- last year a parade of goofs wished 9K2MU "Merry Christmas".
>At most Happy Ramadan...

And suppose he wished you a "Happy Ramadan" in return -- would you
be insulted or thank him?

>Better yet, why is that it's always some American making the mistake ?

Why is it a mistake to wish someone a nice greeting? When a Buddhist
greets me with a bow with his hands together in a prayer-like fashion,
I return the gesture. Then I will reach out and greet him in the Western
manner by shaking his hand. This is sharing of each other's culture.
How you can find fault with that is beyond me. (Are you and Burt
related? You two would make the perfect couple.)

>Maybe the same reason why I have no problem copying all the idiots who
>send CW at 35 wpm, but then when I reply at 20 wpm I have to repeat my

From: hammer007 <hammer007@my-deja.com>
Message-ID: <8440cdniu1@nnrp1.deja.com>
Source record: 124431

News from the research lab of top amateurs around the world have confirmed that the CLOUDWARMER antenna was defeated by a G5RV and the results were not even close. Recently the BARF and STUMPJUMPERS were conducting the N.J. antenna shootout on 14.313mhz. The station known as "CHUCKIE THE POOH", AF2Y, was working a station from the 8 call area, and was given at best a signal report of S8. The station that was being used as a comparison for evaluation of the antennas was located some 12 miles from AF2Y. The station using the G5RV was give a signal report of S9+10 db. Other considerations were that the G5RV station was using a power output of only 80 watts and trhe station of AF2Y was running a power output of 700 watts.

After several signal comparisons it was determined that the G5RV was much superior to the CLOUDWARMER. As a result of this slaughter it is now official and documented that the great antenna shootout of the century will be forever known as the " CLIFTON OUTHOUSE MASSACRE".

>>incentives could be tacked on to the Extra Class license.
>>
>>It was the FCC which first suggested incentive licensing, not the ARRL.

>What part of the phrase "brought back" don't you understand?

The League didn't bring it back; the FCC started the ball rolling
in 1959 with that Notice of Inquiry. They apparently got enough
positive response that IL was implemented.

>"Again, the mail poured in, pro and con. Many hams felt betrayed for, at
>this time, the ARRL was running a building fund drive to raise $250,000
>to construct the headquarters that now stands at 225 Main Street in
>Newington, Connecticut. In effect, they believed that the ARRL was
>saying "Thanks for your donation, now say goodbye to your HF phone
>privileges." They were not happy."

Oh, that's certainly an unbiased historical sketch! Supplying such a
prejudiced "quote" doesn't do anything for your credibility.

>As to the transistor quote you gave, by the time that Handbook came out,

written in 1960,

>Texas Instruments was selling integrated circuits -- a product of
>research carried out in part for NASA.

And you can't name one piece of commercially-built amateur gear in
1960 that contained an IC. Oh wait, my Globe Scout transmitter
had an "IC" in it consisting of a large ceramic disk containing a
a couple resistors and capacitors. Quite revolutionary...

>The ARRL hadn't a clue about ICs,

As I recall, even Popular Electronics didn't run their first IC
article until around 1963 or 1964.

>and anything it said about transistors was sparse at best (example:
>they were still talking about the CK722 - an obsolete point contact
>transistor - as though it was something current).

Let's look in the 1961 edition of the Handbook again and see what
transistors were called for in its projects:

Transistors pp 81-85
Transistor base diagrams p V31 55 listed
Transistor current transfer ratio pp 83,84
Transistor Grid-Dip oscillator p 519 a 2N107 and a 2N222
Transistor I.F. Amplifier pp 99-100 a pair of 2N247s
Transistor Mixers p 96 a 2N372
Transistor Power Supplies p 494 a pair of 2N278s
Transistor R.F. Amplifier p 107 a 2N370
Transistor Symbols pp 82, V31

Fairly advanced devices for when it was written in 1960.

>>>Listen, once the Radio Amateur's Handbook discovered the transistor in
>>>the early '70's

Yet I can pull up transistor projects in their 1961 edition, written
in 1960. Seemed like they discovered them at least a decade prior to
your claim.

>>>(about 15 years late), the projects in it came up to at
>>>least 1950's standards.

Let's look at a couple projects in the 1972 Handbook, a time when you
claim they were using 1950s standards:

On Page 308, we see a converter for 1296 MHz, using the following
transistors: 2N5187, 40519, 2N3866 (2), none of which were even
manufactured in 1960, let alone the 50s as you claim.

How about FET preamps for 6 and 2m and 220? Any of the following
are listed as possibilities: MPF-102, -104, -106, or 2N4416,
none of which were available in the 1950s.

>>> Today, the Handbook is up to at least 1970's
>>>technology. That's progress, man! That's cutting edge!!

Examples? You've got to back up your claims with facts!

>So, Jeff, until you learn your facts, don't spout off. You just may get
>embarrassed again.

You've reminded me -- I think I'll go have some more Christmas turkey.

While I'm munching, we're still waiting for responses to these other
remarks of yours:

>>>The hobby then began to slowly die, and has continued to do so to this
>>>day.

>>We have 670 kilohams -- more than at any time in our 90 year history.

No response?

>>>Where would we be without the League?

>>There'd be no amateur radio today. Lots of radio history books
>>available on the subject -- after you get licensed, study our
>>history and learn how many times during the last 85 years of
>>the League's existence they saved the hobby/service from
>>demise. If Congress had had it's way, there'd be no ARS today.

No response?

>>>Where would we be without the League?

>>Since you publicly lie about them, I'm sure the League doesn't care
>>to be associated with you nor represent your weird views.

No response?

>You did mention the ARRL though. So tell us great wizard, what mode -has-
>the ARRL supported and pushed all these years?

A variety of modes as one can see by reviewing each and every Handbook
and other publication they've produced:

During the 50s when SSB was finding its way into ham radio, there was no
pub one could turn to to learn about this new mode except the League's SSB
Manual. Also during that decade the FCC relaxed the regs regarding mobile
operation - no one else published a mobile manual except the League
(1955).

Who else in 1960 produced a VHF Manual? And when that VHF crowd
began exploring FM: The FM and Repeater Manual. The very first
book in the 80s devoted to amateur digital comms was the League's
Get Connected.

You can't pick up an issue of QST over the last 70 years without
seeing articles on every currently used mode.

So what was your question again, Jim? =:o (TM)

Why is it that every one of KT4TR's contacts is MOBILE made? Has his wife thrown out his ham gear or thrown HIM out? That's all I hear from the chap. "On the road again" as Willie Nelson sings. I'm going to look deeper into the domestic situation over there at that Vero Beach match stick hovel on a gigantic piece of property known as a landfill. You hamsters, keep an ear to your speaker and listen to Youngblood's MOBILE QSOs. What happened down there? Anyone know how to access divorce records in Vero Beach?

Come on torxman, tell the truth. I was listening to KN4CF and WB2CLN having a peaceful QSO for quite a long time on 3.860. They were the only ones on the frickasee. The Spanish folks came in right on top of their QSO and started QRMing KN4CF and WB2CLN. So, when you claim that KN4CF and WB2CLN QRMed the hispanic guys, you are lying, and I suspect deliberately so.

Are you saying that this Hispanic Net has a right to jump an ongoing QSO? Are you defending them for doing so?

Okay, you've set up your false premise with unsubstantiated accusations.
Now go for the big lies...

> Why hasn't the league been more involved in the jamming situations on many of
> the bands? I've yet to hear of the ARRL doing anything to stop the jamming and
> illegalities on the bands.

So, because you haven't heard of it, it hasn't happened. Bright boy!

Why didn't the league petitioned the FCC back in the
> late 80's and most of the 90's to enforce part 97 more agressively? For that
> period of time, the FCC and the ARRL abandoned the ham bands with the
> rediculous notion of "SELF POLICING." What the hell is that?

Something which has gone on through the history of amateur radio. The
FCC had little money for enforcement over the past decade or decade and
a half. The ARRL did not "abandon" the ham bands. Who put this silly
notion in your head?

> With no way to enforce the laws and almost no way to ID the jammers and no
> legal way to aprehend the radio criminals, self policing as pushed by the
> League was a big joke.

ALL jammers live in SOMEBODY'S neighborhood. Serious cases DID get
attention.

> You could call the Leauge and they would say...."You need to call the FCC
> about any complaint of jamming and illegal operation."
> You would then call the FCC and they would say..."You need to call the ARRL
> because they took on the responsibility of self policing...."

Please prove that ANYONE at the FCC EVER said such a thing.

> Looks as if the ARRL dropped the ball.

On what?

> I know this ...I would not want anyone who was so inept at what they said they
> were going to do......be in charge of any advocacy for my hobby and service.

What was it again which the League said it was going to do and then did
ineptly?

> Maybe a takeover by the people who make the ARRL payroll is in order. Someone
> with the guts to stand up to jammers, and the FCC.

You volunteering, Benito?

NEWSLINE 1167

Newsline report number 1167 with a release date of Friday, December 24th to follow in
5-4-3-2-1.

The following is a Q-S-T. An intruder on 20 meters sets off a world-wide T-hunt. This story and more on Newsline report number 1167 coming your way right now:

(Billboard Cart Here)

**

20 Meter Intruder

An unidentified signal at the low end of twenty meters has the worlds ham radio intruder watch community on alert. Q-News Graham Kemp, V-K-4-B-B, has the details on this mysterious carrier:

Unidentified carrier on 14.001mhz and Ron Roden G4GKO, Co-ordinator IARU Region 1 monitoring service asked that the frequency of 14.001MHz be monitored for an unidentified carrier. If you can hear the signal, please take
a note of the time heard, signal strength and if possible the bearing.

Ron has received reports from national monitoring co-ordinators in several countries including Kenya, New Zealand and Canada according to the news service of the Irish Radio Transmitters Society. Any reports should be com
municated to the IRTS monitoring service coordinator in your Country.

The IARU now has a Monitoring System website and it may be found at: http://www.iarumsr1.cwc.net

-----

Once again, if you get a bearing on this mystery intruder, please report all the data you collect to the Intruder Watch coordinator in your country. Here in the United States please send that information to the American
Radio Relay League. (IARU, IRTS, Q-News)

Flood Relief in Venezuela

I&#65533;m Bill Burnett, KT4SB, in Miami with word of ham radio being activated in Venezuela where the death toll from torrential rains has already surpassed 5000 and could reach as high as 35000.

On Wednesday night, December 15th, the area of La Guaira, Venezuela, was drenched by torrential rains believed to be associated with the Pacific Ocean La Nina. La Nina is a meteorological phenomenon that has caused unusu
ally rainy and cool weather in South America while keeping North America warm and dry.

In this case the downpour triggered avalanches of mud, rocks and boulders on Mount Avila. Mount Avila lies between Caracas and the Caribbean coast where La Guaira is located. Overturned cars and buildings buried in mud l
itter much of Venezuela's coast. And in the coastal town of Los Corales, truck-sized boulders now stand where a week ago there were luxury vacation homes. News reports say that the town's residents have all either evacu
ated or killed.

While information is still sketchy, at least three high frequency ham radio relief networks are believed to be in action on the 20 and 40 meter bands. One report out of Miami says that 7 point Zero-9-Zero MHz is being us
ed by what appears to be a Venezuelan ham radio international relief operation. Other stations have been heard passing traffic on 14 point 142 and 7 point 1-Zero-5 MHz at various time of the day.

Meanwhile, reports from relief workers at the scene say that international aid is beginning to arrive. This includes nine specially equipped search and rescue helicopters and more than 100 servicemen detailed from the Un
ited States. Even with this help on the scene, it appears as if Venezuelan hams will be supplying communications into and out of the devastated area, for some time to come. As usual, hams not involved in disaster commun
ications are asked to voluntarily avoid using relief net frequencies.

> From Miami, I&#65533;m Bill Burnett, KT4SB, reporting for Newsline.
(Newsline from media and on-air reports)

**

FCC Expands Yonkers NY VE Probe

Closer to home, the F-C-C appears to be expanding its investigation of alleged irregularities at an amateur examination session in Yonkers, New York, that took place on May 2. This, in a letter of inquiry to James Bonnet
t, KA2ZSA, who was listed as one of the volunteer examiner at the session.

In his December 8Th. letter to Bonnett, FCC Special Counsel for Amateur Radio Enforcement, Riley Hollingsworth, K4ZDH, asks Bonnett if he was present at the test session and if he personally signed the test session manife
st or any Forms 610 applications. Bonnet is also asked if he had applied any of the marks found on some answer sheets turned in at the session.

But that's not all. If Bonnett did not sign the test paperwork, Hollingsworth wants to know if KA2ZSA authorized anyone to sign on his behalf. The letter also requires Bonnett to explain how he became aware that his pur
ported signature appeared on the exam session documents if he was not actually an active member of the V-E team conducting the exam.

As previously reported, the FCC has dismissed applications from those who took their tests at the May 2nd session. It has told the applicants that their future amateur applications could be in jeopardy until questions ab
out the Yonkers exam had been resolved.

And in a related story, the FCC's Hollingsworth has responded to an inquiry from Winston Tulloch, KC2ALN, regarding the May 2nd Yonkers session. Tulloch had taken an Advanced class upgrade test and later had the upgrade
canceled after the session came under FCC scrutiny

In his letter to the FCC, Tulloch had requested that the agency permit him retake the Advanced examination. In his December 8Th. response, Hollingsworth encouraged KC2ALN to go ahead and retake the examination, adding th
at Tulloch's application would be routinely processed.

In his note to KC2ALN, Hollingsworth said that any alleged indiscretion at the session, was not Tulloch's fault and in no way does it reflect adversely on his qualifications to be an Amateur Service licensee. (FCC)

**

Don't Bother An Uncoordinated Repeater

The FCC has told an Anaheim California ham that he cannot disturb the operation of a repeater that itself the subject of an ongoing investigation. In a December 15th letter to Jensen Woods, AH6MX, the Commission says th
at it has monitoring evidence that AH6MX has been deliberately and maliciously interfering with radio operations of the KC6OKA repeater system in the Los Angeles area. This includes broadcasting and deliberate harassment
of other operators on the repeater.

But here is where the strange twist comes in. As previously reported, the FCC is investigating allegations made by Mexican hams in Baja

California Mexico that the uncoordinated Los Angeles area repeater is willfully inte
rfering with their on the air operations. Specifically, with their ability to communicate through a long established repeater that is located just to the South of the United States and Mexico border. The letter to Woods
does take note of this, but says that the operating perimeters of the KC6OKA repeater are of no concern in this matter.

Specifically, the FCC says • and we quote • •While it is true that the Commission is reviewing the operation of the KC6OKA repeater, as well as its coordination, you do not have the right under the Amateur Radio Service r
ules to deliberately or maliciously interfere with its operation• • end quote.

In other words, the FCC appears to be saying that regardless of any rules the repeater itself might be violating, no individual ham can violate the same or other rules while transmitting on the repeaters input or output f
requency.

But that•s not all. The letter to Woods tells him that it should be looked at as a warning notice that his alleged on-the-air operation will not be tolerated. Also that any additional incidents will result in a monetary
fine being levied against him and in revocation proceedings against his AH6MX license before an Administrative Law Judge.

**

BREAK 1

This is Newsline, heard on bulletin stations around the world, including the WB5RAP repeater serving Purcell Oklahoma.

(5 sec pause here)

**

More Closed Than Open

Southern California has far more closed and private repeaters on the 70 centimeter band than it has open ones. This according to Worldradio Magazine editor Rick McCusker, WF6O.

McCusker got interested in the open verses closed Southern California repeater situation while on a business trip last October•s A-R-R-L Southwestern Division Convention on board the Queen Mary Ocean Liner in Long Beach.
He notes that the ARRL Repeater Directory lists 482 repeaters operating in an area that includes Los Angeles, Orange, Kern, Imperial, San Bernardino, San Diego and Ventura counties combined. Of that 482

only 39 are list
ed as open and available to the general ham radio populace. The remaining 443 machines are off limits to all but those chosen by the system license holder to be repeated.

WF6O also reports that he's heard rumors that some of these closed and private repeaters charge between $100 to $200 a year. His editorial appears to question the legality of charging to access a repeater, asking the que
stion of what constitutes a reasonable access fee.

According to McCusker, he had the opportunity to bring this situation to the attention of the FCC's Riley Hollingsworth, K4ZDH, at the recent Northern California Pacificon ham radio convention. WF6O says he gave Hollings
worth a peak at Southern California repeater listings in the ARRL directory. Hollingsworth's only comment to McCusker " quote " "This isn't good." (Worldradio)

**

Maine Hams Assist in Missing Person Search

Hams in Central Maine recently helped in the search for a missing person. On December 7th, authorities began a hunt for a young woman who had been missing since the early morning hours. This, in the woods and near a lak
e where she was last seen.

Maurice Dandeneau, K1STB, reports the search was in his neighborhood in Winthrop, where canvassed the area door to door. Dandeneau says that he offered the services of the local Amateur Radio Emergency Service group to
assist. He then and got on the air using the 146.88 Winthrop repeater where received assistance from several hams.

This story does have a happy ending. Dandeneau reports that the young woman was found that afternoon. She was in good condition and only about four miles from her home. (ARRL Letter, Repeater Users Remailer)

**

Young Ham in Red Cross Errand - S.K.

Some very sad news with word from the ARRL of the death of a popular young Connecticut ham. Sixteen year old John E. Schmeltzer the Forth, N1ZKF, of Greenwich amateur was on an errand for the American Red Cross when he d
ied in an automobile wreck on December 6.

According to a Greenwich newspaper report, Schmeltzer was a volunteer in the Red Cross Communications Division. He and his best friend Dwight Renfrew the Third were killed when Schmeltzer's car went out of

control and s
truck a tree off a rain-slicked highway.

Students at Greenwich High School, where both were juniors, were released from classes to attend separate services for the two. Hundreds of mourners packed St. Michael Church for Schmeltzer's service on December 9th. (A
RRL Letter)

**

FAR SCHOLARSHIPS OPEN

And perhaps its apropos that we also report that a well known ham radio organization is once again doing its part to insure that some young radio amateurs get a good college education. This, as the Foundation for Amateur
Radio announces plans to administer seventy-three scholarships for the 2000 to 2001 academic year.

This years scholarship awards range from $500 to $2500. In some cases preference is given to residents of specified geographical areas or the pursuit of certain study programs. Additional information and an application f
rom may be requested from the Foundation for Amateur Radio Scholarships, P.O Box 831, Riverdale, Maryland. The zipcode is 20738 (FAR)

Project Echo • Y2K Around the World

A special on the air operation to ring in the year 2000 will chase the date change around the world. Jeramy Boot, G-4-N-J-H, reports on Project Echo from Nottingham in the U-K:

Boot Pkg. Here
In-Q: Project Echo•
Out-Q: •and v-beam antennas.

Q-S-L this one as directed. (G4NJH)

**

W2M Sacramento California Y2K Staton

Project Echo is just one of many ham radio commemorative operations taking place, world wide. Another is W-2-M which is the special callsign for the Millennium Celebration from Sacramento, California. This station will
be on the air from December 24th, 1999 to January 7, 2000. A commemorative card will be available for this operation. Q-S-L via George Steinert, N-6-Zed-S with S-A-S-E. (Press release)

**

DISCOVERY IN ORBIT

After an unprecedented nine delays, the space shuttle Discovery carrying three ham radio astronauts but no SAREX gear blasted on Sunday December 19th for a repair mission to the Hubbell Space Telescope. At 7:50 P-M Easte
rn time Discovery soared off its launch pad at Cape Canaveral Florida, lighting up the nighttime sky for miles around.

Included in the crew are three hams. They are astronauts Mike Foale, KB5UAC, John Grunsfeld, KC5ZTF, and European Space Agency cosmonaut Jean-Francois Clervoy, KC5WKG. Unfortunately, the mission timeline did not permit
scheduling any Amateur Radio activity and no SAREX equipment as manifested. No matter -- as numerous ham radio repeaters around the country did relay the audio from Discovery as the Mission Specialists performed their sp
acewalks to repair the Hubbell's deep space seeing eye

By the way, this was NASA's last chance this year to send the shuttle and seven astronauts to Hubbell's rescue. One more postponement and worries over possible Y-2-K computer problems would have bumped the flight into Jan
uary. (K6DUE, published news reports)

**

Ariane 504 Launch A Success

Also reporting a launch success is the European Space Agency. This as E-S-A successfully launches its new Ariane 504 heavy launch vehicle.

On December 10th, the new Ariane booster successfully orbited a large X-ray observatory payload known as the X-M-M. This is obviously very good news for this launch agency and great news for the Phase 3D ham satellite wh
ich is slated for a future Ariane launch. (AMSAT-BB)

**

DIREC-TV now has NASA TV - Kind Of

And there is some good news and some bad news for ham radio space enthusiasts who like watching launches and the like. The good news is that the Direc T-V home satellite television network began carrying NASA T-V on Wedn
esday December 15th. The bad news is that its not on the primary Direc T-V satellite. To get the feed Direc TV says you will need a new Direc T-V Plus system that lets subscribers watch two satellites at the same time.
This is because the NASA feed is on their newly launched bird. Word is that disgruntled hams are deluging the Direc T-V website with complaints in the hope of getting the service to move NASA television to its primary
satellite feed. (N6BIS, others)

**

AMRAD Low Frequency Beacon Project Expands

A second AMRAD sponsored low-frequency experimental beacon is now on the air from Northern Virginia. The W-A-2-X-T-F beacon can be found on 136 point 745 kHz and is a part of the Amateur Radio Research and Development Cor
poration's experiments to gain low frequency experience in anticipation that the F-C-C may allocate an amateur band at or near 136 kHz.

The new beacon at the home of Ted Seely, A-A-4-G-M, near Front Royal, Virginia. This is one of twelve W-A-2-X-T-F proposed sites. It runs a 175 watts out to a 1600-foot long antenna and transmits a continuous message in
Morse at a speed of 5 words per minute. (AMRAD)

**

DX

In DX, K-2-W-E also known as 3-W-6-W-E and X-U--2W-E reports that he will return to Vietnam in February or March. He also says that he has permission from 3-W-6-L-I to operate from his farm in Vung Tau. This location i
s about 55 miles from Saigon right on the South China sea. He says that he will make every attempt to operate on 40, 80 and even 160 meters if he can get the license. (OPDX)

Also, the Kermadec D-X Association advises that all QSL'ing for the January 1999 Zed-L-9-C-I DX-pedition to Campbell Island is up-to-date. As of December 10th nearly 55,000 QSL's had been mailed. (OPDX)

**

UKRANIAN PAGER DEBACLE

And finally this report from the Ukraine about a bunch of pagers gone wild. We don't know how much of it is true and how much is urban legend, but it does lend itself to the spirit of the holiday season.

The story goes this way. To celebrate the ringing in of 1999, a Ukrainian businessman bought a pager for each member of his staff as a New Year gift. He had them in the back seat of his car and was driving to his offic
e when suddenly, all fifty pagers began to beep at the exact same time. He was caught off guard and drove his car into a lamp post.

After he had assessed the damage to the car, the businessman turned his attention to the message on the pagers. Reportedly all fifty had the very same message on their readout screen. They said -- quote -- "Congratulati
ons on the successful purchase of your new pager!" (published news reports)

CLOUDQUARMER is the correct word. The next chapter in the great shootout
will be titled "RILEY TAMES CLOUDQUARMER"

Maybe this will make him happy:

Please accept with no obligation, implied or implicit, our best wishes
for an environmentally conscious, socially responsible, low stress,
non-addictive, gender neutral, celebration of the winter holidays,
practiced within the most enjoyable traditions of the religious or
secular persuasion of your choice, with respect for the
religious/secular
persuasions and/or traditions of others, or their choice not to practice
religious or secular traditions at all . . . . .

and a fiscally successful, personally fulfilling, and medically
uncomplicated recognition of the onset of the generally accepted
calendar
year 2000, but not without due respect for the calendars of choice of
other cultures whose contributions to society have helped make America
great (not to imply that America is necessarily greater than any other
country or is the only "AMERICA" in the western hemisphere), and without
regard to the race, creed, color, age, physical ability, religious
faith,
choice of computer platform, or sexual preference of the wishee.

(By accepting this greeting, you are accepting these terms. This
greeting
is subject to clarification or withdrawal. It is freely transferable
with
no alteration to the original greeting. It implies no promise by the
wisher to actually implement any of the wishes for her/himself or
others,
and is void where prohibited by law, and is revocable at the sole
discretion of the wisher. This wish is warranted to perform as expected
within the usual application of good tidings for a period of one year,
or
until the
issuance of a subsequent holiday greeting, whichever comes first, and
warranty is limited to replacement of this wish or issuance of a new
wish
at the sole discretion of the wisher.)

You may call me. I have been on the ARRL Board of Directors for a number of years. I am not aware of selling a list of our members to anyone. There is, however, a box you can check that restricts use of your name.

I suppose we could offer the membership list for a fee, but so far, I don't think we have. years ago we did offer a visa/master charge card and did a mailing on that. We dropped the plan because the bank wanted to start calling the members direct. The board of directors felt this was not what we wanted.

[Originally posted to alt.tv.southpark. Someone suggested, "Dude, you've GOT to post this up on alt.tasteless. You may have a winner here. :)" Har 'tis.]
--

Do you know someone with "snig-gif-nicant" brain damage? We do.

Know someone else with maybe a bipolar or schizophrenic disorder? We do.

Did you have a "festive Christmas ham" for dinner? We did.

Do they all tie together? They did for us?

OK, I have this friend who we haven't seen for years. He is on meds for
a mild schizophrenic disorder. He's very functional, in fact he takes some care of a brother of his who is really out there. But there is something about those meds that make him kind of -- well, detatched.

Anyway, we havn't seen him for years, we'd lost contact with him, so when he called me up a few weeks ago I invited him to our dinner last night (much better to have the dinner on the day when the store is still
open). (And I'd gotten a festive Christmas ham for less than 50ï¿½ a pound. No, we did not have sex with it.)

So he and I go out to the store for a few items. It's just a quick walk
down the block. When we get back ... uh-oh, wifey got as phone call from Knotts Berry Farm about this other person we know who is certifiably loony. Seriously. This person was in a coma for weeks after OD-ing while renting a room from us ten years ago. Her brains are
a mess. She'll mumble for hours about stuff no one cares about. The security people from Knotts called us after she gave them our phone number. They say, "We have this elderly woman here" [Christ she's only
50!] "who is mumbling and incoherent and yelling and crying." Wifey is
an indulgent sort, so she gives them our address. (This nutburger does
have a blood relative in the neighboring city, but I get ahead of myself.)

I made up a variation on the "Brian Boitano" song from SP:BLU:
"What would [Thing] do if she were here right now? She'd make a plan

and she'd fuck it up too! That's what [Thing] would do!" And how she ended up at our place was her fucking up a plan she'd made!

Nutburger was supposed to visit her sister in the neighboring city today, but she got, um, "confused" and showed up 30 miles from home the wrong day, then got disoriented at the major transfer point between the L.A. and Orange County buses. Did I say that she also loads up on "legal smack" for pain?

The Knotts people bring The Thing to our door. I retreat with our guest (who also knows this lady and cannot stand her) into the kitchen and tend to the food. "Thing" reveals to wifey that he foot is swollen up and is getting ulcerated. We ask why she isn't getting treated. She mumbles something about how doctors won't treat her (more on this later). Our guest is used to dealing with the mentally fucked-up, and he knows the drill pretty well, so we all agree (thre three of us, not the nutburger) that we are going to take her to the nearby hospital with an emergency room. But first we want to eat out festive Christmas ham.
Nutburger gets a free meal. (I think she actually planned on this.) Dinner is cordial but there is a definite pall over the scene.

I kept singing Satan's lyrics about the Jeffrey Dahmer festive Christmas ham, and I did sing "Hey there Mister [houseguest,] Merry *Fucking* Christmas!!!" to our guest while I was cooking and Thing was showing her appetizing ulcerated foot to wifey. (Houseguest had the same feeling I did about how it was going.)

So I stay behind to wash up and guest and wifey take "Broomhilda" to the emergency room. About an hour later guest and wifey come back.

After houseguest left, wifey and I were adapting the Mr. Hankey song in various ways. "[Thing's name here], the half-a-brain, She's fucked up, she's insane! She takes pain pills by the load, She's a fucked-up toad!"

About 11 PM we get a phone call. Wifey has gone to bed. We let it go on the machine. It's Broomhhilda complaining that they haven't tended to her yet. (Yeah, they shouldn't treat the gunshot victim first.) Ten minutes later, another call. Wifey takes it. Thing complains that they

aren't doing anything, that she wants to come to our place and PLUNK DOWN for the night. No way, wifey tells her, you stay there.

About 12 AM another phone call. I've had a few drinks and am feeling in
fine form. This time it's the hospital. Yes, they eventualy treated her. The problem is that she'll get tired of waiting her turn, just leave, and then tell everyone that no one would treat her, or that they
refused to treat her. Nutburgers are like this.

They want to ship her to our place. Her wheelchair is still here (wouldn't fit in guest's car). I say, "No way. We are not responsible
for her. She has a blood relative in [neighboring city] and besides it's fucking after midnight!" They ask about this sister's phonenumber,
and I say, "[Thing] knows it." (She does, she can recall it when it suits her.)

About an hour later, plus another drink or 2, another phone call. No, it's not the hospital or The Thing. It's he brother-in-law the MD. He
says his wife will be by to get her chair and then to the hospital to get her.

So around 2 AM the Thing's sister and really ugly niece show up. I put
the chair outside the screen door for them. Man, that hate from that bitch is palpable. (I've dealt with this family before and this broad is a super-bitch.) Good night shirt.

I saw the bitch come to the door
On Christmas Day, on Christmas day.
I saw the bitch take The Thing's chair
On Christmas Day early morning.

The Thing fucked up our Christmas Eve meal
On Christmas Eve, on Christmas Eve,
The Thing made our meal a sour affair
On Christmas Eve in the Evening.

Hey there Mister houseguest!
Merry **Fucking** Christmas!!!

Oh, it was a real South Park Christmas Time in Hell!

>> It's time for hams to take over the ARRL.

The League already consists of hams. Even you could run for office. Any
office.

>> For most of it's existance--it's number one goal was to sell magazines
>> subscriptions...and advertising space.

I suggest you read the book, "Fifty Years of ARRL" to see what it's
been doing.

>> Why hasn't the league been more involved in the jamming situations on many of
>> the bands?

That's like asking the NRA to do something about crime; neither the ARRL
nor the NRA have regulatory powers. They're each national organizations,
nothing more.

>>I've yet to hear of the ARRL doing anything to stop the jamming and
>>illegalities on the bands. Why didn't the league petitioned the FCC back
>>in the
>>late 80's and most of the 90's to enforce part 97 more agressively?

They did. daily.

>>For that period of time, the FCC and the ARRL abandoned the ham bands

Just the FCC.

>> self policing as pushed by the League was a big joke.

"Self-policing" is the FCC's phrase, not the League's. It refers to
you abiding by the rules yourself, and me abiding by rules myself.
That's the "self" part.

>>You could call the Leauge and they would say...."You need to call the FCC
>>about any complaint of jamming and illegal operation."
>>You would then call the FCC and they would say..."You need to call the ARRL
>>because they took on the responsibility of self policing...."

Oh, quit making things up. It's "self" not "each other."

>Wasn't self-policing supposed to reduce the workload of the FCC? Maybe the ARRL
>thought self-policing would be a good idea, since peers stand up for each other.

The League had nothing to do with the phrase "self-policing" -- each League official can look after him- or herself very nicely.

The government first applied that concept to us back in 1921 with the following ultimatum to radio amateurs:

"We can't control you, but you must be controlled if you are to exist; therefore, control yourselves, or cease to exist."

"...control yourselves...," not "...control each other..."

>Roger Wideman, you just quit sucking up to "the eternal Jew"

Ah, the retarded contingent has spoken.....

Still fostering hate for religions you don't understand, huh, HemmaLLoyd? Typical hypocrite. And during the Christmas season, too. See, unlike you, Toid, I don't need to "suck up" to anyone. I have a brain, and fully capable of making my OWN decisions. You, however, are of the weak-minded ilk who needs somebody like Schoenbaum to tell you when to go to the bathroom.

Learn that code yet? Or are you going to wait until the FCC "gives" you that General? How long have you been trying to get the code, 6-7 YEARS, now?

Gareth,

Check out below 3.800 on 80metere. 7.100 and below on 40metere, and
14.100 to 14.350 for 20 metere. 80 and 40 will be LSB (lower
sideband), and 20 will be USB (upper sideband).

Have fun.

5968. Elmers Directory Needs Elmers!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-26 00:00:00 UTC
From: pschleck@novia.net
Message-ID: <SWw94.12300$K7.468642@newscene.newscene.com>
Source record: 124474
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.homebrew

-----BEGIN PGP SIGNED MESSAGE-----

As readers of the rec.radio.amateur.* newsgroups are probably aware, I maintain a periodic information posting and WWW Page known as the Amateur Radio Elmers Resource Directory (aka the "Elmers List") which provides a list of Internet Elmers, indexed by topic, and their E-mail addresses. (For users of threaded newsreaders, this article is linked to the base article of the directory itself). You may also access the Directory at:

http://www.novia.net/~pschleck/elmers/

In order to maintain its value to the net, I have strived to keep it accurate and up-to-date. In addition to reviewing the currency of the entire Directory every 2 years, I am constantly scouring the newsgroups for new Elmers to join the directory. Areas of expertise that are most desirable for the directory right now include:

- Any expertise from residents of states, provinces, and foreign countries not currently represented
- Advanced homebrewing techniques (surface-mount, VLSI, DSP, spread-spectrum, etc.)
- TCP/IP Packet Radio and Gateways/Internetworking (particularly local IP coordinators and/or subnet managers/operators/leaders)
- Amateur Satellites/Space Operation (particularly Microsats, SAREX, and ARISS)
- Amateur-related Software for Unix/PC/Mac/Amiga/Psion/HP-95/PalmPilot
- College Clubs and organizational guidance/strategies
- Boy Scout Amateur Radio Merit Badge Counselors
- Unix/Linux/X-Windows programming and configuration
- Amateur Radio Organizational Contacts (I am especially looking for contacts for the ARRL Field Organization, GRAPES, AMSAT, QCWA, QRP Int., NARA(?), QRZ, CSVHFS, LAMBDA, ARES, RACES, FEMA, NACEC, any state OES or EMA, as well as any regional frequency coordinating body)
- Band, Mode or, Brand-specific equipment (actual manufacturer or dealer contacts would be quite welcome, as long as they reveal their affiliation and at least provide *some* free services)
- Maintainers of unique amateur-radio-related anonymous File Transfer Protocol (FTP) sites and World-Wide Web (WWW) Home Pages (as opposed to those that are substantially a rehash of, or pointers to, existing sites).
- Maintainers of unique amateur-radio-related mailing lists
- Editors/contacts for amateur-radio-related publications

In particular, based on reduction and analysis of 7 months worth of audit logs from the geographic-area/subject search engine on the main Elmers Directory home page, the following geographic-area/subject pairs were requested two times or more, but resulted in no match in the directory (meaning that the individuals seeking assistance could not find a matching Elmer):

If your geographic area and subjects of expertise appear in either list above, your help as an Internet Elmer is greatly needed (particularly for those subject areas followed by numbers greater than 10).

I'd like to emphasize that participation is totally voluntary, with very minimal obligations (1 or 2 polite inquiries a month, if feedback from existing Elmers is any indication). If you find that it is too much work, you are welcome to bow out, no questions asked. You don't even need access to Network News or the World-Wide Web, just a reliable E-mail address.

If you'd like to volunteer, please go to the following Web-based registration form:

http://www.novia.net/~pschleck/elmers/register.html

If you do not have access to the World-Wide Web, send a short E-mail message describing yourself and your areas of expertise to elmers-request@novia.net (the default Reply-To: of this article).

I have problems with my HF vertical. I am using a Butternut HF-9VX, and my SWR is very high on 20, 17, 15, 12, and 10 meters. I have a ground rod down and radials down, but it the SWR is up at infinite. What could be the problem?

Mark

Really now, has Lloyd snapped for real? Has a vestige of common sense and reason in his puny mind gone west for good? Is there anything this man can do besides being given materiel from avowed Nazi lovers to copy and paste on this board? Does anyone actually believe the man can put together, in harmony, a subject, predicate and direct plus indirect objects which constitute a sentence? And according to his bio on QRZ, "He went college yet, huh, duh, wha?" "Dumb dee dumb dumb." If I have a dispute, I look over the situation rationally and then proceed to mount a defensive without EVER considering religion,race,nationality, sexual preference etc. Yet, a stupid bigot like he simply attacks based on that one principle-religion. He sees Judaism, with about fourteen million adherents worldwide, as a menace to Christianity which boasts of billions. For heaven's sake, is it impossible for all to see that Davis is envious of Jewish initiative, pride and accomplishment? Is he sore about TIME magazine's choice of Albert Einstein as Person of the Century? Yes I know it's hard for him to take but a German JEW has gotten first prize. Oh how much that must hurt the Katzenjammer Kids, Davis and Strom! And how hypocritical too. Just yesterday, Lloyd Davis celebrated the birth of his personal Savior, Jesus the Jew of Nazareth who preached love for his fellow man which, to this abhorrent beast from Athens Alabama, went in one ear and out the other with of course the premise that he does have something between them. It's debatable, speculative and possible yet even one bone satisfies the requirements. My Christian brothers, when I say to one of yours who is fanatically anti-Semitic,"May you choke on your cookie and have your wine turn to pee," it is directed at ONLY HIM...please understand that. It's just my polite way of telling him to fan himself, get it? I feel sorry for you who do respect the words of Jesus and who follow his guidelines and who have a low class grub like Davis among you. Try to shrug his manical behavior off because to me he's just a fool who copies and pastes that which rabid sociopaths feed him. Goodness, can you imagine what he could do with a real honest to goodness brain?

Bad connectors

Connectors not installed correctly

Bad coax

Wrong coax

Antenna parts corroded

Poor installation location

Ground ineffective

Matching system fried/defective

etc. etc.

I'm in no way a sky hook expert - but those are the places I'd start with

Good luck!

Quit being a "buttinskey" for once in your life. Go spin your "beanie"
propeller" >>

>>I think on this day which commemorates the birth of Polly's saviour, it's best to remember that Emmanuel was born a Jew and died one. And that he had semitic features including, quite possibly, a large nose and you can bet that whenever he entered the synagogue he donned what Polly the Elder is vestments no less describes as a "beanie propeller." You see Gentile readers how the meaning of Christ is lost when it comes to a racist like Dumbo from Fishersville,TN? Do you see the damage he does to your faith born of Hebraic culture and then demeaned by someone corrupting its meaning? Notice please that my comments to the gent who does not like the ARRL had no religious intonations whatsoever but the rebuttal by W4FQF under a new name is filled with anti-Semitism. Now you perhaps get a better grasp of problem is this country when a miserable wretch of a human liie he is allowed to expel wind on this board. I also ask that K2IVX pay special attention to Polly's comments since he mistakenly thinks that "George" is an okay guy. Lenny and Jack Parzen, W9XV, WAKE UP! Will you condone W4FQF's blatant anti-Semitic remarks as justifiable in the wake of my backing the ARRL? What does one have to do with the other? Think, Lenny and Jack-THINK!
AF2Y<<

Patrick Wilson (k4ow@arrl.net) wrote:
: You obviously didn't read the message did you? There is nothing in my note
: about code or any other mode of operation.

You did mention the ARRL though. So tell us great wizard, what mode -has-
the ARRL supported and pushed all these years?

: You are not interested in meaningful conversation,

You're about 13 months to late to have a "meaningful conversation(s)" that
would have affected any upcomming changes to the ARS.

Evidently YOU don't know what YOU are talking about.

What name were you using a year or so ago? I don't remember you when we
WERE having those "meaningful conversation(s)" that led up to #98-143.

: but simply stand on the stump and scream about
: things of which you know nothing, evidently.

Evidently YOU don't know what YOU are talking about.

: Typical of a licensed ham who is jealous of those who operate at a
: different level.

(Oh? Are you one of those "superior hams" that knows which end of the
soldering iron to hold?)

Ohhhhhhhhh myyyyyyy, Ah'm sooooooooo jealouuuuusssssss of you "real
hams(c)". I think I'll just sell all my equipment and let you guys try to
get along without me.

: If you want to speak
: with authority, then do the deeds then speak from experience.

I helped an old lady across the street once. Does that count?

: You have not a clue of my likes and dislikes, but you read into things,
: those fears and confusions you have in your own mind.

Huuuu? Who are you talking to here?

: I said, CHANGE FROM WITHIN, you idiot. I am not a code nazi or anything
: else your obviously inferiority complex leads you to believe.

;-)))))))))) Let's get back on subject and stop this kid stuff for when
you are on the air. As I said;
Duuuuu, it's much easier to affect change by joining a group that wants

to do the same things you want to do, NOT by joining a group that you have to FIRST change to the attitude to what you want to do. You -do- understand that don't you?

: As for the NCI, a small, little band of delusional people with no real
: following or standards, I wouldn't mind helping, but you are far worse than
: the league....

Who be the "you" that YOU are refering to here? If NCI is so small etc, why are YOU spending the time trying to discredit them?

: or any other group including BARF.

Barf to YOU too.

: Now re-read my message and see if you find the appropriate words with which
: to respond. Don't put words in my mouth and I won't talk about your obvious
: ignorance.

You really have no idea of what I said in my previous post do you? I can't even imagine why you are even responding to someone so much your inferior. Try the [Ctrl][K] combination on your keyboard, maybe it will make you feel better.

: And dream on about sending letters to the FCC. If you think you stand a
: chance in hell of changing things with a single view, you are truly nuts.

Whatever you say Mr. Know-it-all. But what happens if by some crazy chance the FCC then comes out with an R&O and asks for even -more- "letters" so finalize the R&O?? And as a result >2000 -other- "single view" commentors then reply?

: It's the government, STUPID.

Well I've heard that they are a little dense, but STUPID??? Even YOU voted for some of them.

: 7 3, Merry and Happy to you.

: Pat, K4OW

Get back to us when the "happy" wears off.

It is truly amazing how dumb some hams can be. A certain famous ham from Las Vegas was pontificating last night how Reily was too busy to do 75M enforcement. This mental giant and paragon of hamdumb(sic) then went on to explain that "they were charging to use some repeaters in California and that's a big no no". Statements like this make one wonder where this idiot bought his ticket.

Newsflash idiot you can have private repeaters and you can charge to use them. Don't believe me try WWW.FCC.GOV you might learn something.

..WITHOUT A DOUBT, TIM VOLZ,KK7HO IS ONE OF THE FINEST HAMS TO EVER HOLD A TICKET AND I APPRECIATE HIS FRIENDSHIP AND SUPPORT. FURTHERMORE I'M JEALOUS OF THE MAN BECAUSE HE LIVES IN ONE OF THE MOST EXCITING CITIES IN THE WORLD. IF YOU DON'T BELIEVE ME, HOP ON A BIG BIRD, DEPLANE AT MCCARRAN AIRPORT, RENT A CAR AND DRIVE UP AND DOWN LAS VEGAS BOULEVARD. OH BABY! VIVA LAS VEGAS!.......

Dark Avenger <dark_avenger@mindspring.com> wrote:
>Are you folks not having another AM night for over a year? The next
>century doesn't start until 00:01Z 01/01/01 don't let the media hype
>fool you they year 2000 is the last year of the 20th century NOT the
>first year of the 21st.

From arithmetic:
When the hundreds (or century) column increases by one, we've moved
into the next century: 1,999 ---> 2,000 (recall centi = hundredths).
^ ^
Notice the nine increased by one. Any change in the hundreds
column indicates a change in century. Similarly, any change
in the tens (or decades) column indicates a change in decade.
Any change in the thousands column indicates a change in
millennium. This is all second-grade arithmetic.

Think there was no zero year? Christ was born as *late* as 1 BCE
(possibly eariler). If you look at the number line below, you'll
see that for counting purposes, 1 BCE takes the role of zero:

-----+-----+-----+-----+-----+----...
1BCE 1AD 2AD 3AD 4AD

Hope that helps,
Jeff KH6O

Recognized historical sources don't include personal comments such as:
"Thanks for your donation, now say goodbye to your HF phone privileges."

>That source also seems to disagree with your claims
>as to when the Extra class license first appeared.

It takes a thorough interest in radio history to uncover these
gems. On Page 37 of "Fifty Years of A.R.R.L." you'll find reference
to the Extra First Class license. As I wrote, a band that previously
belonged to all amateurs was set aside for the exclusive use of the
new Extras. To get the new license, one had to have a clean record,
have been licensed for at least two years, passed a 20 WPM code test,
and passed a written exam similar to the First Class commercial license
of that period. That was 1923.

Yep. You can find anti-League opinions all over the place. The above, trying to connect their fund drive to Incentive Licensing is ridiculous. It's someone's opinion: "Thanks for your donation, now say goodbye to your HF privileges" is not indicative of a reliable and neutral history reference.

There were about 6,000 comments received regarding IL -- they were evenly split for and against. See Page 143 in the above reference.

>So far, all YOU have provided have been your own undocumented claims.

I quote from books written on radio history written by authors who had access to historical documents, not from someone's web page. Quoting a web page with anti-League sentiments is not providing historical documentation. (For examples on how silly ham web pages can be, read read some of the 3950kHz pages referenced on this NG!)

Yikes! a 0.02 percent decrease! The sky is falling! =:o

When I was first licensed, there were 225,000 hams in the US. We have triple that number now. We acquired our present-day HF spectrum (minus the WARC bands) with less than 100,000 US hams, and the bands were jammed even then. So don't worry; just upgrade -- the HF bands will be there for a long time. Remember, it's not the number of licensees that counts, it's the number of operators.

Now, what about those lies you posted about the ARRL Handbook? Care to apologize? In the 1972 Handbook, there is no listing of any CK-type transistors in the transistor data tables, nor can I find any projects that call for them.

First, thanks for your response. I have already forwarded it to the
present and past Product Review editors.

Unfortunately, the Product Reviews are a sample of one, and a sample of
new equipment, at that. Other than the occasional failure during the
review, Product Reviews cannot predict longer-term reliability.

> Some of the problems like the internal speaker cutting in and out could never be
> fixed). In addition, I found the receiver in the TS-940s very very poor

> differences between the receiver in the IC-751 and the TS-940). I liked the
> receiver in the IC-751 much better. My old IC-751 was much more sensitive.

Most of these receivers come in at noise-floor sensitivity of about -140
dBm in a 500 Hz bandwidth. With any reasonable outdoor antenna, one's
system sensitivity is not going to be determined by the receiver, but by
external noise. The exception might be on ground-wave coverage on 10 or
15 meters, with a modest antenna.

There are a number of factors that affect a receiver's performance.
Sensitivity, phase noise, IMD and blocking are the "biggies." Other
factors, though, are AGC characteristics, in-channel IMD, etc. Many of
these are tested and published in the "expanded reports" that are made
available on the ARRL members-only page as a companion to the Product
Reviews.

> 20 and 30 meters CW!

This one is a bit puzzling. Actually, the SWR testing was done by the
Reviewer, using one of the Lab's Bird wattmeters. Rick is quite
competent and I do believe that the results he got were accurate for the
unit he reviewed. I cannot imagine the defect you cite; if anything,
the unit we reviewed must have been one of the improved units; yours may
have been "old stock," Unfortunately (and perhaps the League should be
faulted for this), we did not know of the problems with narrow bandwidth
on some of the R7000s. Had we known, we would have addressed it in the
Review and told hams what Cushcraft's policy was wrt the problem. When
we discover "design defects," as we have in our Review process, we
include such as statement from the manfacturer about its policies wrt
existing units.

> My R7000 is much better with the new R7000 trap field replacement kit. But
> If I tune the R7000 for low SWR on 20 meter CW, my SWR on 30 meters is still
> very high.

Interesting; the reviewer is a CW op and would have tuned his R7000 for
the CW part of the band. I wonder if this is something related to the
upgrade.

> Overall, the R7000 is a great performer on 10, 12, 15, 17 meters. But on 20
> meters, it leaves a lot to be desired.

> Perhaps, QST should mention the R7000 Trap field replacement kit in one of

> As you can see, I have had some lemons. I am sure you can appreciate my
> frustration when I compare one of QST's product reviews with one of my
> lemons!

Unfortunately, the Review process really can't find "lemons." I have
used the '940 and liked it.

> I do have one small suggestion. In some product reviews, the reviewer
> states that a particular performance specification is not very good without
> stating what would be a good number. If at all possible, it would be great
> if the product review mentioned an acceptable performance specification.
> (Or at least state that the performance of XXXX is not typical of equipment
> in this price range which I do sometimes see in QST's product reviews. We
> need more of that!).

We have had that very discussion here, and now that we are through the
QST redesign, I want to resurrect this with Joe. We are looking at a
"poor, good, excellent" sort of rating system; Joe has some very good
ideas.

On the latter point, I forget which high-end radio, but the radio had a
transmit IMD that was more typical of lower-priced units -- still okay,
mind you, but not quite what we would expect of a high-end unit. The
review said so. Next thing we know, some of the reflectors and
newsgroups are saying that the radio is great on CW, but it doesn't work
on SSB. This was NOT what the Review intended to convey.

> For example, with some of the product reviews of VHF mobile rigs that claim
> to be "9600 baud" packet ready, the reviewer states that the Bit Error Rate

> (BER) is not very good for 9600 baud. (It would appear that many of the
> VHF/UHF mobile rigs are terrible on 9600 baud packet). But what would the
> ARRL lab consider a good BER?? If the ARRL has a number in mind, it should
> be stated in the product review. If the BER is really bad, then the review
> should clearly state that the rig is really NOT 9600 baud packet ready!

I agree wholeheartedly, and your BER example is a good one. Many hams
do not know just how to interpret all those numbers and simply want to
know how the unit will work. Some of the BER performance I have seen in
the reviews indicate that the radio will only work on 9600 baud with
very strong signals.

> In addition, I have noticed that some of the rigs are tested thoroughly in
> the lab but NOT on the air in ALL its modes. For example, if my memory

We've seen one or two that won't work well at any signal level.

While I think Rob makes some very good points, I'd like to take a slight exception to Ed's enthusiasm for giving a thumbs-up/thumbs-down based on BER numbers. The problem, and it's one we have discussed repeatedly, is how you establish a "line in the sand." What BER constitutes "good"? I guarantee you that opinions will differ. Any design involves price/performance tradeoffs, and a tradeoff that one person considers unacceptable may be fully acceptable to another person. (This applies to many more topics than BER, of course.)

Ultimately, the reader should acquaint himself with the meaning behind the numbers, not just rely on a "good/bad" rating system. This is ham radio, and I don't think it's unreasonable to expect those who are in the market for a piece of radio gear to learn how to evaluate equipment measurement results.

That said, I think perhaps we should consider alternate ways of presenting the data. Maybe a performance bracket? (Compare the measured result to the best and average results measured in previous reviews.)

Yes, go further. I want to know more about "his kind".

I guess poor taste in art is limited to "his kind", so "our kind" would maybe have better taste?

"His kind" corrupts governments? Let's look at a few of "our kind", like Lyndon Johnson, Ted Kennedy, Barney Frank and Bill Clinton, who didn't corrupt the government ? ? ? (???)

Now that you see how confused I am, you can understand why I need to know more about "his kind".

Dark Avenger <dark_avenger@mindspring.com> wrote:
>Are you folks not having another AM night for over a year? The next
>century doesn't start until 00:01Z 01/01/01 don't let the media hype
>fool you they year 2000 is the last year of the 20th century NOT the
>first year of the 21st.

Q: When does your first year of life end?

A: The end of your first year of life is the day you turn one;
at that instant you've *entered* your second year of life:
At the end of that day, you're 1.0027 years old -- you're *out*
of your first year of life and have begun your second year.

Your first year of life runs from the day you were born to the
day *before* you turn one. The next day, you turn one year old
and thus have entered into your second year of life.

Being one year old is *not* the same as being in your first year
of life.

Similarly, the end of your 20th year of life is the day you
turn 20; at that instant you've *entered* your 21st year of
life: At the end of that day, you're 20.0027 years old --
you're *out* of your 20th year and *into* your 21st year.

Being 20 years old is *not* the same as being in your 20th year
of life.

Now substitute "century" in place of "year."

Hope that helps!
Jeff KH6O

Sorry Bill,

Both the power divider and variable attenuator/knob are long gone, as is the LF syn loop module and BO power supply and a lot of chassis parts have gone bye-bye.

It appears the major difference between low numbers and high numbers, is the TCXO vs Oven type Ref. Osc. and the .1 khz resolution. I will have to dig through the box and inventory soon.

As I mentioned previously, most of Newsline, (or 'Snoozeline') is
produced at minimal cost by Mr. Pasternak at his home and work,
(KTTV, Los Angeles, audio dept.).. It was for several years, provided
by phone around the Country by various Pasternak 'minions'..or
non-paid volunteers...who also maintain their own equipment and phone
lines....It worked well that way for years...

So why all the BEGGING NOW???

It's for Mr. Bills new TOYS..!!!

Pasternak now has more bills....Now there are TWO registered Domain
Names for Newsline:

WWW.ARNEWSLINE.COM <--- maintained by Dale Cary
WWW.ARNEWSLINE.ORG <--- maintained by Mark Bohnhoff

Hoo boy...!! More toys.....!!

Now, NEWSLINE listeners, you must PAY so Bill can PLAY..!!!

He has an ISP to pay for..He has WEB HOSTING to pay for.....

He has Real Streaming Audio setup to pay for..(who uses it.???)
I haven't met anyone yet who sits for 10 minutes and listens to
Newsline on their computer.....??????

Yes. folks..it's YOU that will PAY ...So Bill can PLAY..!!!!!!!

This is ONE ham that listened to P.T. Barnum..!!!
and I hope you do too folks...
73's.....

Sorry Jeff you're wrong. I would expect a lecturer in mathematics to be able to comprehend the difference between 2000 and the start of the new century/millennium.. Perhaps you are a victim of that new math. Check what the Naval Observatory has to say on the subject. NIST seems to share the Navy opinion. I leave Greewich as an exercise for the student.

When you get back to UH ask some of those Professors they'll be glad to help.

Sorry Doc I missed something was Tim Volz, KK7HO mentioned in the
original post? No he was not. Are you telling us that:

A: Volz is the only famous ham in Las Vegas?

B: That Volz was the idiot in question?

C: Both of the above?

Not very nice Doc, the original post did not mention any name and you
felt you had to sully Tim's name, for shame for shame. All those folks
who post about you are right you are not a nice man, not even to your
friends

This is the sort of thing that goes around forever (or seems to); the year ONE (I) was the first year of the first century. The year 1801 was the first year of the nineteenth century, etc. Blame it on Dionysus Exiguus. Want to change it? Sounds like a good idea! By popular acclaim, let's make the twentieth century only 99 years long and start the 21st with 2000!

Gotchagoat,

Please pardon my language: What a lot of drivel, understandable only as driven by malice.

Ruth, who was apparently esteemed within Intercon and beyond, stepped down of her own volition. Herb is in the process of being involuntarily removed, pending his defenses.

Though one or both may have wished the other off, they are mutually exclusive hams with mutually exclusive causes and effects. We need to look beyond nonsense to life's greater lessons.

There's no zero in the Latin system of numeration. Therefore, any series of
integers in Roman numerals starts with one.

Ave!

He does? Since when? Let's get all the particulars. Be specific, now,
well, you'll have to look up those words since your G.E.D. only goes so
far.

> You Jewish suck boy

BWHAHAHAHAHAHAHA! DUMBFUCK, I don't follow that particular religion.
There you go ASSuming again and making an ass of yourself, Toid.

KT4TR makes me laugh. Ever hear him brag about the superb marks, the great achievements by his kid in the SIXTH GRADE? Huh? The only person impressed by such nonsense is Queenie who never in 70 years got past the "See Dick Run" series. Superb in 6th grade- what the hell does that stand for? A person doesn't go on to become something much better than his father in which case Harry won't have to go far, through crayoning and clay softening in Grade 6. TR talks as if his kid is pulling rabbits out of hats in a great university such as N.Y.U. which leaves Columbia in the dust. My suggestion to Youngblood is to shut up and keep driving and pray that his Harry begins his REAL academic career by showing some brains in HIGH SCHOOL, first and then IN COLLEGE. This 6th grade genius stuff is pure hyperbolic bullsnot by an absolute on the skids....oops..I mean rocks. We have the best
computer Dick Tracys looking into the Vero Zero and slowly but surely facts are emerging which will astound everyone. This thing about registering the Casa Grande Gourmet Coffee Company under an Orlando address is just the beginning of a weird and sordid tale of intrigue and perfidy. We'll keep you posted as soon as Lewis, Beamer and Ricotolo send me hard copies of all documents. These men are agents the likes of which you'll never believe. But stay tuned to .313 to keep track of Little Harry's amazing accomplishments during December. A+ in recess. A- in nose picking. A in finger counting. A+ in peeling an orange and D, which KT4TR will NEVER mention, in the unimportant subject of reading and comprehension. Did I ever tell you that my daughter got a numerical grade of 99 in Kindergarten in sliding pond and my son a 98 in block building and a 97 in first grade Leggo. Wowie...what geniuses!

>after you buy the rig you really find out that it is a piece of junk.

This is true of a lot of magazines, not just QST. Astronomy
magazines have telescope reviews and you NEVER see them give the major
manufacturers bad reviews. For the same reasons.

>There is also a lot of equipment made by smaller companies for QRP, SSTV
>etc. But how often do you see a review for equipment made by these smaller
>companies (who generally do NOT advertise in QST)?

Good point.

>QST appears to give preferential treatment to its advertisers.

Most magazines do.

>This problem is not unique to QST. ANYTIME you publish articles and reviews
>on equipment that is advertised in the same magazine, you will have this
>type of conflict!
>
>THAT IS WHY I LIKE CONSUMER REPORTS -- no advertising conflicts. Too bad
>Consumer Reports don't review Ham radio equipment!

That's why I like reading "real" users reviews. Such as the ones on
e-ham for instance.

>I would gladly pay a little more for my ARRL membership to have an AD FREE
>QST with truly informative and critical product reviews.

I hate ads too but let's face it, that will NEVER happen in 2
million years.

Hi Gang,
I came across the following at the county library "free pile." They're your's for just postage:

Photofact folder set no. 111 (all dated 11-50):
Air King TV model 2017r
Bendix TV models 2051 2060 3051 6001 6003 6090 6100 6920 6990
Emerson portable radio 656b 657b
Emerson phonograph 634b
Jewel portable radio 5010
Masco audio amplifier mc126 mc126p
Oak 45rpm record player 9201
Sentinel phone/radio iu339k 339k
Silvertone phono/radio 33
RCA TVs 2t51 2t60
Motorola TV/stereo console 19f 19k

Photofact folder set 656 (all dated 9-63)
Emerson phono console p1913
GE clock radio c937a,b
Olympic TVs
Arvin stereo console
Continental fm radio
Motorola stereo console hs1043 hs1048 hs1050
Phonola stereo console
Westinghouse fm rcvr h839ns
Airline TV
Grundig Majestic model 5299u/s

Photofact folder set number 682 (3-64)
(Getting lazy): Emerson, Olympic, Zenith, Airline, Emerson, Motorola, Philco, Silvertone, Transonic, Vista, V-M, Zenith items

Photofact folder set number 419 (11-58)
Airline, Emerson, RCA, Dewald, Grundig, Harman-Kardon, Knight, Lincoln, Mopar, Motorola, Norelco, Pilot, Regency, Watterson items

Photofact set number 1509 (9-75)
Magnavox, Sanyo, Broadmoor, JVC items

Even if you don't own any of the above gear, this stuff has historical value. Honest! (Especially the 1950 folder.)
Each can fit in a flat-rate ($3.20) Priority Mail folder.

Jeff KH6O/7

What kind of new shtick will be thought up in Jan.2000 by the shortwave rightwing evangelists and the white extremist conspiracy theorists when neither Jesus returns nor the public rises up to overthrow the "corrupt" government in D.C? I expect to hear things like: "Well uh, Jesus ain't ready" or "He missed the elevator." or "Yeah he'll be back in 2000 but it don't say zactly when" along with "Da people don't have enuff guns," or "We're waitin' for da FBI to let their guard down" or "We never let revolutions stand in da way of dinner."

Ask yourself if you really have a problem. How does your antenna
perform on receive and transmit relative to other antennas within your
experience ? Or anybody else's antennas ?

Just because you are not happy with your SWR meter readings does not
mean very much.

On Nov.30,1999, my dear friend Ruth Hoffman, N4LMC, resigned from the office of Intercon Manager. All who know and love her and ham radio realize how important she has been to the longevity of the net in light of the unchecked until now sociopathic interference rendered her by the likes of KV4FZ and his crowd of ham radio thugs. Her undaunted efforts and devotion to the theory of assistance through amateur radio must be recognized and applauded and on behalf of a grateful ham radio community, I say God speed, the best of luck and many happy years of well earned retirement.

I have Recently bought An ADI-600-HP It's a good Radio.

The only things I have found wrong that(I) don't like is that the VHF
Knob sits too close to the "FAT" antenna, which makes it a little
dificult for me to turn the volume UP/down. Maybe if the antenna base
was a little smaller it would work better (maybe an after market would
do). The OTHER thing is that the speaker is not large enough. I went to
Radio Shack and got A Speaker-Mic for it, and that solved the problem
for speaker.

It's got a lot of nice features for the money, and I'm looking at the
PC software (for programming it) to see if it's any good, have not
heard any thing on that yet.

No need for anti-jewish statements here.

6051. Fear and Stupidity in Las Vegas

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-27 00:00:00 UTC
From: dark_avenger@mindspring.com
Message-ID: <3866f7b4.8091866@nntp.mindspring.com>
Source record: 124410

It is truly amazing how dumb some hams can be. A certain famous ham from Las Vegas was pontificating last night how Reily was too busy to do 75M enforcement. This mental giant and paragon of hamdumb(sic) then went on to explain that "they were charging to use some repeaters in California and that's a big no no". Statements like this make one wonder where this idiot bought his ticket.

Newsflash idiot you can have private repeaters and you can charge to use them. Don't believe me try WWW.FCC.GOV you might learn something.

>So Even though they're free - You are charging for the shipping!

No, the post office charges for shipping. I'm giving them away for
free. I send them and pay the postage out of my pocket; the recipient
then reimburses me the cost of the postage. I receive nothing, nor
lose nothing.

>Typical ham!

I wish! It would be great to get neat things for just the cost of
postage!

Great Jim. If that be so, then I owe an apology to you and ARRL. It is true that I was colored by the bias of my past experience in putting that out. Will try to be more careful, so I can maintain my great batting average on posts to this NG.
Thanks for giving us the facts.

So maybe now we're at the beginning of a trend: advertising in Russian to us Americans??

Message-ID: <8331-38673D74-4@storefull-244.iap.bryant.webtv.net>
Source record: 124415

A decade has past since many of us have spoken together on twenty meter SSB. Hurricane Andrew did me in here, destroying my house. Of course, the Godsend was that insurance money rebuilt our community better than before.

After the Hurricane, I gave up ham radio, picking up a full time position teaching English in an inner city middle school. A funny thing happened on the way in and out of school: I was assaulted. Past military experience was helpful but not sufficiently to forestall a nervous breakdown after only three months.

So now I'm undertaking my eighth return to ham radio and twenty meters. I expect we'll be running before summer. The installation, antenna and equipment are going to all be top of the line. Guarantee, my signal will be better than the blockbuster of the Eighties.

Looking forward to talking with all you friendlies.

Bob Sherin, W4ASX

6057. DC plug for Kenwood TH215 & TH225

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-27 00:00:00 UTC
From: sjcduke@aol.com
Message-ID: <19991227074539.02704.00001117@ng-fn1.aol.com>
Source record: 124416

I have both of the above 2 meter HT's. I want to use an external source of DC. Kenwood wants $9-$10 for the little DC plug that is necessary. I need several of these plugs, and I am unwilling to spend so much money for something that should be more reasonably priced.

The outside diameter of the plug is 5.5 MM, and the inside diameter is 1.55 MM.

Is there a source for these plugs at a more normal price?

Anyone help me....or have any ideas?

Thank you.....Lee KA0FPJ

Dust of those AM rigs and get them warmed up!! This Thursday December 30th
is the final Collins Collectors Associations AM night of the Century!!
Starting at 0200Z or 8:00 pm cst. We will be on 75m at 3885kcs and on
160m between 1980-1985kcs.
75m net control will be Jim W0NKL
160m net control will be Butch K0BS.
Everyone is welcome to join in. You do not need to be running Collins
equipment! What you do need to do is join us for an evening of fun and some
GREAT sounding AM equipment Hear you all there! 73's Larry WA9VRH

First off, understand that N0VFP knows NOTHING about history let alone anything else. He has a cement block on his shoulders. All of his anti-Semitic nonsense is being fed to him by elements like "Stromitler and Co." since they're too cowardly to do it themselves.
In the 1930s, Hitler ordered his Minister of Propaganda, Goebbels, to present anti-Semitic films to a gullible German nation. The idea was to use film as a weapon for dehumanizing and degrading the Jews in Germany in preparation for public acceptance of genocide. "The Eternal Jew" or in German, "Die Ewige Jude," was one such film. The other was called, "Jud Suess." I'm surprised that Dingbat Davis hasn't been fed the BIG LIE about the anti-Semitic manifesto called, "The Protocols of the Elders of Zion," which was published way before Hitler's era but still was promulgated very heavily by the Nazi regime. However as much as it irks anti-Semites, the Jew is eternal because God is. To whom did God entrust the Ten Commandments, the Davis family?

Howdy Mark.....I'd also like to know what you see for VSWR on the lower frequency bands, however, assuming that they might be bad as well, I'd suggest eliminating the feedline first......disconnect from the antenna, check for basic continuity end-to-end (use low ohms position of your meter....or at least a dc test light).....next check for a short or relatively low resistance path across the feedline (use high ohms position here and progressively go lower - keep your fingers OFF of the probes!). These previous tests are done with both ends of the feedline disconnected at the same time of course. If it looks ok with this simple sort of testing, then terminate the antenna end with a known-good dummy load and retest using your transmitter (low power) and VSWR meter or a through line type of wattmeter if you have one available. The wattmeter can be used at both ends in order that you might show up some major loss in the feedline (use the dummy load for this). If this STILL shows high then you have to decide whether its the feedline (coax) itself or a connector you've maybe put on OR...whether its a problem with the VSWR meter you're using (try a substitute unit if there's any doubt OR if using a wattmeter looks GOOD but the VSWR looks BAD). IF all this checks out, then its time for a good physical inspection of the antenna and installation and reviewing any notes regarding the history of the antenna and its installation (DID it WORK at any point....if it did then something failed.....DID it WORK at a previous installation? Was there any point in the installation that you felt you may have overrotated a joint or stressed a trap etc etc....being honest here might save you a pile of time).

Lastly a note on the installation, really without knowing how you've set up your radials etc.....DO NOT put your vertical up right next to your house (strapped onto it etc). Worse still, would be close placement to a metal sided building etc - I remember the grief I had, as a youngster, trying to get a much-heralded GOTHAM VERTICAL to "work" (Anyone remember THOSE heheh).

73 - Keep on Tinkering.....THAT......is REAL HAM RADIO

>response was "that isn't good".

What if it's documented that all such money goes to the upkeep of
the repeater including the paying of its bills? It seems to me that
what's being "charged" is information to access the repeater, e.g.,
its tone, not the *use* of the rptr. No one can be prevented from keying
up a rptr; all a club can do is ask for donations for its upkeep and for
access to its tone. If a user refuses, he can still determine the PL tone
and use the rptr -- he might not be welcome, but there is no physical
barrier to prevent the debt-beat from using it.

An an example, HO, I'm going to "charge" you a fee of $1 to post your
next article on this NG. We need that $1 from you for its upkeep.
Now, it's up to you to pay it or not. Risk not paying it and you
will be labeled a debt-beat, but you can't be barred.

HNY,
Jeff KH6O/6

I understand completely. I've been using the radio newsgroups since
'96, and I've never seen them as bad as they are now.

The groups were basically tolerable before AF2Y and his various
sycophants and detractors from the 14313 insanity plopped in here
sometime last year. Perhaps they'll eventually exhaust themselves.

In the meantime, has anyone been reading alt.radio.amateur lately? I
last checked years ago, and at the time it was fairly empty.

With all good wishes,

Kevin, WB4AIO.

One might compare Jackson Pollock to the artists at this site:

http://www.revilo-oliver.com/Kevin-Strom-personal/Art/artofthewest_.htm

When those with degenerate tastes (which may to some extent be
genetically programmed) occupy opinion-molding positions, the
degenerate and the ugly can become quite fashionable among people of
any race.

>

[...]

Barney Frank is one of the self-chosen, so he should be deleted from
your list.

You still have a point, of course, though I must point out that such
actors always work with directors and scriptwriters, who these days
are referred to as handlers and advisors, and their related coterie.

With every good wish,

Kevin, WB4AIO.

Calendars and arithmetic are two different things. Arithmetic by itself doesn't tell us when new centuries or millennia begin. Those are not arithmetical terms.

A calendar system _could be devised_ which began new centuries when the nines rolled over to zero. But the system we use now doesn't do that.

> Notice the nine increased by one. Any change in the hundreds
> column indicates a change in century. Similarly, any change
> in the tens (or decades) column indicates a change in decade.
> Any change in the thousands column indicates a change in
> millennium. This is all second-grade arithmetic.
>
[...]

But it has nothing to do with when centuries or millennia begin. With our current calendar system, the first year of the first decade of the first century of the first millennium ended with the digit one: therefore each decade, century, and millennium also begins with a year ending with the digit one.

All official timekeepers which I have checked, including the Naval Observatory and Greenwich Observatory, observe this long-standing system. 2000 is the last year of the twentieth century.

The _only_ exception I have found was Kaiser Wilhelm's Germany which, in 1899, declared by fiat that the 20th century was to begin in Germany in 1900, a decision which was at odds with the official calendar then and now.

Of course, I'm not counting the boobs, and the media boobherds, who, as usual, got it wrong again.

Probably most of the boobherds know that the third millennium doesn't begin until 2001, but they have such a low opinion of their

audience that they're convinced most of them won't "get it" even if it's explained to them.

With happy Y2K wishes,

[...]

Your chart has two flaws.

One, you are labelling _points_ on the graph with your 1AD, 2AD, labels. Instead, you should label the _intervals between the points_, since 1AD, 1999AD, et cetera, refer to intervals, not points.

Secondly, the point "zero" and the year "1BCE" are incommensurables (since a point is not an interval) and so cannot be equated.

Lastly, the putative birth date has nothing to do with the way in which the calendar system operates. It could just as well have been based on the year Buddy Holly died, or a fictional person, and would operate exactly the same even if they got the year wrong.

With every good wish,

Kevin, WB4AIO.

The Man Who Sold The World refers to any charismatic individual who
comes with a very strong vision, but ends up achieving something
completely different from what he set out to. As such, it could apply
equally to Adolf Hitler as it could to Jesus Christ.

David Bowie performed a very bizarre version of the song on Saturday
Night Live in December 1979. Bowie was encased in a solid mould body
that made him look like a billiard doll - he had to be carried to the
microphone by two backing singers (weird German singer Klaus Nomi and
performance artist Joey Arias, both dressed as Chinese air hostesses,
one pulling a small mechanical dog. A young kid watching at home
called Kurt Cobain decided there and then he wanted to be a rock
singer, which is why he later chose to cover the song live.

Dan, Thanks for the response. I have indeed thought about the status quo and the past. There is a difference, and there is surely deference due Riley which will change my operating somewhat.

However, I do have a legitimate issue, which I'm sure is not shared by the rest of the ham community. Not strictly a ham issue, it is called UPL.; I take respectful exception to Riley's express opinion about what constitutes UPL.

For those of you who haven't considered it, UPL stands for the Unauthorized Practice of Law. Though lawyers use it routinely to muzzle non-lawyers, it is a loftier principle evolving in case law.

In some cases, Riley has construed talking law on the air as UPL. Because I was brought up on the Constitution, as some were, on the Bible, I believe talking law is as American as apple pie and ice cream. I do not subscribe to Riley's strict construction of UPL, believing such will be proven, in time, as pre-empting the First Amendment, U.S. Constitution.

Notwithstanding. I have no desire to run afoul of Riley's efforts with a test case on ham radio and UPL. I hope Mr. Hollingsworth will guide me, as I am amenable to following all FCC instructions.

6093. A DAY OF PRAYER AND FASTING

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-28 00:00:00 UTC
From: Lloyd Davies <n0vfp@bellsouth.net>
Message-ID: <Acea4.2858$lz3.25886@news3.mia>
Source record: 124252
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

READ THIS:

The Anti-Demonization League has designated December 30, 1999 as a day of prayer and fasting concerning the matters of this report. Frankly, the situation is not unlike that described in the Bible's book of Esther. There, we read the plans made by conspirators in high places, backfired on them through the prayers and fasting of God's people.
"...And My people who are called by My name humble themselves and pray and seek My face and turn from their wicked ways, then I will hear from heaven, will forgive their sin, and will heal their land." (II Chronicles 7:14)
"But if you will truly obey his voice and do all that I say, then I will be an enemy to your enemies and an adversary to your adversaries. " (Exodus 23 :22)
"I call upon the Lord, who is worthy to be praised, and I am saved from my enemies. " (Psalm 18:3)
"Blessed be the Lord God of Israel, for He has visited us and accomplished redemption for His people...Salvation from our enemies and from the hand of all who hate us. " (Luke 1:68, 71)
December 30, 1999 has been chosen so Christian people can eat on December 31, 1999 and celebrate New Year's Eve and the next millennium with praise and thanksgiving, knowing their prayers have been answered.
"Surely there is a future..." (Proverbs 23:18)
"Do not fret yourself because of evildoers or be envious of the wicked. For there will be no future for the evil man; the lamp of the wicked will be put out." (Proverbs 24:19,20)

COMMENTS:

WE CAN CLAIM THE NEXT MILLENNIUM FOR CHRIST!

6098. FEDS RAID ELECTRONIC HOBBY VENDORS - NEW WORLD ORDER AT WORK!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-28 00:00:00 UTC
From: Lloyd Davies <n0vfp@bellsouth.net>
Message-ID: <PDea4.2925$lz3.26712@news3.mia>
Source record: 124257
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

FEDS RAID ELECTRONIC HOBBY VENDORS
12/18/99
2600 has learned that several small electronic hobbyist vendors were recently raided by federal agents brandishing semiautomatic weapons. News of these raids has been kept out of the media and many of those involved fear retribution if they openly discuss the case. Until now, these companies had operated for years selling harmless educational electronic kits (like wireless microphones) to students, hobbyists, ham radio operators, and hackers. Now their inventories are being seized at gunpoint--and their owners could be facing bankruptcy and prison time.
The U.S. Dept. of Justice is apparently re-interpreting federal wiretapping and smuggling laws to include small hobby radio transmitters. Even possessing so-called "Mr. Microphone" type toys can now put hobbyists at risk of looking down the barrel of a federal agent's loaded gun, a felony conviction, federal prison time, loss of property, and legal fees into the tens of thousands of dollars.
Ramsey Electronics and Super Circuits are just two of the companies recently raided at gunpoint. Both have good and longstanding reputations for selling inexpensive, quality educational kits and components to electronics hobbyists for many years through ads in electronic hobby magazines and their websites.
A high-ranking Justice Dept. official told one of the business owners the orders for these raids are politically motivated and originated from a very high level in the Clinton administration as a result of the Linda Tripp
wiretapping case. "They just need convictions," the official said.
Earlier this year the Justice Dept. indicted Bill Cheek, the well-known and loved author of books on radio scanner modifications and Monitoring Times column writer. Bill was selling very simple "data-slicer" circuits (made from parts available at any Radio Shack) that could be used with a PC and a scanner to monitor radio data transmissions--including unencrypted police mobile data terminal (MDT) transmissions. Even after Bill had been diagnosed with terminal cancer, the Federal government refused to back off, even issuing a summons to court on the same day he was to begin chemotherapy. In 1995 2600's BernieS was locked up in five different maximum-security prisons over 14 months by the Secret Service for possessing his laptop computer, his software, and ordinary electronic parts available at Radio Shack. He had been distributing parts, software, books, and pamphlets about cellular and coin telephones. The Justice Department's final investigation report stated "There were no victims in the offense." This is a clear pattern of harassment and abuse of power by our Federal government against people teaching others about electronic

communications. It appears our government doesn't want people to know this information. 2600 strongly feels this knowledge is important for people to have, and will continue spreading it at every opportunity. Write and call your legislators to complain about this injustice. You could be next!

Good?

Maybe you should read some details. Among others "squashed" was Ramsey for making things like ATV kits.

I'd guess that it's Ruthie who keeps Polly on the leash, Doc.
Polly's probably one of those "Walter Mitty" types, that's why he lies over the radio and on here.

Un fucking believable. This is really pathetic.

Is it a physcopath(sp?) that lies so often that he really gets to
believe his own stories?

Len

>>A college educated professional like K2IVX comes out with the disgusting four
letter F word? Talk about being a common slob! Additionally not only does he
have trouble with the word,"psycopath," but doesn't understand that the
relative pronoun succeeding it is WHO and not THAT. THAT as a relative pronoun
refers to THINGS, not PEOPLE. I'm talking rudimentary English grammar folks,
the type taught in the 6th grade of GRAMMAR SCHOOL. I'll bet Harrison
Youngblood can straighten out uncle Lenny. Incidentally those of you out there
who are not as highly educated as I and Lenny should not look upon my
statements as ridiculing YOU. They are meant to show there's something
inherently wrong with a man so educated as he and yet who writes blithering
blathering incoherent filthy sentences. Take a look at the Avotec website;
impressive, isn't it? Look at that list of clientele. Impressive isn't it? Look
at his educational ri¿½sumi¿½, impressive isn't it? Look at the way he tries to
write English. Unimpressive,isn't it? Based on what I read from K2IVX I
respectfully suggeset he relocate himself and his business to Fishersville
Tennessee and appoint someone with better writing skills the C.E.O. Polly!
heh..heh..heh..Queenie..Pittsburgh...hehh.he...hoooo...hoooo...heeee.heeee...

"Doc," AF2Y (Always Friendly 2 You)

Yet you give no numerical argument.

Now slowly read this and try to comprehend it: On the day you were
born, you were *in* your first year of life, but you were *not* one
year old. Okay so far? Now, on the day you turned one, you began your
second year of life.

Similarly, being *in* your 20th year of life occures *before* you turn
20. On the day you turn 20, twenty years have passed so you begin your
21st year on this planet. This is crystal clear when you take the time
to think about it. But like learning the code, many seem to be uncapable
of understanding it.

Being *in* the 20th century occures *before* we hit 2000. On 1/1/2000
2,000 years will have passed, and we *enter* the 21st century.

>Check what the Naval Observatory has to say on the subject. NIST seems

Separation of church and state precludes them from believing the
fact that Christ was born as late as 1 BCE, not 1 AD. Hence
1 BCE takes the place of zero for counting purposes. Rather than
attempting to hurl insults, study and extend the following number
line, noting that for counting purposes, 1 BCE plays the role of
zero:

```
0 1 2 3 4 5
---+-----+-----+-----+-----+-----+---...
1BCE 1AD 2AD 3AD 4AD 5AD
```

You can't counter anything I've written.

Hope that helps!
Jeff KH6O/7

Jeff you're making a fool out of yourself. You can talk down to me
until the cows come home and you will not be any more right. Fact is
if you fall off your high horse with your foot so far in your mouth
you could really get hurt.

read this and try to understand http://www.usno.navy.mil/home.html

There was no concept of zero in the Roman numerical system that is the
basis for our calendar. Zero as a concept and a place holder came much
later in Europe thanks to the progressive scientific thinkers of the
Arab world. I would expect someone in your line of work to have a
better historical perspective of the subject.

It is not my intention to make a fool of you so I withdraw you will
have to be the fool without my help. I have full confidence in your
skill set.

Are you sure you teach mathematics at the college level?

For info on what 3950 is all about, check out a copy of Mein Kampf by their esteemed leader Adolf Hitler at your local library. Lloyd Davies is just one of those poor unfortunates who got caught up in their movement because he is one of those naive ignorant souls who can be talked into believing anything.

Eric Cooper,KB6VPI

Well Well Well, I see some people STILL listen to my every word. YES it was me that said that and it came from an article (interview) that was about Riley's enforcement. Riley when asked about some of the repeaters charging, his response was "that isn't good".
Now listen to me more often, and closely, and you may just learn something.
Oh and stop the idiotic spin doctoring, flame baiting. You yourself should try to put something on this board CONstructive instead of DEstructive, i know how dificult that would be for you.. LOL

> All of your flowered words will not change the fact that in her
answer to my post, N4LMC said that she was "Watching" me. A clear
threat with overtones of "Stalking" and causing harm. It has been filed
away to be reported to the F. B. I. in my records if in case the
"watcher" does in fact carry out the threat. Why don't you call out the
REAL thug in this deal, N4LMC ? I made a threat to no one, I didn't say
I was "Watching"ie (stalking) any one. I just made the statement that
she was gone from intercon, and Herbie was still here. She showed her
long record of "payback" by making a threat on me.. Don't let your love
of her cloud your judgement here. Every one on the internet forums has
been warned about "stalking" You should know better than defend what
she did in that post. You are wrong, wrong , wrong.

Forget it, DA. We will never change Jeff's mind (or all of the other misguided souls). We are not talking about birthdays here. We are talking about the way the calender was set up centuries ago.
This should pretty well explain it even for the hard- headed folks:

6126. Re: What is 3950 all about?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-28 00:00:00 UTC
From: Kevin Alfred Strom <kevin.strom@innocent.com>
Message-ID: <38684122.170E3868@innocent.com>
Source record: 124306

Actually, the best place to find out about 3950 is:

http://www.3950.net

You may follow the links to several illuminating articles, and other related websites, and you'll also find an audio archive of the illegal malicious interference activities of the enemies of free speech.

In judging the relative veracity of the two sides, consider well the fact that the enemies of free speech transmit jamming noises, death threats, and other intentional interference to prevent the conversations of the legitimate participants from occurring. What does this tell you of their confidence in the truth of their own position?

There will be an update to 3950.net in the next few days, so be sure and check back after your initial visit.

With good wishes to all,

--

Kevin Alfred Strom.

Do the patriotic thing this weekend for the millinnium

JAM 3950kHz

Get rid of Adolf Davies once and for all!!!!!!!!!

<<First off, Adolf Davies is a no code tech plus moron who couldn't pass a cw test if it were 1 wpm. He's never been nor will ever be on classless 3.950 because he's stupider and lower than classless. In fact, if he became classless, it would be a step UP. All I see for him in 2000 is the same stuff: the inability of putting three or four words together sensibly and correctly; the scapegoating of Jews for his inability to emerge from the "doltdrums;' his non-existent love and social life; his dependence on mommy and daddy for handouts; his insecurity counted on by his Nazi loving hooligans to enable them to depend upon him to copy and paste racist trash and his refusal to recognize his own mental illness. Naturally if he ever won a lottery, people would call him Sir but that's so remote, it's absolutely impossible since the fool wouldn't know how to rub off numbers anyway. Everyone will simply have to get used to "follow the dots Davies" while hoping he grows up sometime in the next century.>>

I still can't get over Lennie's use of the F word in light of his education and background. I wonder what his grandson Tyler would think of him if the kid knew anything besides" goo goo da da" which sounds a lot like Lloyd Davies come to think of it. And what's with the name Tyler anyway? This is a name for a Jewish boy? Tyler? The next grandchild should be named Tippecanoe. For the unwashed scoundrels out there, Tippecanoe was the nickname of President John Tyler's predecessor, Pres. William Henry Harrison, who fought in the Battle of Tippecanoe in the War of 1812. Harrison died in office and when V.P. Tyler took the oath, up sprang the motto. "Tippecanoe and Tyler too." I wired K2IVX's filthy language posting to my Rabbi who asked, "This is the shmendrick who called ME about YOU?" Enough said. I might suggest that Lenny cleans up his act and begins acting like the C.E.O. of a big company instead of resorting to gutter language. And besides, this forum is read by impressionable youth who must be frowning upon his extremely poor choice of words. If he can't express himself in proper and gentlemany English, than WRITE NOTHING!

To me, her post in no way meets any legal test of stalking. If it did, the law would prevent anyone from watching another and reporting it. President Jimmy Carter, for one, would be the first to go when he reported "lust in his heart." And I can't deny "watching" the chicks, young and old, with lust, albeit fading.

Polly's song for Christmas this year was "All I want for Xmas is my two front teeth." From what he has said over the air, his rotting, pustulant teeth need worked on. Too bad he's just a buck-toothed choad. That's why he has a "dentist's appointment" today, which precludes him from getting on the radio and QRMing.
The stumpjumpers' taste in "women," is dubious at best, and they have to take what they can get. Usually, it's lady wrestler types, or "large Marges."

>until the cows come home and you will not be any more right. Fact is
>if you fall off your high horse with your foot so far in your mouth
>you could really get hurt.

Insults are not facts. Try counting from 1 BCE to now -- you can
count that high, right? The year 1 BCE is taken as the latest possible
year that Christ could have been born, so we begin our count from
there.

>There was no concept of zero in the Roman numerical system that is the
>basis for our calendar. Zero as a concept and a place holder came much
>later in Europe thanks to the progressive scientific thinkers of the
>Arab world. I would expect someone in your line of work to have a
>better historical perspective of the subject.

I never mentioned a "zero year," only that 1 BCE, the lastest possible
year that Christ could have been born, can be taken as zero for *counting*
purposes. Is that so difficult to understand?

>It is not my intention to make a fool of you so I withdraw you will
>have to be the fool without my help. I have full confidence in your
>skill set.

Again, count from 1 BCE:

```
0 1 2 3 4 5 6
--+-----+-----+-----+-----+-----+-----+ et cetera
1BCE 1AD 2AD 3AD 4AD 5AD 6AD
```

>Are you sure you teach mathematics at the college level?

Yes -- you might try taking one of our arithmetic courses.

Hope that helps!

>This is the sort of thing that goes around forever (or seems to); the year
>ONE (I) was the first year of the first century.

But if you begin counting from the latest possible year Christ was born,
1BCE, your original count is off by one:

```
0 1 2 3 4 5 6
-----+-----+-----+-----+-----+-----+-----+ et cetera
1BCE 1AD 2AD 3AD 4AD 5AD 6AD
```

> history reference.

"As a result, and after months of debate wihtin the pages of QST and
ohter magazines, in club bulletins, at conventions, on the air and
elsewhere, the ARRL petitioned the FCC to bring back incentives to
Amateur licensing. ... No new priveleges were proposed for Advanced or
Amateur Extra licensees, but it did proppse that HF phone priveleges
forf General licensees be phased out on the 80, 40, 20 and 15 meter
bands. Growth of the US amateur service had been brisk, running at
about 8% to 10% per year since the Novice and Technician licenses were
created in the early '50s. Once the debate started, however, the growth
rate fell sharply.

"The debate continued until the FCC handed down its decision in 1967:
incentive licensing was restored. ... Suffice it to say, most Generals
were *very* unhappy.

" ... Today, some 33 years later, there are those who are still bitter
about the outcome... it's clear that a lesson has been learned: Never,
never, NEVER should anyone propose to *reduce* operating priveleges."

From QST, January 2000, "Amateur Radio: 100 Years of Discovery," by Jim
Maxwell, W6CF, ARRL Pacific Division Director (eff. Jan 1, 2000).

Ok both of you, I've had it with this "cloudwarmer vs G5RV" thing.
I, W4NTI have the best wire antenna on 20 meters. I am using "litz"
wire, a 1/2 element phased array, and achieve 14db gain. Perhaps more,
but my "reference antenna" (Heathkit Cantenna) overheated.

Carefully removing tongue from cheek.

EVERYONE. NEW AND OLD, SHOULD UNDERSTAND THAT STROM IS SUPERIOR BECAUSE:
(1) HE'S CAUCASIAN
(2) HE'S NOT GAY, I THINK
(3) HE'S A CHRISTIAN IN NAME ONLY.
Anything written by this dangerous snake who is mentioned as an Internet hatemonger in Ray Franklin's Directory of Internet Hate Groups, is written in favor of those three aforementioned "attributes." Why is my thinking so different than his? For instance, I was born WHITE by accident. I had nothing whatsoever to do with it; I simply came to be because of white parents. Big deal. Why then should I feel superior when I became white by chance? Have you whiteys out there ever stopped to consider your own existences? Try it.
Secondly what does sexual preference mean to me? NOTHING. You gay haters say that they want too much and all that jazz. Actually they would have melded into society as we straights did had we not stigmatized them for centuries. Finally they got disgusted of being beat on so they are now beating the drum. It'll stop in due time-I say live and let live and stop worrying so damn much about what the bible says about homosexuals. I don't see Catholics going nuts over them. And Jews too. And Protestants in general. The only nut cases are the extremists, the right wing evangelicals who have an "in" with God. HA. Strom must be one of them. Strom is a Christian in name only; he uses the cross as a weapon instead of a shield or a badge of honor. His God is someone who used a twisted cross to kill millions and destroy his own nation, Adolf Hitler. Show me anywhere in Christian theology where racial superiority is taught. This board needs some refreshment, some fresh air and Strom would do us all a favor by going someplace else in 2000. Maybe there's a German-American Bund he could join up there in Rochester Minneosta or go across the border into Canada to hold Ernst Zundel's hand? I for one am sick of the racist KKK and for 2000 I wish him the most miserable year of his sordid life.

6168. eBay inconsistencies: full 800Mhz scanners taboo, but illegal FRS radios and CB linears are OK

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-29 00:00:00 UTC
From: rfenforcer@aol.com
Message-ID: <19991229173426.13463.00000589@nso-cg.aol.com>
Source record: 124089

Just saw this on eBay:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=225319475

A GMRS handheld being marketed as an FRS radio with "twice the power" and "detatchable antenna."

Funny how eBay won't allow me to list my 1989 model, full-coverage scanner. They consider it a "prohibited item", even though no mention of "cellular" was made anywhere in the item description and it's sale is completely legal between private individuals.

Yet, they seem to have no problem with BLATANTLY ILLEGAL linear amplifiers being marketed in the "CB equipment" classification or 1-watt, detatchable antenna radios being marketed in the "Talkabout, FRS" category.

I smell a lawsuit brewing over this one.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

>all agree that the newly created Federal Radio Commission was the first
>to deal with what a 1927 statute defined to be amateurs.

Again, totally false.

>My reading would be that anything which happened prior to 1927 would be
>irrelevant from a license structuring standpoint, because there was no
>official amateur status before that time (example: private stations

Completely false again. Read the following carefully:

The following paragraphs are taken from a pamphlet called "Radio
Communication Laws in the United States," which contains the
Radio Act of Congress of August 13, 1912. This pamphlet was
issued by the Department of Commerce Radio Service:

Paragraphs 121 and 122, Part III, Regulations Governing Radio Operators
says:

Paragraph 121. "Amateurs before applying for licenses should read and
understand the essential parts of the International Radio-telegraphic
Convention in force and Sections 3, 4, 5, and 7 of the Act of Congress
August 13, 1912. [The word amateur means boys and others who own and
operate stations for pleasure.]

"The Department recognizes that radio communication offers a whole-
some form of instructive recreation for amateurs. At the same time
its use for this purpose must observe strictly the rights of others
to the uninterrupted use of apparatus for important public and
commercial purposes.

"The Department will not knowingly issue a license to any amateur who
does not recognize and will not obey this principle. To this end the
intelligent reading of the International Convention and the Act of
Congress is prescribed as the first step to be taken by amateurs.

"Paragraph 122. Amateur First Grade. The applicant must have a sufficient knowledge of the adjustment and operation of the apparatus which he wishes to operate and of the regulations of the International Convention and Acts of Congress in so far as they relate to interference with other radio communications and impose certain duties on all grades of operators.

"The applicant must be able to transmit and receive in Continental Morse at a speed sufficient to enable him to recognize distress calls or the official keep-out signal.

"A speed of at least five words per minute (five letters to the word) must be attained."

Paragraph 123 discusses the Amateur Second Grade license. In addition to the Morse test, there was a written exam:

"The written exam consists of seven questions and to answer these you should know:

1. How to make a diagram of the transmitting and receiving apparatus.
2. How the transmitting apparatus is made and how it works.
3. How the receiving apparatus is made and how it works.
4. The international regulations for wireless communications and the United States wireless acts and regulations."

This all comes from "The Book Of Wireless" written by Frederick Collins, date of publication 1915.

>But then it is starting to look as though rationality is not your strong
>point when it comes to matters of your cherished beliefs about ham
>radio. Consider this to be my final response to you. You don't seem to
>know cr*p about amateur history.

Ouch! I know what my books tell me, and they tell me that you need access to a larger library!

A happy and healthy new year to you, even though you lost this little history debate.

Subject: FEDS RAID ELECTRONIC HOBBY VENDORS
Date: Tue, 28 Dec 1999 15:04:45 -0600

See: http://www.2600.com/news/1999/1218.html

FEDS RAID ELECTRONIC HOBBY VENDORS
12/18/99
2600 has learned that several small electronic hobbyist
vendors were recently raided by federal agents
brandishing semiautomatic weapons.
News of these raids has been kept out of the media
and many of those involved fear retribution
if they openly discuss the case.

Until now, these companies had operated for years
selling harmless educational electronic kits
(like wireless microphones) to students, hobbyists,
ham radio operators, and hackers.
Now their inventories are being seized at gunpoint
and their owners could be facing bankruptcy and prison time.

The U.S. Dept. of Justice is apparently re-interpreting federal
wiretapping and smuggling laws to include
small hobby radio transmitters.
Even possessing so-called "Mr. Microphone" type toys
can now put hobbyists at risk of looking down the barrel
of a federal agent's loaded gun, a felony conviction,
federal prison time, loss of property,
and legal fees into the tens of thousands of dollars.

Ramsey Electronics and Super Circuits are just two
of the companies recently raided at gunpoint.
Both have good and longstanding reputations for selling
inexpensive, quality educational kits and components
to electronics hobbyists for many years through ads
in electronic hobby magazines and their websites.
A high-ranking Justice Department official
told one of the business owners the orders for these raids
are politically motivated and originated from a

very high level in the Clinton administration
as a result of the Linda Tripp wiretapping case.
"They just need convictions," the official said.

Earlier this year the Justice Dept. indicted Bill Cheek,
the well-known and loved author of books on radio scanner
modifications and Monitoring Times column writer.
Bill was selling very simple "data-slicer" circuits
(made from parts available at any Radio Shack)
that could be used with a PC and a scanner to monitor
radio data transmissions--including unencrypted
police mobile data terminal (MDT) transmissions.
Even after Bill had been diagnosed with
terminal cancer, the Federal government refused
to back off, even issuing a summons to court
on the same day he was to begin chemotherapy.

In 1995 2600's BernieS was locked up
in five different maximum-security prisons
over 14 months by the Secret Service
for possessing his laptop computer, his software
and ordinary electronic parts available at Radio Shack.
He had been distributing parts, software, books
and pamphlets about cellular and coin telephones.
The Justice Department's final investigation report stated
"There were no victims in the offense."

This is a clear pattern of harassment
and abuse of power by our Federal government
against people teaching others about electronic
communications. It appears our government doesn't want
people to know this information.
2600 strongly feels this knowledge is important
for people to have, and will continue spreading
it at every opportunity.
Write and call your legislators to
complain about this injustice.
You could be next!

I doubt the part about being "raided at gunpoint."

Visit this URL:
http://www.ramseyelectronics.com/cgi-bin/SoftCart.exe/scstore/Hframeset.htm?
E+scstore

It is the Ramsey Electronics web site's page on federal restrictions. Seems
to me that if they had been raided at gunpoint they would mention the fact.

That was exactly my experience and mine went back, as well. I'll admit
to ahving pangs of regret when using a conventional scanner without teh good
sensitivity and other bells and whistles featured on the 92, but the truk
tracking was so poor (it exists in name only) that I couldn't justify keeping it
as (yet another) conventional scanner given the price. Now, if I were to sell
the 200 XL, one or both of the PRO-30's, the R-1, etc. ...

Thanks for reading this message.

I am looking for a copy of H. W. Sams #1824 folder #3. Should be for a Zenith-Allergo stereo model # J596W. I'm trying to fix stereo for my mother and can't seem to locate # 1824. I'd gladly pay for shipping and copying cost . Need the parts list, schematic of amplifier, block diagram, view of components.

Thanks & Happy New Year

Dennis

Roger, I think in this case it would be a no-class action suit for this individual. I was just being sarcastic, my suing him is as stupid as his idea of a"stalking" case and it's really not worth my time. Besides the way this decrepit old fart whines and cries like a litttle girl on twenty meters, I think he already has enough pain and discomfort in his life.

Been looking at this one for a while.
First, Crist has little to do with it now, (The Bible doesn't mention the year, so
it is trivial, *the date that is, not his birth*) We also skipped a few years in the 1400's.

The math though is simple and logical:

1- 0.1-1 or 1-100 (starts w/ .1 because the first year was not completed until
the last day of the first year. It
is this point that causes the
10's 100's and centuries to start
at 1, or 11, or 101, or 1001 etc.)
2- 1.1-2 or 101-200 etc.
3- 2.1-3
4- 3.1-4
5- 4.1-5
6- 5.1-6
7- 6.1-7
8- 7.1-8
9- 8.1-9
10- 9.1-10 -end of first century
11- 10.1-11 - 1001 -1100
12- 11.1-12
13- 12.1-13
14- 13.1-14
15- 14.1-15
16- 15.1-16
17- 16.1-17
18- 17.1-18
19- 18.1-19
20th century- 19.1-20 (the end of the 2000th year) 1901 - 2000 (again, end of 2000)
21- 20.1-21 2001 to 2100

simple.

-Pete

> during hours of darkness in UK?

Hmmm hours of darkness leave me wondering, any band can be open at almost any time. 80 and 40 are good local bands for evening work but even 10m can be open well in to the early morning hours so look around. A complete list of U.S amateur frequencys can be found at:

www.arrl.org

You can print out a nice color freq chart. 7.0 to 7.3 MHz can be interesting especially late at night, it does not open every night but when it does you should hear DX from around the world, same for 20m 14.0 to 14.350 MHz.

Good listening,

Tim ka8ddz

6190. An intelligent(?) set of questions about Pro-92,Pro-94, BC245, and trunktracking

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-29 00:00:00 UTC
From: mp <mplanck@my-deja.com>
Message-ID: <84cda6$9qr$1@nnrp1.deja.com>
Source record: 124191
Cross-posted to: rec.radio.scanner,rec.radio.amateur.misc,alt.radio.scanner,rec.radio.amateur.equipment

Hello!

My local PD just went to a trunked system. So now I find myself thrust into the world of trunktracking. I always like to take a minute to see what products are out there before I buy a new radio, so I tried to take a look at what was available in trunking-compatible scanners. What I came up with was: The Pro-92, the Pro-94, and the BC245.

PRO-92
I *REALLY* liked the Pro-92 and was all set to buy one until I found the gobs of complaints about it on this newsgroup, among others.

=====PLUSSES=====

-Alpha tagging

What got me excited about the scanner was the 12-digit alpha tagging. It has been a pet peeve of mine for years that, with anything beyond my 16-channel scanner, I found it impossible to even begin to memorize what channel went with what service. Yes, I know that a lot of people use their scanner's banks to organize their frequencies, which sounds nice in practice. It never works for me, however (for a variety of reasons). The only radio I have with alpha tagging is the Yaesu FT-50 (I am a licensed Ham radio operator...) modified for extended receive frequencies. The FT50 has only 4 digit channel naming (which is practically useless). 12 digits would be perfect. This one feature justifies the high price of the scanner for me.

-CTCSS-PL/DPL
My FT50 has PL/DPL also and I never quite got around to using it. With the Pro-92 it would be great, because those 'multi-user' frequencies could be stored as two seperate entries, if, say, the municipal sanitation department and the local highway department shared a frequency but used different PL tones I could program- "garbage truk" in channel 30 with PL 162.2 hz and "Hiway dept" in channel 31 with PL 173.8, and always know who I was listening to. These two features seem to compliment eachother nicely.

=====MINUSES========

-Bugs
I have seen MANY complaints about the Pro-92. The main one seems to be caused by how the scanner works. Please keep in mind that I know almost nothing about trunked systems but from what I've read here and

on several websites, the Pro-92 uses tonebursts at the beginning of the received transmissions to follow conversations while the others actively monitor the data channel all the time.
What do the 'real' radios use to stay in synch with the trunking system? That is, what do the real trunked mobile and handheld walkie talkies being used by the police and others listen to? It seems that to listen to the data signal while receiving another 'audio' signal would require almost two seperate receivers in one case, whereas listening to tone bursts on the frequency being monitored would allow a radio to be designed more simply (and produced more cheaply).

-Data skip
From the sources I've seen the Pro-92 has no "data skip" feature.

=========About me=========
Here come the questions, hopefully someone who knows more about these scanners and trunktracking can help me analyze my situation and offer their suggestion as to which scanner would be best.

Things I dont care about:

-Battery packs. Much noise has been made about Uniden's proprietery battery packs. I couldn't care less. I mostly use the scanner while I'm sitting here at the computer so it's plugged into the outlet. If I want to use it in the car I'll use a car cable. I rarely carry any radio clipped to my belt.

-Price. Well of course price is a factor but I've already comitted to purchasing a trunk tracking scanner and the price difference between the Pro94 and the Pro92 is fortunately not that big a deal to me at this time.

-Brand loyalty. I realize that the Pro 94 is made by Uniden, the Pro-92 by GRE. I really dont care where the scanner comes from. I'm not buying an extended warantee or anything so being able to return the radio to my local Rat Shack isn't a point of convieniece for me.

Confusions: (I'm not sure about this stuff)

BC245/PRO94: At first I thought that the Pro-94 and the BC-245 were the same radio, in different clothing. But then I found out the following (which may or may not be accurate):

The 245 scans conventional and trunked comms at the same time while the Pro-94 does not.

The 245 has some problem with too few channels per trunk?

The BC245 has 300 channels while the Pro-94 has 1000.

Is there a newer version of the 245?

====What I want====

As I mentioned, my local Police Department moved to a trunked system and I'd really like to continue monitoring them. I don't know anything about trunked systems other than the basic concepts of why they exist and a rough idea of how they work. However I am a radio amateur and a student in Electrical Engineering so I guess I can probably pick up on this aspect of the hobby relatively quickly.
Initially, the police department was the only target I intended listening to, but as I gathered more information, I found that other local services were already using a trunked system along with their conventional frequencies. So, here are the things I am trying to keep in mind while deciding what to buy:

-What kind of trunking system am I on? That would be a good thing to know, wouldn't it? I think the PD that I am interested in is on an EDACS type system. (See below for more information on my local system) I'm assuming that all of these scanners work on an edacs system. Furthermore- it seems as if the problems with the Pro-92 trunking involve tracking Motorola type systems. True? From the information below, are the trunked systems close to me all Edacs, or could some be Motorola, or is there no way to tell from the information I've found?

-Data Skip. From what I've read, all Edacs systems have that annoying four beep signal after each transmission. I have observed this and also there is a buzzsaw sound that I hear from time to time (when I try to listen to the system on my conventional scanner). I hear that some systems have MDT or other data transmissions popping up from time to time as well as special 'scanner busting' signals (although it seems to me that this is probably just trunking data). You can see...

http://ourworld.compuserve.com/homepages/brennan/gwiz.htm

...for .wav files and more in-depth information about this. Anyway, the Pro-92 does not have a 'data skip' feature. Am I doomed to scaninng failure if I try to use a pro-92 and there are non-voice signals appearing on the trunk I want to monitor? From what I've found, the Pro-94 and BC245 DO have a data skip feature. Is it robust enough to really skip over unmodulated carriers, MDT and other data, etc?

-Computer cable/control: Wow, this is a tough one. I think that computer interfacing is very important, yet I have found the least amount of information on this aspect. It seems as if:
The 245 comes with a computer cable
The 94 has a port but the cable and software are $70 extra
The 92 has no computer control abilities?

Exactly what can be computer controlled is unclear. A lot of times a computer interface is offered and all it does is allow you to program channels into the scanner in an automated fashion. While still very useful, this is not real computer *control*. I found one message that refers to WinScan software, a $60 package, at:

http://mghusa.com/pozilla/wsabout.htm

where you can find software to computer-control the BC245...an important side effect is that you get ALPHA TAGGING (on the computer screen only, of course)! As I said, I do most of my scanning right here by the computer so this may be a decision tie-breaker for me. I also saw a message referring to "Canadian freeware" that does the same thing as the WinScan software. I dont know if this referred to the crippled demo version of WinScan.

As for the Pro-94, all I can find is that there is a computer cable and software available for an additional $70 or so.

It has been my experience that a lot of times these 'computer cables' are overpriced and easily built at home. A lot are just straight cables that run to the serial or parallel port. Evidence: my digital camera, Optoelectronics Xplorer, HP48 calculator, and many other 'toys' cluttering up my desk all use a 'plain' cable- no electronics, just wires. On the other hand, some cables have internal electronics- the computer cable for my TI-92 calculator has a bunch of (SMT) electronics, (although a homemade version is available) the programming cable for my Yaesu FT50 has internal electronics, (a homemade version is possible here also), and a cable for a cellular phone I own also has internal electronics. Someone even came up with a computer interface for most scanners that do not currently have one (ProGrammit- allows you to program channels by emulating keyboard presses). In all of these cases, there is a homemade version of the cable that you can build- and when there are elecronics inside the cable, it has been simply a level converter, which can be accomplished with one chip.

This begs the questions:
Are there homemade equivalents of the Pro-94 cable?
Will the utilities for the BC245 work with the Pro-94? Or are they too dissimilar?
Is there an interface hiding inside the Pro-92 that can be developed by a hobbyiest?
It seems odd that Uniden would go thru the trouble of creating two seperate but similar radios, one for themselves and one for Tandy. I've seen similar products like this before where a few internal jumper settings can change one product into another. For example, I have a caller ID box that can go from the cheapie $20 unit I baught to a $40 unit that has triple the memory slots just by removing a solder blob. Does anyone think that the Pro-94 and BC245 share a similar relationship?

-Channels
More is better, obviously. However, I will probably be using two scanners simultaneously at the beginning anyway, one for conventional systems and the new one for TT. So if there is one TT scanner out of the bunch that seems perfect but it does not have a lot of channels, I will probably just end up dedicating it to TT and keeping an older one for conventional frequencies. How do the TT scanners store trunked channels anyway? Does each frequency take up a channel or does each 'talkgroup' take up a channel or what?

-Attenuator
I have never had a radio with an attenuator. I use a discone antenna in my attic (not on the roof) and I am near paging transmitters as well as a NOAA weather transmitter. I hear the NOAA announcer all the time, on many different frequencies. I wonder if an attenuator would help me and if it's important to be able to have it set for each channel or "all or nothing".

-The Delay "issue"
People have complained about the 5 second delay of the BC245 and Pro94. I read one posting that said that the delay is necesary because the scanner needs to listen to the data channel for this long (to do what?). Im not sure when this delay occurs and how annoying it is. It seems that the Pro-92's method of trunktracking is different and does not involve a delay of this type, however this method also misses a lot of replies... Can anyone clear this up once and for all or point me to a website that clearly explains the issue?

======Conclusions===============
So, you ask- what do I want to know? Well, I'd like your thoughts on which scanner you think would best serve my needs and why, and:

-Will the Pro-92's problems be a non-issue for me because I am scanning Ericsson and not Motorola trunks?

-Will the lack of a Data Skip cause me problems?

-Will RadioShack release a fixed version of the Pro-92 and make whatever I purchase obsolete? (Rhetorical question!)

If there are any other scanners that I should consider (TT capable of scanning edacs systems only, handhelds preferred but bases are acceptable if they are not just 'base' versions of an existing handheld radio) please feel free to mention them.

Thank you for taking the time to read this message. I look forward to receiving replies from the many knowledgeable users in this newsgroup.

======INFO===
Here is the information about my local system. Please see:

http://www.nf2g.com/scannist/nys_ege.html#Kingston

The system I want to listen to is lableled "NYCOMCO" but I'm sure I'll eventually want to listen to the Kingston system as well. Can you tell from looking at this chart what kind of system this is?

http://community-1.webtv.net/rks-57/UlsterAndOrange/page2.html

This guy really helped me out. His page shows the specific tower that I want to scan, he says the police department I want is on the Poughkeepsie tower and he gives me their "Talk Group ID". Can I scan just this ID and listen only to transmissions from this police department?

Subject: List of the rec.radio newsgroups
Followup-To: poster
Approved: news-answers-request@mit.edu,rec.radio.info-moderator@primenet.com
Distribution: world
Expires: 01 January 2000
Summary: This article provides a list of the rec.radio newsgroups; it is
posted alternately with the longer "Guide to the Rec.radio NGs"
Keywords: radio amateur ham cb scanner shortwave netiquette
X-Last-Updated: 1998/03/29
Version: 1.1 created 98/03/05 03:50:23
Posting-Frequency: Posted on the 1st of each month

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local

restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

I have a better Biblical quote, Lloyd, written just for you:

"Cursed is the ground because of you; in toil you shall eat of it
all the days of your life. Both thorns and thistles it shall grow
for you; and you shall eat the plants of the field; by the sweat
of your face you shall eat bread, till you return to the ground,
because from it you were taken; for you are dust, and to dust you
shall return." (Genesis 3-19)

Happy new year,
Jeff KH6O/6

6200. Re: An intelligent(?) set of questions about Pro-92,Pro-94, BC245, and trunktracking

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-29 00:00:00 UTC
From: Omega Management <subrosa@digital-m.com>
Message-ID: <2Fna4.1$x5.1498@news.aloha.net>
Source record: 124201
Cross-posted to: rec.radio.scanner,rec.radio.amateur.misc,alt.radio.scanner,rec.radio.amateur.equipment

I have purchased a Pro-94 a couple of days ago. I think its a decent radio for the price.

However, after using it for the past couple of days, it seems to me that the Audio Electronics of this radio isn't that good, but rather poor compared to other scanners I have. And the data skip feature doesn't seem to work very well.

I think the best thing about this scanner is its ability to track different types of Motorola Systems as well as EDACS, provided they are running in analog mode.

I hope this info is of some help in your decision.

Steve

I had the 92.... GREAT conventional radio, SORRY trunk tracker, so I returned it and picked up the 94. The 94 was *nice*, but I found it was not quite as sensitive as my old 235. It also seem to have major problems rejecting intermod, so back it went. I then got the 245 and WinScan with the extra money from the original 92. I'm happy now; great sensitivity, great intermod rejection, and computer control capability. Its only down side is the 300 channels compared to the 1000 channel (actually 2 *independent* banks of 500) 94; BUT, with the computer control, different channel configurations can be exchanged in *seconds*. Just my experience.

This message was posted anonymously:

Be a good boy, Dimmy, because you are being watched.

We had your Eskimo account terminated in early December for issuing
rogue cancels. You then turned to a BellSouth account you had and
continued to issue cancels from there.

It took a little longer (BellSouth moves slowly), but now you've been
warned by BellSouth not to do anything more or else you'll lose that
account too.

Wise up and behave during 2000, and you'll lose no more ISPs.

Your internet pal,
Secret Squirrel

Oh, Adolf....how you love to distort the truth and mislead people! (just like your hero back in 1940's Germany) For everyone else's benefit....a little of the real story.

There are a few so-called "scanner hobbyists" who buld bugs (the kind that let you spy on conversations) and devices to interceot otherwidse lawfully and wisely encyrpted law enforcement communications. These devices are well advertised in a few low budget "hobbyist type" magazines and so the feds know just where to look for such vendors.

Of course, these neer-do-wells cry "police state" when they get caught with their hand in the cookie jar. And ignorants like Lloyd Davies believe them (so what else is new, right?)

Anybody have the heart (or the stomach) to inform Lloyd that the Old Testament was written by his enemies, The Jews?

OK, I'll tell him....(Psst! Lloyd Jesus was Jewish and the Old Testament is also)
Just thought I would let you know

I don't want to or need to qrm these frequencies. You see Polly, if you stay on these frequencies and have your daily mind numbing qso's I know the extra and advanced class subbands where I operate will always be free from general class operators with behavior problems like you.
I know it seems so long ago before the FCC started their agresssive enforcement efforts, but can't you remember in that senile brain of yours all the good times you had playing music and jaming 3901, 3898 and 14300, you shouldn,t throw stones if you live in a paper house, but then again what do you expect for $130,000.

This senile old fart want's to call someone an newbie, LOL. Hey grandpa, you only need to hit the enter key once to post your message. I think your brain is starting to ferment becuase this is about the fourth time you've double posted a message because you couldn't remember that you did it already or you've left out text and had to fix it and are too much of a newbie to know how to cancel a post. Your ability to use proper spelling and grammer is also starting to go.

George, you better make an appoinment with you doctor, it appears that you may have developed a condition that is limiting your ability to clearly communicate.

73 de AB4D.

6213. Re: An intelligent(?) set of questions about Pro-92,Pro-94, BC245, and trunktracking

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-29 00:00:00 UTC
From: "Rich Carlson, N9JIG" <n9jig@theramp.net>
Message-ID: <n9jig-C682A9.10542229121999@news.theramp.net>
Source record: 124214
Cross-posted to: rec.radio.scanner,rec.radio.amateur.misc,alt.radio.scanner,rec.radio.amateur.equipment

From what I have read the Pro-94 was a bunch of great features built on a radio that just did not work very well for trunking.

The 245 was the first of the second generation of TrunkTrackers to appear (as was the 235 was the first of the first generation) and set the standards. While it has some blemishes, it came out of the gate fast and most people really liked it.

When the 92 came out it appeared that the trunking mode was some sort of afterthought and it just didn't work as well.

The 94 seems to be a Radio Shack "Pro-2026" style clone ("Take the good Uniden features out, insert the bad Radio Shack features" as I wrote in a review of the 2026 a few years ago).

Radio Shack seemed to really set the standards for scanners when they came up with a bunch of good GRE radios including the 2004/5/6 and the Pro43, but the Uniden clones are a more expensive lobotimized version usually. The Pro90 is the exception, it was the same radio with only a single battery pack.

I have a 245, and I love it. I have also used a couple computer driven solutions to EDACS and Moto trunking. I played briefly with a 94 and a 92. If the 92's trunling was as nicely implemented as the 245's I may have bought one. But I need accurate talkgroup ID's.

Hello All.
I am looking to find others who may be using Fiber Optics for some purpose in Ham Radio. I would like to use fiber rather that copper/etc to control and communicate with remote eq. My main interest is to find info on muxing audio and sending it via fiber to the remote site (200-300 ft from the house), any info would be appreciated.

Thanks..Mike..KA1IFQ

Message-id: <Acea4.2858$lz3.25886@news3.mia>

READ THIS:

The Anti-Demonization League has designated December 30, 1999 as a day of prayer and fasting concerning the matters of this report. Frankly, the situation is not unlike that described in the Bible's book of Esther. There, we read the plans made by conspirators in high places, backfired on them through the prayers and fasting of God's people.
"...And My people who are called by My name humble themselves and pray and seek My face and turn from their wicked ways, then I will hear from heaven, will forgive their sin, and will heal their land." (II Chronicles 7:14)
"But if you will truly obey his voice and do all that I say, then I will be an enemy to your enemies and an adversary to your adversaries. " (Exodus 23 :22)
"I call upon the Lord, who is worthy to be praised, and I am saved from my enemies. " (Psalm 18:3)
"Blessed be the Lord God of Israel, for He has visited us and accomplished redemption for His people...Salvation from our enemies and from the hand of all who hate us. " (Luke 1:68, 71)
December 30, 1999 has been chosen so Christian people can eat on December 31, 1999 and celebrate New Year's Eve and the next millennium with praise and thanksgiving, knowing their prayers have been answered.
"Surely there is a future..." (Proverbs 23:18)
"Do not fret yourself because of evildoers or be envious of the wicked. For there will be no future for the evil man; the lamp of the wicked will be put out." (Proverbs 24:19,20)

COMMENTS:

WE CAN CLAIM THE NEXT MILLENNIUM FOR CHRIST!

It is quite odd, this mentality that it's a terrible thing for ordinary folks to possess miniature cameras, handguns, little FM transmitters, and communications scanners -- but that it's perfectly alright for the secret police to possess such things, and 10,000 times more, and use them against us.

With every good wish,

The League does not, and IMHO, should not, have any direct enforcement authority. That is a role that should rest with the FCC (or equivalent).

See http://www.arrl.org/field/org/am_aux.html for info on how ARRL does work to try to resolve amateur-amateur interference problems.

Because the e-mails are coming in non-stop about my CLOUDWARMER and because there are so many new hams out there who are not technically inclined, I have decided until March 1st, to "take the show on the road." That's right-AF2Y is coming to a town near you so get those tickets early. Traditionally January and February are my slow months therefore I will be available for house calls to erect CLOUDWARMERS throughout the U.S.A. and Canada only. I will not be able to go overseas as my passport has expired and I cannot find any photographer who'll take a new photo. They laugh too hard and none come out worth a damn. My fee for stateside and Canadian erections will be $500 not including FIRST CLASS AIR FARE plus ROOM and BOARD. Due to my abhorrence of cold weather and snow, I am not interested in any assignments in the midwest, the Plains States ,the Rocky Mountain states as well as New England. Assignments in southern California, southern Nevada, Arizona, New Mexico, Texas and Florida will be met with a generous six dollar discount. However if a basic fee of $1000 is met, I shall be more than happy to accomplish CLOUDWARMER erections in the aformentioned blacklisted states because money talks while bullsnot walks. I insist upon being met personally in airports and will not rent an automobile. After each erection I expect to be driven back to the airport and treated to either lunch or dinner before boarding. I will not take any early morning flights. I am now accepting bookings which will end on January 10th. After that date, anyone who has not booked me and still wants CLOUDWARMER info will have to pay for it which will not apply to a ham living outside the U.S. and Canada. The charge for a copy and paste will be $99.95 and VISA and MC will be accepted. The procedure will be to e-mail me and leave your full name, address including zip, phone number, credit card digits and expiration date. After receiving authorization, the info will be transmitted back. Anyone wanting the info in print, the charge will be $119.95. Thank you for your time and UP YOUR CLOUDWARMERS!

Where can I find some factual information on exactly what this "data slicer" device is/was? It sounds like it might just be a TDM demux.

I have a real problem when equipment vendors sell their systems to agencies/consumers as "secure" when they're not actually doing useful encryption, but instead convince governments to take rights away from citizens such as the ability to tune a receiver to portions of the spectrum. This has always smelled funny to me.

I will agree that the 2600 article is sensationalistic and alarmist, but I do think it warrants some investigation.

So he says.

But W9ART lies, intentionally interferes, spews profanity, and makes up the grossest and filthiest false accusations against others that can possibly be imagined. So his credibility is seriously in doubt.

Furthermore, if by "racist" you mean someone who hates another for racial reasons, there is no reason why a person who is interracially attached couldn't be one. He might hate members of his own race, for only one of many possible examples.

With happy Y2K wishes,

>

The Current Uniden BC-245XLT's have a BAD firmware "bug" in them.
This is not really a "bug", but word has it that Uniden included
the wrong version of F/W in the first production run and the
bug was "fixed" before production started, but by some mixup
the older (with bug) F/W get sent to mass production.

When scanning both Trunked [MOTO] and conventional system systems
or multiple trunk systems, there is a 5 second delay at least,
maybe more... The current trunk must go complete IDLE for 5 seconds,
and the 245 will take one swing through all the other conventional
freqs (or goto another trunk). WHen on a trunk again, it must
stay for 5 sec of IDLE time before it even looks for conventional
for the 2nd time, etc..

If you have pretty busy trunk system, your BC-245 is pretty much
a BC-235, since 99% of the non-trunk traffic will be skipped.
Rumor has it, that Uniden will make some sort of announcement of
this "trunk delay" bug in Feb '00.

FEDS RAID ELECTRONIC HOBBY VENDORS
12/18/99
2600 has learned that several small electronic hobbyist vendors were recently raided by federal agents brandishing semiautomatic weapons. News of these raids has been kept out of the media and many of those involved fear retribution if they openly discuss the case. Until now, these companies had operated for years selling harmless educational electronic kits (like wireless microphones) to students, hobbyists, ham radio operators, and hackers. Now their inventories are being seized at gunpoint--and their owners could be facing bankruptcy and prison time.
The U.S. Dept. of Justice is apparently re-interpreting federal wiretapping and smuggling laws to include small hobby radio transmitters. Even possessing so-called "Mr. Microphone" type toys can now put hobbyists at risk of looking down the barrel of a federal agent's loaded gun, a felony conviction, federal prison time, loss of property, and legal fees into the tens of thousands of dollars.
Ramsey Electronics and Super Circuits are just two of the companies recently raided at gunpoint. Both have good and longstanding reputations for selling inexpensive, quality educational kits and components to electronics hobbyists for many years through ads in electronic hobby magazines and their websites.
A high-ranking Justice Dept. official told one of the business owners the orders for these raids are politically motivated and originated from a very high level in the Clinton administration as a result of the Linda Tripp
wiretapping case. "They just need convictions," the official said.
Earlier this year the Justice Dept. indicted Bill Cheek, the well-known and loved author of books on radio scanner modifications and Monitoring Times column writer. Bill was selling very simple "data-slicer" circuits (made from parts available at any Radio Shack) that could be used with a PC and a scanner to monitor radio data transmissions--including unencrypted

police mobile data terminal (MDT) transmissions. Even after Bill had been diagnosed with terminal cancer, the Federal government refused to back off, even issuing a summons to court on the same day he was to begin chemotherapy. In 1995 2600's BernieS was locked up in five different maximum-security prisons over 14 months by the Secret Service for possessing his laptop computer, his software, and ordinary electronic parts available at Radio Shack. He had been distributing parts, software, books, and pamphlets about cellular and coin telephones. The Justice Department's final investigation report stated "There were no victims in the offense." This is a clear pattern of harassment and abuse of power by our Federal government against people teaching others about electronic communications. It appears our government doesn't want people to know this information. 2600 strongly feels this knowledge is important for people to have, and will continue spreading it at every opportunity. Write and call your legislators to complain about this injustice. You could be next!

You have said you are not a grave dancer, here you are dancing up a storm over the death of two people, just like you did about Toms KE9RYs late daughter. No wonder for all your lies he still hates you with a passion. You have no shame . a vile disgusting person, grave dancing just because a lazy persom won't take the time to learn the code for shame on you Dr Hate, AF2Y.

It is with great pride that we announce the winner of the "HAM OF THE YEAR" award that the Mighty Stumpjunpers give at the end of each year. TA DAH...Bob Youngblood KT4TR has been announced as the "Ham Radio Operator Of The Year 1999" by the Might Stump Jumpers!!

Bob won this award for being instrumental in removing qrm from the twenty meter band with his investigative reporting, and for his work for the betterment of the community he lives in. and his flawless radio operation practices. All this plus he works full time operating a orange grove in the Indian River section of the state of Florida.

Our hat is off to you Bob Youngblood "Ham Of The Year"!! It is with great pleasure that we the Mighty Stump Jumper radio group name you the "Ham Radio Operator Of The Year 1999"!!

Gitback, Award committee chairman for Stump Jumpers

All you Mighty Stump Jumpers!!

My hat is off to you for awarding Bob Youngblood the "HAM OF THE YEAR" award. If ever there was a deserving candidate, Mr Youngblood is one. We can go into the year 2000 with our "HAM OF THE YEAR" Bob Youngblood as an example to follow.

Thank You

It is with great pride that we announce the winner of the "HAM OF THE YEAR" award that the Mighty Stumpjunpers give at the end of each year. TA DAH...Bob Youngblood KT4TR has been announced as the "Ham Radio Operator Of The Year 1999" by the Might Stump Jumpers!!

Bob won this award for being instrumental in removing qrm from the twenty meter band with his investigative reporting, and for his work for the betterment of the community he lives in. and his flawless radio operation practices. All this plus he works full time operating a orange grove in the Indian River section of the state of Florida.

Our hat is off to you Bob Youngblood "Ham Of The Year"!! It is with great pleasure that we the Mighty Stump Jumper radio group name you the "Ham Radio Operator Of The Year 1999"!!

Gitback, Award committee chairman for Stump Jumpers

<<The award is as meaningless as the person bestowing it, Polly,W4FQF from Pishersville, Tenn. The award should go to K4ZDH for stoppping the Vero Zero from reading classified info on ham radio for which, I do believe, he got hit with a 2.5K fine. The ham of the year should be Tom McMillan, WB3HGW, who bounced back from incredible negative odds, to take his place once again as a radio great. This paraplegic is a role model to us all who contemplate our own navels; who feel sorry for ourselves and run to the doctor for an itch or a headache. WB3HGW is a shining example of the indomitable spirit of one who refuses to surrender to physical hardship. It's true that I am much more educated than Tom and probabaly a lot wealthier too but nonethelss in constitution, drive, perseverance and determination, I can;t hold a candle to him. God bless you Mr.McMillan and have a great 2000.
Your friend and admirer,
AF2Y

Anyone know if no-code Tech will exist with the new restructuring? It sounds like only three classes, Tech, General, and Extra with 5 wpm. So are they reinstating the 5 wpm for Technician?

I don't see ads for 3D photography in computer magazines or in the WSJ
either but perruse E-bay and you'll find all sorts of equipment for sale
even though most of the models being sold have not been made for 25 years or
more. Amazing how the hobby has survived without ads in the Financial Times.

> As long as ARRL staff promote good operating through mega watt ERP
> contest stations that ruin the bands nearly every weekend of the year,
> (when most hams are home from work) and foreign societies follow suit,
> the population will shrink.

They just added a QRP column and you bad mouthed it. What gives?
Additionally, if the bands are packed with activity during QSO partys and
other contests what does that tell you about the popularity of such activity
amoung the amateur community?
Since there is clearly alot of activity during such events should the
majority stop doing it because you don't care for it? Many European stations
only operate during contests, just listen to the number of stations during
CQ WW vs other times when band conditions are better or the same.

> As long as ARRL staff create 3 or 4 unpopulated, dangerous, uninhabited
> "countries" a year, the bands will shrink as the casual operator loses
> interest at the prospects of a 10,000 dollar antenna investment and
> hundreds for QSL postage.

On the other hand one of the fastest growing groups in amateur radio today
is QRP operation. Look at the number of kit mfgs that have sprung up in the
last 5 years along with other kit mfgs of freq counters, keyers etc. NorCal
offered a 30m tranceiver for $25. Most QRP operation is very casual and very
inexpensive.

> It'll die someday, but not because of the delusions that ARRL staff have
> fed you people, with their night school MBAs and associates degrees.

What would you do to improve the situation?

This (somewhat well known) Amateur says it's good the FCC is
finally going to retire CW as it should have YEARS ago.
What should happen now is all question pools should be changed
and non-published - PERIOD. I'm ALL FOR the elimination of
ALL CODE REQUIRMENTS for a ham licence ***ONLY*** if the question
pools are then changed and non-published.

True! FCC and ARRL should have dropped CODE *YEARS* ago.
Keeping code is what KILLED ham radio.

> I blame the ARRL,NCI,FCC,CB,Catman,and all the hams that are too
>lazy,too stupid,or think the average person is too lazy or stupid.

Why?? because they feel it USELESS to learn an OUTMODED MODE of
communication called Code..? I know EE's with Masters and 2 PHD's
who could padd an Extra exam with no technical study and a light
review of the rules & regs. Know why they do not have a ham ticket?
Because ARRL wanted to keep the freakin code for soooo long. Now we
have
Internet and all in all, the ARRL is probably 5 dollars short and 2
weeks
late - as usual. I APPLAUD the FCC anouncement, but I am afraid
it's too little too late in the long run. Kids want Internet, not a
radio
to string up unsightly antennad and talk wioth old gassbags on HF.

The idea of selling electronic kits of any type-
with a very few exceptions not included here-
being illegal falls under the concept of "prior restraint,"
which has been forbidden all the way to the Supreme Court.
The actual misuse of the items is illegal- not owning them.
Unfortunately, it appears the feds are more concerned with
political expedience then actual justice.

Nothing against Mr. Ramsey personally, and I wish him and his business the best; I recall reading, fascinated, their advertising in electronics and hobby magazines as far back as I care to remember. I feel badly that his honest business was interrupted by our "paid thugs." However, some of my sympathy hardened a little while browsing his website in the wake of this discussion. I saw there a broadcast FM band J-pole, all 10' of PVC pipe and twinlead (maybe), for $40. Not that this should be construed to be indicative of his products, person, or business... Business is business, and feds are feds. America; love it or leave it. (Tongue in cheek, of course. ;-)

Michael.

There are a lot of extra callsigns to go at least in the 2x2 format and
we still can do in the somewhat useless area codes or add another digit
to them and since the extra and tech are only a few simple questions and
5 wpm apart..so what??

BTW..the FCC seldom comes up with ANYTHING on their own..they respond to
requests from people. I have submitted several requests for changes to
the rules and have received considerable consideration and response from
the FCC. This restructuring was a direct result of the ARRL submission
and the numerous comments surrounding the proposed action. The FCC
didn't just think it up. So if you want something changed, don't tell
me, tell them. There is an established procedure for submittal, but it
is easily accomplished.

Are you implying there may be something "evil" in a J-pole antenna or just
that it might be overpriced?

I agree, the letters should be ARKL for the American Radio Kickback League.
They sold us out by giving away the 220 band to UPS, and I'm sure some people
in Newington lined their pockets after that one, now this. More back room
deals and payoffs!

I for one will NEVER patronize the ARRL a.k.a. ARKL! Boycott NOW!

What isn't so GREAT, Bill, is your Usenet etiquette (sp?). By adding only one line of new content to a 100-or-so-line quote, you're not only wasting bandwidth and disk space on the new servers that carry these groups, you're also wasting peoples time while they wait for the entire thing to download.

Please learn to trim your quotes.

Thanks.

Why blame the ARRL? I'm not a member, but it seems to me that the FCC took the restructuring one step further than the ARRL wanted.
Didn't the ARRL want 12WPM for Advanced and Extra and 5WPM for General??
How about four classes instead of three?

A lot of you ol'timers out there think that CW=CB with respect to this new license structure. IMHO, you're wrong! HF has a serious learning curve when it comes to long wires, tuners, grounding, etc... It's not like you plug in the mag mount to the HT and start yacking!

I worked really hard to pass the 5WPM code last month and I have been working a little 10M here and there. After stringing the longwire, tuning the MFJ941, the DSP-9+ and figuring out the Icom 706, HF is a lot of hard work! It's so rewarding to make a distant contact after all that...Don't forget the price of HF gear. You can buy several HTs for what a run-of-the-mill HF radio costs. You really have to want to get on HF. With the learning curve and the cost, I don't think it's going to be as bad as some of you think.

Oh well, bring on the Extra!

73 and Happy New Year!

Dan / N7WPD

David:

Thank you for posting the alert as to what happened to Ramsey Electronics.

I am a retired Army colonel and my politics are somewhat to the left; I am a yellow-dog Democrat and voted for Bill Clinton twice. I favor serious gun control. BUT, this is beyond good sense. I now think that the guys who are telling me that I should be afraid of my own government may have a point.

I recommend that folks go to this URL and read a description of what happened: http://208.46.148.11/cyberskip.htm

Here is the problem: This has set a precedent. Yes, terrorists or other evil doers could use Ramsey kits to do bad things. But, the vast majority of folks buying those kits are electronic hobbyists who do nothing more than eavesdrop on their big sister and her boyfriend. The cops should be concentrating on catching lawbreakers who have broken the law, not sweeping up every possible item that could, maybe, possibly be used by a criminal.

Case in point: I have an acquaintance who is an Alabama state police commo tech. He told me once that they are forever seizing 2-meter handhelds that crooks are modifying to transmit outside the ham bands and using for short range commo. How about we just swoop down on AES and HRO and seize all their handhelds -- after all, don't want any criminals buying one. The same goes for HF rigs. I spent 25 years in intelligence work and I can tell you that international terrorists and drug runners use amateur gear for long-haul commo. Let's just shut down Ten-Tec, ICOM, Kenwood, Yaesu, Collins, the whole works.

Think it can't happen? Think it will not happen? What would you have said ten years ago if I had told you that the feds would sue the cigarette companies and win a multi-billion dollar settlement?

This weekend I will compose a letter to my Congressional delegation, citing this outrage, and asking that they get a rope around Janet Reno and her associates. I will post that letter to this NG and anyone who wishes may use my letter as a model for writing their own.

Looks like whineing,crying and slothfullness do pay off,I was wrong
when I made statements about amateur radio not dying,it surely will now.
I blame the ARRL,NCI,FCC,CB,Catman,and all the hams that are too
lazy,too stupid,or think the average person is too lazy or stupid.

David,
Just to let you know, I understand what you are are saying in your posting.
I had a Pro-2006 that I sold years ago. Recently I tried to buy another
Pro-2006 because I made a mistake in selling mine and the Candian seller was
fearful of being prosocute by their/and our goverments because the enacted
laws are so bad that any interpetation is going to put Joe Public at risk of
doing more time in prison than a violent offender will ever do!!

Blame the ARRL ? For what?

Stay sensible, OM: The rules are made by the FCC.

1. How can you blame the ARRL when the FCC went way beyond the ARRL
position?

2. So now we have it. This means that folks who give a damn about this
hobby will do whatever we can to ensure that the written test is meaningful
and is administered honestly.

3. This also means that those of us who use CW are free to use CW just as
before and those who don't will be required to pass a very minimal CW exam
to get in the door.

I think it's a good structure. Perfect? No, but would someone please
describe a perfect structure?

So kiwtchurbitchin and make it work.

Of course, there are those who would rather sit at a computer keyboard and
piss and moan rather than get on the air and enjoy the hobby. I'm off for
40 CW.

Hf is a piece of cake if you do a little research,a resonant antenna
or an autotuner would help,the Icom 706 is a good rig but menu driven
radios do have a learning curve that other rigs just as good and better
don't have,and they call this a MOBILE rig? I want something I never
have to look at and can operate by feel,thats what I use to operate HF
mobile 5 hours a day 6 days a week.Your 706 was expensive but the Alinco
DX70 is only slightly different and in some ways better for as little as
$599.

After talking to Rick, what I can't get over is the fact that AF2Y can have such a classy son. I guess he has disproven the theory that the apple can't fall far from the tree. Thanks goodness for little things; the genes stopped in Clifton!! Maybe it should be thank goodness for Iris!!

By the way instead of wiring his Rabbi, I'd suggest that af2Y send a wire right up his ass where he will never have hemorrhoids-- he is the perfect ass hole.

Af2Y is just like OTK and the antisemites with the beany and nose comments. When someone is weak and stupid they attack at the family or religion level. But then again Af2Y is just about at a 16 month old's intelligence level.

And yes I certainly can understand his not understanding K2IVX.
Af2Y would'nt know decent values if they hit him in the head.

Best wishes for a happy and healthy new year to Af2y's family and the rest of you reading this message.

Thunk again, Kelly. 5wpm gets you into the prime DX zone where "the big kids who play 'way down the bands where the no-clue weenies still aren't allowed to screw up the
playground." Take a deep breath then remember that you don't own ham radio.

No need to refarm the Novice CW subbands when the Novices can take a few written exams and practice 5 wpm CW with JD1 on 14.007.

73, Brian

Nobody has gotten any free upgrades, Jeff. With every commercial and military service abandoning CW like rats from the Titanic, there are no longer any valid arguments behind forcing hams to learn to communicate in a mode that, soon enough, no civil or military authorities will be able to read.

Expect the ITU requirement to go away altogether at the next WARC conference.

As far as CW as a legal requirement goes, stick a fork in it. It's done. Except, that is, as a perfectly legitimate and enjoyable hobby for those with the time and inclination to pursue it!

Law? What law. There is a heap of difference between law and non-statutory whimsy.

As long as we see this attitude prevail, there will be no end to the freedom given up for some pseudo security.

Can you say Hegalian Principle?? (And yes my spelling is probably wrong, but my understanding of the perils of this type of thinking is not). Attack me on the perepherial
issues, but you won't touch the essence of the point that is being made here.

Joe,

Thank you for your integrity. Although our political views may differ, I applaud you for demonstrating the ability to reason and accept when the facts are before you. This is what made, and will ultiomately keep our nation great in the eyes of the world.

I became involved in exposing these types of incidents when trying to ridicule someone pointing them out to me. The harder I tried to humiliate them, the more I humiliated myself with the facts. I wish I had displayed the moxy that you have in your replies since your original post in reply to David Stinson's topic that started this thread.

My hat is off .....

The requirement for 5 wpm is only for the general class license and above.
you can still get
you Ham license by passing the written portion only. You license will the
Technician class.
then when you take the 5 wpm and the new part 3 exam then you will get your
general license.

So what is the problem. Those who never cared about cw can still go on and
careless about it. and those who do
can still have the privilege.

Thank god for the internet otherwise all of this language and strong words
would be lost. it is apparent that
some of the members commenting and are not true hams in nature.

all those who do not care for words. good keep you foul language and
attitude to your self.

Hey, there's RTTY on HF so I think *all* hams should have to pass a
60 wpm typing test to get on HF.

What we really need is a written test that includes:
1) FCC rules and regs.
2) Accepted operating proceedures and practices.
3) General electronic theory including how and why *not* to overdrive
a transmitter.

Hihihi isn't Dick funny? And why shouldn't it? As if the JA's have the worlds highest standards in amateur radio licensing! The JD1 you work just might be a slow or no coder.

OR you eyes rolled back CW Forever types could have refarmed the Novices in with the General CW subbands in 1987 Novice Enhancement, this whole exercise might not have been necessary. You did it to yourselves. Enjoy.

> many years.

Personally, this pre-87 tech+ has never given a rat's *ss about the
necrotic transmissions of today's HF gasbags. I'm staying where my
interests lie: VHF, UHF, and above. But you know, some of these despised
no-code techs have actually learned to be good operators. After a bit of
orientation, they might just increase the quality of what goes on at HF.

>

I don't blame you "Gotcha". Why jumpstart those two morons and permit them to to gain prestige via your program. They are "Wannabes" who are never legal on any amateur radio frequency with their ac hum, whistling, tape playing, and gas passing. Good move. I congratulate you on it. and by the by, keep up the good job you are doing here promoting the "Fan Club"

Are you dreaming? Chances are, WA9KJI will grab 3950 very early and monologue about how terrible the Liberty Net is until sunup on January 1st. If not, then W9ART and Doofus are sure to be on 3950 to jam
any attempt at starting the Liberty Net.

Do you REALLY think that these folks, tanked up on adult beverages, will be able to resist jamming the Liberty Net???

E-Bay has had a long standing policy of not accepting ANY scanner equipment, based on some bad legal advice that they got years ago. Thus far, NO ONE has been able to convionce them that their are wrong and lots of people have tried with tons of legal documentation. They got scared off once on scanners and they aint-a-goin-back.

His remark came via email by using the address info-hams@ucsd.edu, not through posting to usenet. He wants to know how to subscribe to and receive the rec.radio newsgroups by email. Keep reading:

>John Savarese wrote:
>> would like to subscribe ham radio and related subjects

John: You can receive an email subscription to almost all the rec.radio newsgroups. To receive rec.radio.amateur.misc by email, send an email to listserv@ucsd.edu and only write:
subscribe info-hams
and you'll be hooked up. You'll receive one LONG email each day containing all the day's articles.

To subscribe to and receive the other amateur newsgroups, issue one or more of the following commands (use the same listserv address):

subscribe ham-policy
subscribe ham-boatanchors
subscribe ham-antennas
subscribe ham-homebrew

It would be best to just issue the command help to see all the newsgroups you can get by email.

Hello
I am a new ham radio operator just having received my general class license.Can someone tell me what the procedure is for getting into a conversation. It seems that when I am tuning the bands on 40 meters and 20 meters everyone is already engaged in qsos. I dont know how to properly check into a net or do they frown on newcomers. I keep listening and calling cq but no one responds. Am I doing something wrong. Also what frequencies do u stay clear of on 40 and 20 for calling cq I know there is a dx net on 14.247 in the afternoon and I should not call cq on there or I will get my head handed to me. I would appreciate some guidance on how to get started the hf bands.

Many thanks
Jane

Thank you for posting the Ramsey e-mail. I am suspicious of claims about "armed federal agents" but this is outrageous. I don't know what can be done but I intend to write my Congressional reps and senators today.

I certainly understand the concern about electronic devices being used for something other than their intended purpose. Hell, a ham friend of mine a commo chief for Alabama state police and they confiscate Icom, Kenwood, Alinco, Yaesu handhelds from drug runners all the time. Guess folks who sell handhelds are next??

It is obvious that the Dept of Justice does not understand that the bad guys will get this stuff anyway and that they need to concentrate on the bad guys, not on people selling honest stuff honestly.

What a coincidence, the New Testament was written buy Jews also (with the exception of Luke). Guess what, Paul's Hebrew name was Saul, Acts 13:9.

JJ, hiding behind a cowardly anonymous CB handle, drooled:

> you need to calm down and recount your ammo or go outside and watch for
> those black helicopters. Watch out for any black cars driving down the
> street it may be some CIA agent spying on you.

I don't need to be paranoid. The feds aren't hiding anything.
They know Americans are generally collaborators and cowards who
will allow anything to happen as long as their bellies are full.
Karl Marx got that part right. As long as their belly
is full (and their TV works- more important then
food for Americans) you can do anything you want to
these people and they will ignore it.

6359. eBay inconsistencies: full 800Mhz scanners taboo, but illegal FRS radios and CB linears are OK

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-30 00:00:00 UTC
From: rfenforcer@aol.com
Message-ID: <19991230121400.15829.00000012@nso-ba.aol.com>
Source record: 124146

Just saw this on eBay:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=225319475

A GMRS handheld being marketed as an FRS radio with "twice the power" and "detatchable antenna."

Funny how eBay won't allow me to list my 1989 model, full-coverage scanner. They consider it a "prohibited item", even though no mention of "cellular" was made anywhere in the item description and it's sale is completely legal between private individuals.

Yet, they seem to have no problem with BLATANTLY ILLEGAL linear amplifiers being marketed in the "CB equipment" classification or 1-watt, detatchable antenna radios being marketed in the "Talkabout, FRS" category.

I smell a lawsuit brewing over this one.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

How will Amateur Radio modernize and grow? They eliminated a couple license classes and two code tests. Seems to me that not a whole lot changed. Unless you think that a whole bunch more people will now think that CW at 5 wpm is okay and worth learning for an upgrade to General? But that would go against everything that you have been saying, wouldn't it? Just my measley little .02

TNX! And Happy New Year to you!
Unfortunately, it looks like the restructuring is going to happen...
I'm GLAD I went ahead and passed my General, instead of getting it
handed to me. I'm not too happy about being handed an Advanced class
license...I really wanted to take the test and pass it.

I guess this means I had better turn in my "Sound Feeder Wireless CD Player Adapter" that I use to transmit scanner audio to my sound system located across the room. Under the recent criteria used to crucify Ramsey Electronics, this would also be considered an an "illegal radio transmitter."

Come to think of it, I purchased this item from my neighborhood Wal-Mart. Call the Feds! Call the Feds! Jack-booted thugs with guns drawn will soon descend upon your local Wally World. You see, "Butch" Reno needs another high-profile target, now that she has succeeded in her government-sponsored extortion of Microsoft.

It will Carl to finally get to DX and contest and yack just like everyone
else.

Besides, can't be a MAJOR victory, just a minor one

No-Code International TM is a organization dedicated to the abolition of
the Morse code testing requirement as a prerequisite for any class of
Amateur Radio license. NCI TM will continue as a lobbying organization as
long as the manual telegraphy testing requirement exists.

That's like claiming the Germans won WWII on the basis of the Battle of
the Bulge.

Hanging the 10 commandments in schools to
improve the morality of the students will have

the same effect Giddeon Bibles do in improving
the morality of the guests in the hotel room.

6371. DC plug for Kenwood TH-215 and 225

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-30 00:00:00 UTC
From: sjcduke@aol.com
Message-ID: <19991230143331.03675.00000031@ng-fh1.aol.com>
Source record: 124158

I have both of the above 2 meter HT's. I want to use an external source of DC. Kenwood wants $9-$10 for the little DC plug that is necessary. I need several of these plugs, and I am unwilling to spend so much money for something that should be more reasonably priced.

The outside diameter of the plug is 5.5 MM, and the inside diameter is 1.55 MM.

Is there a source for these plugs at a more normal price?

Anyone help me....or have any ideas?

Thank you.....Lee KA0FPJ

It's a major victory for those who do NOT wish good health
to the ARS.
I'll wait until reading the entire text before I decide just
how much damage has been done. I see it as substantial,
perhaps in the long term, fatal.
Surely a lot of no-coders will now want to learn code to
5wpm just to get that out of the way. Of course, many can
find some *nocoder who is now also a VE* to cuddle up
to....we've already seen some of that with the code waivers.
The practice is sure to spread exponentially.

There will be rejoicing above 27 MHZ. *THEY* are the group
who have truly won and have been waiting for this day for
many years.

Clearly it's a decision conforming exactly to the most
rigid strictures of the Politically Correct Administration
now in power, who appointed ALL of the commissioners. More
to add to his legacy of damage to the Republic.

Amateur Radio, RIP. Alas, we hardly knew ye. And the
no-coders barely did at all.....

Prediction... Within five to ten years most of our
UHF/microwave allocations will be gone, with much VHF to
follow, reassigned to commercial interests, including that
most historically greedy grabber of all, AT&T/Lucent. Hmmmm,
wonder who works for them?

Bonus time, Carl???

But just wait till the 5wpm Extras decide they want to play
digital below 025. Hey, that old CW stuff is ancient and
worthless anyway, so why not???

Time to abandon QRP in favor of full bore QRO.

Of course if the frequency was occupied the net should have moved elsewhere, although if the intention of the two stations was to specifically hold up that freq, with the intent to somehow cause problems for the net, then shame on them. Although my impression from the few times I have listened to the Liberty net or any of it's regular check ins is that they have no shame.

Full HF access for 5 wpm is a MAJOR change and will provide incentive
for the technically inclined to get involved, participate, and contribute.

As I've stated on several occasions, I know of about a dozen folks that
I work with who would not become hams because of a ridiculous system
which relegated them to 2nd class citizen status unless they were willing
to submit to "hazing by Morse." I'm betting that I can convince at least
1/2 of them to jump through the hoop now that it's only 5 wpm high.

That will result in progress and modernization as more and more of the
technical experts who have shyed away from ham radio purely because
of high speed Morse requirements join our ranks.

> Unless you think that a whole bunch more people will now think that CW at
5
> wpm is okay and worth learning for an upgrade to General?
```

The people I'm talking about could pass the Extra theory on a bad morning with a severe hangover and a bad case of the flu ... but yes, I also believe that many NCTs will upgrade to General, become more involved, and learn more now that the unnecessary (and to many distasteful) barrier has been removed.

> But that would go
> against everything that you have been saying, wouldn't it?

Not at all ... the battle to completely eliminate Morse testing will continue.
Howver, this is a major victory in that campaign and is, I believe the best possible outcome NCI could have ever expected, given the ITU Treaty requirements of S25.5 of the ITU Radio Regulations.

Dick,

When there are no facts to support your case, just roll out some
more falacious inuendo, huh, Dick???

Please cite for me when, and at what frequencies, AT&T (which
I have NOTHING to do with) or Lucent (where I do work) have
"grabbed" amateur spectrum???

6392. Amateur Restructuring Announcement - FCC screws Ham Radio!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-30 00:00:00 UTC
From: vlfiscus@mcn.net
Message-ID: <s6nqporn5k291@corp.supernews.com>
Source record: 124179
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.cb,rec.radio.scanner,rec.radio.shortwave

The FCC made known its restructuring decision today and it sucks!

I Blame the ARRL!

NEWINGTON, CT, Dec 30, 1999--Amateur Radio will get a new look in the new millennium. The FCC today issued its long-awaited Report and Order in the 1998 Biennial Regulatory Review of Part 97--more commonly known as "license restructuring." The bottom line is that starting April 15, 2000, there will be three license classes--Technician, General, and Amateur Extra--and a single Morse code requirement--5 WPM.

"We believe that an individual's ability to demonstrate increased Morse code proficiency is not necessarily indicative of that individual's ability to contribute to the advancement of the radio art," the FCC said.

Besides drastically streamlining the Amateur Radio licensing process, the FCC said its actions would "eliminate unnecessary requirements that may discourage or limit individuals from becoming trained operators, technicians, and electronic experts."

Although no new Novice and Advanced licenses will be issued after the effective date of the Report and Order, the FCC does not plan to automatically upgrade any existing license privileges. The ARRL had proposed a one-time across-the-board upgrading of current Novice and Tech Plus licensees to General class, but the FCC declined to adopt the idea. This means that current licensees will retain their current operating privileges, including access to various modes and subbands, and will be able to renew their licenses indefinitely.

Starting April 15, 2000, individuals who qualified for the Technician class license prior to March 21, 1987, will be able to upgrade to General class by providing documentary proof to a Volunteer Examiner Coordinator, paying an application fee, and completing FCC Form 605.

The FCC's decision not to automatically upgrade Novice and Tech Plus licensees means the current Novice/Tech Plus HF subbands will remain and not be "refarmed" to higher class licensees as the ARRL had proposed. The FCC said it did not refarm these subbands because there was "no consensus" within the amateur community as to what to do with them.

As it had proposed earlier, the FCC decided to lump Technician and Tech Plus licensees into a single licensee database, all designated as "Technician" licensees. Those who can document having passed the 5 WPM Morse code examination will continue to have the current Tech Plus HF privileges. "If documentation is needed to verify whether a licensee has

passed a telegraphy examination, we may request the documentation from that licensee or the VECs," the FCC said.

In addition to reducing the number of license classes from six to three and eliminating the 20 and 13 WPM code tests, the FCC also will reduce the number of written examination elements from five to three, authorize Advanced Class hams to prepare and administer General class examinations, and eliminate Radio Amateur Civil Emergency Service (RACES) station licenses. RACES will remain, however. "After review of the record, we conclude that we should eliminate RACES station licenses because RACES station licenses are unnecessary for amateur stations and amateur service licenses to provide emergency communications," the FCC said.

Under the new licensing scheme, there will be four examination elements. Element 1 will be the 5 WPM Morse code exam. Element 2 will be a 35-question written test to obtain a Technician license; Element 3 will be a 35-question written test to obtain a General license, and Element 4 will be a 50-question written test for the Amateur Extra license. The FCC has left it in the hands of the National Conference of VECs Question Pool Committee to determine the specific mix and makeup of written examination questions. Current Amateur Radio study materials remain valid at least until the new rules become effective in April.

The FCC's new licensing plan means someone will be able to become a ham by passing a single 35-question written examination. The plan also simplifies and shortens the upgrade path from the ground floor through Amateur Extra--especially since amateurs will only have to pass one Morse code test.

Elimination of the 13 and 20 WPM Morse requirements also means an end to physician certification waivers for applicants claiming an inability to pass the Morse code examination due to physical handicap.

The effective date provides a window of upgrade opportunity for current Advanced licensees. Between now and April 15, current Advanced holders may take the existing Element 4B, a 40-question test, giving them credit for having passed the current Extra written examination. Likewise, holders of a Certificate of Successful Completion of Examination (CSCE) for Elements 3B or 4B dated on or after April 17, 1999, will be able to qualify for General or Amateur Extra respectively when the new rules go into effect on April 15, 2000.

The FCC disagreed with the League's suggestion that it undertake a restructuring of operating privileges along with licensing restructuring. "We believe that in light of ongoing discussions concerning implementation of new and more modern communications technologies within the amateur service community, we should accord the amateur service community an opportunity to complete such discussions and possibly reach a consensus regarding implementation of new technologies before we undertake a comprehensive restructuring of the amateur service operating privileges and frequencies," the FCC said in its Report and Order.

In its amendments to Part 97, the FCC's Report and Order refers to a "Club Station Call Sign Administrator," something that does not exist under the current rules and which was not explained in the R&O itself. An FCC spokesperson said the Commission plans to issue a Public Notice soon to explain the program and to solicit qualified entities to serve as call sign administrators for club station applications.

Furthermore, AT&T and Lucent have nothing to do with each
other in case Dick missed the trivestiture several years ago.
Lucent sells equipment, Lucent is NOT a carrier and has no
need for any spectrum. AT&T (as well as many others)
are carriers and they, if anyone, are the ones that covet
ham frequencies.

Cheers,
Bill K2UNK

Message-id: <84j26a$r6p$1@nnrp1.deja.com> >>
My extra class means something. TO ME. I could care less if someone
is "impressed" by the extra class license. The fact that the FCC is
lowering the standard does NOT CHANGE my accomplishment. As for all
your complaining about the latest dumbing down of America tactic....you
deserve it. You support that criminal in D.C. now live with it.

You liberals wanted this fool, now you got your just deserts.
Unfortunatly the rest of us have to live with it too. But not for much
longer....remember VOTE them out. End this dumbing down of America.
Stand up for your rights as a citizen of the greatest country on Earth.
Show these knee jerk, bleeding heart fools that we are sick of it.
VOTE THEM OUT.

And remember....the FCC is a politically appointed commission. Need I
say more.

Dan/W4NTI

<<<That's just plain horsebleep and you know it. Pin something else on Willy
Jeffie Clinton. Wise up. The restructuring thing is a culmination of
dissolution began way back to the time of...of...the FCC telling us we no
longer needed to keep logs. That's right; progressivley it PHASED out ham radio
as a viable independent entity-a national resource. You act as if it suddenly
came on to the scene thanks to Lewinsky's getting DOWN to business. I'll bet if
you want to research this whole thing, it can be traced to Ford,Carter, Reagan
for EIGHT years, Bush and Bill for SEVEN. And none was actually responsible.
ThE FCC calls this latest fiasco STREAMLINING which is another way of saying,
"Easier to manage and right be damned." And I'm not knocking it out of
self-aggrandizement because change MUST come about but there's a vast
difference between changes for the positive and for the negative. I'd like just
one person to explain to me how this "streamlining" thing is going to benefit
ham radio rather than just the ARRL? How's it going to make the hobby STRONGER?
BETTER? How? All it's going to do is to INFLATE numbers to impress the ITU or
whatever bozos are sitting on their asses over there in Switzerland eating
cheese, drinking beer and expelling gas. I copied and pasted something before
from one of the slimeballs who'll benefit from restructuring. His comment was a
cynical mocking of the Extra Class license, the "worthlessness" of it. I
defended my ticket but the dope's right. Ham radio will no longer belong to
persons like I who are PROUD of accomplishment but to the dipstick crowd who'll
come barging in because of the ease of it all. As someone who passed the 20 wpm
requirement, I say unequivocally that 20 is TOO FAST and ridiculous because if

it were worth anything, then someone speaking too fast wouldn't be asked to slow down for the sake of comprehension. On the other hand, FIVE wpm is ridiculously slow because if translated to speech, everyone would then sound like that goober, KB4GWC, from Gray Tennessee. Ever hear that turkey? That's supposed to be the standard? Hell, by the time he finishes a sentence, one could have shaved, showered and eaten breakfast. A PERFECT compromise would have been TEN wpm-not too slow,not too fast but fast enough to demand ALERTNESS. Dan, your EXTRA might mean SOMETHING to you and mine does to ME TOO, but to the overall scheme of things, it'll become meaningless in mid April. Want to somehow offset the negative aspects of S..L..O..W cw? Make the written so damn hard that no one will be able to pass by following the dots! Get rid of BASH STUFF. Change the tests constantly and if one's caught cheating, toss him out FOR GOOD. No second chance. Dan, you and I and everyone else holding the highest will soon be living with just MEMORIES rather than meaning. Once it was worth something, now it's like Confederate dough. When a company like Heath folded, it signalled the end to the aspect of needed intelligence in the electronic end of ham radio. That phase of conversation ended forever. Now the whole idea of study and perseverence to attain excellence has evaporated. What then is left? A TICKET GIVEAWAY AND LO AND BEHOLD...DUMB AND LAZY S.O.Bs JUST WON THE LOTTO. Wait until you see the increased advertising in the mags starting April! And you know what? It'll increase during the years of Gore, or McLain, or G.W. or Bradley. It'll make no difference whatsoever.

Doc, A F 2 Y
Voted by an independent research organization as having the most efficient wire antenna in North America-THE CLOUDWARMER. Info is free via the Internet. Simply send a request by e-mail! You'll never do better than write that letter!

Phil,

What "subtle details" are you alluding to??? The entire R&O,
which spells out ALL of the rules changes, is available on the
ARRL site and also at

http://www.nocode.org

and

http://www.users.fast.net/~wa6vse

The "details" have ALREADY been worked out by the
FCC and they've made their final decision(s).

Deal with it ...

It's about time!

These rules were obsolete years ago!

I applaud the FCC for their work on this.

Happy new year!

Maybe not, but we do. Everytime I work someone, I always pull up their
license data (mainly to get their address so I can send them a QSL card).

I have always understood it to be an inverse relationship;

The higher the WPM , the lower IQ .

If society ever required me to live a binary (ie dit / dah) guided life,
then I may have a need to be a CW kind of in-DUH-vidual...

It's too late now, of course, but I wish that the FCC had two-tracked it. They could have had code and no-code (or 5wpm) tracks. Leave the CW portion of the Extra band for folks who can pass a 20wpm test. Leave the phone portions for folks who don't care about CW. The good news is, people who don't want to learn the code are still going to stay out of the code sub-bands.

I don't think it will affect me... I will keep on repairing the gear of the
coded
ticket holders who can pound cw, but aren't as successful with sand.

Oh, and I will do that with the extra burden of being a no-code tech,
overcoming social adversity to prove I am smart enough to pound sand.

> Because ARRL wanted to keep the freakin code for soooo long...

Between all the name calling, may I be allowed to post a serious
question?

Is there some reason why EE's and graduate degrees are
more desired within the ham ranks?

I'm serious! I don't care the class, educational level
etc of the ham on the other end of a QSO. I don't care
how fast they had to do cw for the test. I don't care
if the memorized the Q pool. I don't care if they
had to sit at the FCC office for the test or take
it from the local VE group at the weekend hamfest.

Come on guys. It's just a bunch of hams talking
to each other on the radio. It's a hobby, not
a right of passage. Isn't it?

Dick ,your answer was not germaine to the question.!
Has logic failed you for you to respond in such a nonsensical way?
Code users will still be able to practice any where
and on all bands so what is the problem? Those who feel that
code is the essence of being a' real ham' can still continue to
flourish if the newcomers hold to the same ideals as those
soon to become silent keys..
As for being a "real ham"
would you suggest that any engineer must work on an
assembly line until the task at hand can be done
without thought, automatic, before he be allowed to
have a P.E.licence i.e. to make him a 'real" engineer?
Instead of being just a gas bag hooting in the forest
try applying a modicom of civility and logic in your
communications with the newsgroup or groups that
you appeared to have stumbled into.

Nope, Texans don't believe in small talk. The appropriate
response to a robber with a gun is a .45 hollowpoint, not
words. Because of that, crime is virtually non-existant in
my home town in East Texas. A lot of people don't bother
locking their houses or their vehicles.

Good for you. I, however, won't be. I will be taking the 5wpm but, now thanks to the FCC, no faster. To me, the code is just like the sign language, or any other foreign language for that matter. It's nice to know how, but why should I be forced to be ultra proficient in an optional language that I may or may not want to use on the air?

I read with amusement an article in the "Welcome to Amateur radio" booklet which came with the ARRL welcome package after I got my Technician license. In it the author trumpeted the achievements of a particular gentleman who could copy some 76 wpm, and went on to encourage the readers to emulate his methods and "practice, practice, practice". For what?!!! So I can brag to my neighbors?

Code is useful, yes. My wife and I actually think it's fun learning it together. But more power to the FCC for giving code eliticists the proverbial UP-YOURS.

I'd rather learn how to pick up 2x4s with my butt cheeks than to copy 23wpm.
:-D

"LOLs", "TNXs" and "73s" -- I'm so sick of all that crap.

Perhaps the day will soon come, both on the Internet and
on the amateur radio bands, when we can all speak and
write clearly. And when there is actually sufficient bandwidth
allowing us to do so.

Holy data compression Batman, that just happened! ;->

>that law-abiding citizens are unarmed. Think about it.

From this, you'd expect criminals in England to be more successful,
with higher rates of property crime in England than in the USA.
Does this in fact happen?

You also expect much lower rates of shootings, since criminals with
guns are much less likely to get into firefights if nobody else has
a gun. Do the statistics bear this out?

Suppose the speculations above are true, and England is a society
where you're more likely to be robbed but less likely to be killed.
How, exactly, does this make the USA the superior place to live?

The problem is that exams always trail the state of the art. The old commercial 'phone tickets were courses in radio-archeology. Then there is the matter of the licensee getting older. Some things don't change (antennas for example) but knowing that a quarter-mil of grid current is all one should draw on a 6146 won't do a whole lot for him or the hobby today.

Ultimately, one arrives at the conclusion that amateur licensing is a lot like driver licensing: be sure he knows the rules and posesses enough physical skill and ability so as not to be a direct party to an untimely death - then let him go.

In a hobby as multi-faceted as AR, much more than that is more harm than good. We will survive or we won't but licensing won't be a factor in much more than the speed at which it happens.

That's a lie, Dick, and you know it. I passed the 13wpm Morse
code and flunked the written exam first try. Second try, the
ham didn't have any way to send Morse code to me. He called the
first ham and asked him if I could do 13wpm. The first ham
verified that I had done five minutes of solid copy at 13wpm
six weeks before. My code test and written test were given
by different hams. The same thing is possible today.

1) Who said "broadcasts" of the type W1AW is doing are not legal? Not the FCC regs.

2) Just because someone is opposed to a 20wpm code test to get a ham license does *not* mean that they're against CW or opposed to helping someone who wants to learn code at 20wpm or higher accomplish that.

Many are getting too carried away with this thing. If you love CW you should be doing back-flips because we didn't loose any bandwidth in the process.

>me, tell them. There is an established procedure for submittal, but it
>is easily accomplished.
>Bob

In all honesty, the ARRL was caught off-guard by the FCC proposal to restructure and was at first unprepared to respond. What the FCC finally came out with cannot be laid at the ARRL's doorstep... the ARRL's response and proposal came several weeks after the initial ARRL proposal. MANY, MANY, other groups and individuals were pushing for dropping the code altogether (not unilaterally feasible with international treaty) and many were pushing for Automatic upgrades of existing Tech and advanced licenses. Looking over the ARRL's proposal to the FCC and the FCC's final document, I'd say the FCC pretty much brushed aside most of the ARRL's proposals (tougher written exams, no multiple-guess CW exams, 4 license classes, and 5 & 12 wpm CW requirements)

The FCC final decision was their own, NOT the ARRL's and bears little resemblance to the ARRL's counterproposal.

What's needed now from US Amateurs is not condemnation... The FCC won't change it's mind just because a bunch of us are pissed off! Rather, work with the new licensees, and encourage them to explore the many facets of Amateur Radio.... I watched many a VE quit after the introduction of No-Code licenses...they changed NOTHING!!! (..many dropped out of the ARRL after no-code licensing, even though the League was the LAST organization to get on the bandwagon.. they were afraid of being left behind) What they did was give up one of the best chances they could have ever hoped for of aquainting new hams with appropriate on-air behavior, with the pleasure of code and Ham traditions and lore. By turning their back on no-coders last time around many more experienced hams fostered the very operating practices they were so worried about by not being there as elmers! Get involved with your beloved hobby of ham radio with OTHERS... it's not something to be worshipped in a corner of your basement shack!

A last thought.... the bureaucrats and businesses who'd like to auction off or buy our spectrum must dance with absolute glee each time we rip ourselves apart over the "details"... One of these days in the middle of one of our

infights over the "small stuff" we're gonna' turn around and find that our bands have been auctioned off while we were preoccupied with each other!

The only long-term result to date of loss of gun ownership in England was the increase in deaths by other methods. Louisville Slugger comes to mind as an example. You may want to have a dialog with someone from Austrailia; their gun grab was recent enough for the resulting facts not to be tumbled by "spin"

Washington DC has the highest crime rate and violent death rate per capita than any of the other possessions as well as legitimate states of the U.S. How would you go about explaining that.

The original issuance of Gun Legislation in the 30's was a result of Congressional Research honoring a request by a senator for an english trranslation of Hitler's gun ownership laws in nazi Germany. If this is what you are wanting for America, at least have the conviction and belief in your own ideas and opinions to say that it is what you want. However, if you have a problem with nazi Germany, you may consider rethinking your stance and apologies to those you have tried to force it on.

The only thing that separates a conversation from a debate is the introduction of facts. The Congressional Record is an excellent source of facts. The corner bar has some great conversation.

Yeah,

The same was said about Randy Weaver and Gordon Kahl. Then the inquest came, and we saw how much of an understatement the "one-sided" was. Things had already escalated to far worse than any of us had feared. Of course, we can all ignore this in unision and pretend to be surprised when they come to take our radio gear away, stating that we are a threat to national security because we can monitor unscrambled communications that exist contrary to the original petition to the FCC for the spectrum before the refarming.

If this is what you want for the country, at least have the faith in your own beliefs to state so with pride.

Amen Gary. Remember the first words of a class on understanding law in America.

"The LAW is in the JAW of the JUDGE"

The discarding of Blackstones for Judge-Made law has managed to repeal the law of the land in the course of one century and replace it with the law of admiralty.

Warning: If anyone wants to take me to task on this topic; prepare yourself for complete an ultimate humiliation. I have enough concern for the self-esteem of fellow citizens to make this public notice and 100 times more square footage of examples notarized by public officials, concressional record, congressional reasearch reports, historical documents, etc. to back this up.....

Just finished a book that should be required reading for ALL gun control parties, pro or con. It is "More Guns, Less Crime" by John Lott. He is actually an economist who started out anti-gun and collected facts and figures, not hype, to prove pro-gun wrong. He got his eyes openned. A must read for all gun debater's....

My first though too - but, he qualified it "with a minimum of
equipment". With that as a requirement it's pretty hard to beat CW.

Don't know about you, Dave, but most of the Texans I know, including
myself, would rather die defending our property than be robbed. It's
the principle that matters. Of course, if one doesn't have any principles,
one might choose to be a sheep, ripe for shearing.

Seems to me you have some sort of hidden agenda. You wouldn't be one
of those armed criminals by any chance, would you?

It's even more astounding on a regional basis in the US. My 89 year old aunt has a revolver in her nightstand. Real crime (not the victimless kind) is virtually non-existent in this East Texas town.

Also, compare the crime rates to the European countries which require every household to have a military rifle. Those rates are virtually non-existant. If you were a criminal, would you break into a house where the occupants were known to be armed?

> ALSO yes - an unarmed civilian society has little at its disposal to

That includes Hitler, Stalin, Castro, and Saddam Hussein. What great historical figures to side with.

It just ain't gonna affect us, boys.

Novice - No change for current licensees.
Technician Class - No change.
Technician Plus - Name reverts to "Technician" but they keep current
privileges. A few 'old' Techs can request upgrade
to General.
General - No change.
Advanced - No change for current licensees.
Extra - No change.

Now can we drop this argument and figure out how to increase the fun
and value of amateur radio?

From: einsteina@my-deja.com (Albert)
Date: Fri, 31 December 1999 03:58 PM EST
Message-id: <8zqqhf$jjAM$1@deja.com>

Everyone knows that unintended heating represents a power loss, and that applies as well to an old-fashioned antenna design sometimes called the "cloud warmer". It actually does at times warm the clouds above the antenna, and that can result in an up to 20 dB loss of signal.

But suppose that the electrostatic and heat energy already in the clouds could be tapped to INCREASE the power of an RF signal passing through them? That's a phenomenon well known in the laboratory called "stimulated emission", and it was first discovered for microwaves. That resulted in the MASER device (Microwave Amplification by Stimulated Emission of Radiation) and the light amplifier, or LASER, quickly followed. Stimulated emission takes energy from the medium and actually cools it. Therefore, if one could tap into the natural energy contained in clouds, he would have a CLOUD COOLER antenna.

The phenomenon which produces amplification is a natural one, and can be found in many places. What is needed is a coherent source of electromagnetic radiation and an object which can be stimulated by that radiation to add yet more energy to the wavefront.

A ham transmitter is a highly coherent source of electromagnetic radiation, so every active ham has the first requirement fulfilled.

The trick is to know how to fulfill the second requirement by stimulating the clouds to release RF energy coherently into the passing signal, and that's where our unique and patent pending discovery comes into play.

Watch here and also on the web for our startling announcement of the revolutionary CLOUD COOLER antenna! It will be made available for sale just as soon as the U.S. Patent Office acts upon our claims.

Until then, DON'T BE LURED BY CLOUD WARMER ANTENNA CLAIMS: THEY LOSE ENERGY AND DO THE OPPOSITE OF OUR REVOLUTIONARY ANTENNA!! >>

Welcome to the Auxiliary Communications Service Newsletter,
developed by the ACS Training Unit of the State of California
Governor's Office of Emergency Services. Please visit our ACS
Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in
emergency communications closer together by sharing common
ideas, and by introducing new technology into the emergency
services community. All individuals with an interest in
emergency communications, disaster preparedness or helping the
community at large are encouraged to participate here in an open
forum.

You will find a virtual community here, with representatives
from many different organizations with the same common goal:
emergency response. We encourage everyone, from whatever
organization you represent (or just yourself!) to bring us your
ideas, suggestions, concerns, manuals, handbooks, or opinions so
that we may share them with the group. To those of you who have
just joined us, welcome aboard!

.....

>From the Editor's Desk:

A tribute to Courage.
Ordinary people, doing Extraordinary things.
Heroes.

Last Friday night in Worchester, Massachusetts, two firefighters
entered a blazing building on the report that homeless people may
have been trapped inside. Becoming disoriented in the building, they
called for help. Four additional Worchester firefighters entered the
building in a vain attempt to rescue their fallen comrades. Sadly,
all six firefighters were lost.

As a tribute to those fallen heroes, and as a salute to all those
emergency services professionals who put themselves in harm's way
every day, we dedicate this issue of the ACS Newsletter to those
brave men and women who make the ultimate sacrifice that others
may live.

We dedicate this issue to:

Lieutenant Thomas E. Spencer
Fire Fighter Timothy P. Jackson

Fire Fighter James F. Lyons
Fire Fighter Joseph T. McGuirk
Fire Fighter Paul A. Brotherton
Fire Fighter Jeremiah M. Lucey

We include this week's EMCOMM Bulletin; the full Newsletter will continue next week.

- Dave Larton, Editor
.....

This week's EMCOMM Bulletin:

EMC213 RIMS Forms 4
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC213 RIMS Forms 4 For release 12/6/99

Continued from Bulletins 211-212

It is recognized there may be those who will argue that any data passed in an emergency is better than no data, and while that has some merit, it misses the point. The point is this: systems - like the RIMS - are so successful that unless EMCOMM units for government are able to successfully provide the EXACT same RESULTS over Amateur frequencies it is easily foreseeable that government use of Amateurs will decline materially, and possibly, completely.

Why? Three very important reasons:
1. When there is no real need for an unit for a long period, it is almost impossible to keep an unit intact. Few, if any, Amateurs want to belong to an unit where their talents are not put to active use.
2. Learning, and using, such computerized systems by the EMCOMM unit (especially Amateurs) is a sure way to keep the Amateurs involved with the real day-to-day use of the in-house agency systems. It speaks loudly to the affect that they want to be relied upon for use of the RIMS (or similar) systems.
3. Trained EMCOMM unit personnel, thoroughly familiar with and experienced in the use of RIMS (or similar) forms means that government has a true communications reserve that is closely meshed into it's real day to day life. The smaller the local Operational Area the more it needs this trained reserve STAFF. In particular, Amateurs have the capabilities to develop this local service to their governments.

Until we develop a process (possibly a "mask" in a laptop)
where by the data can be sent and received so that it will
automatically import into that "mask", such data must either
be send by voice or as a pure text format.

To send such data in either format would require using the
form, column and item numbers. With both sender and receiver
having the form on hand essential data can be filled in its
proper place. Here is an example:
>From XXX OPArea to REOC
Form 1c (Event/Incident Report by OP Area).
Item 19 Prognosis worsening. Wind increasing from South
No other update
Authority: (name date, time)
Acknowledge.
End of message.
--- ---
RIMS series continues in Bulletin 214

On 31 Dec 1999 20:06:11 GMT Fizzy <fizzbin@my-deja.com> wrote:

| It has been recognized for the last several years that only the
| Technician class licensee was growing in numbers and was solely
| responsible for any growth in the hobby at all (Unfortunately, the hobby
| shrunk during 1998). Those that passed a code exam will be a welcome
| addition to the ranks of HF operators. Hopefully, the others will be
| allowed to follow soon.

As a "True Tech" I do retain some HF privs. With the changes this week,
I'll actually be going ahead and upgrading to Extra. But I doubt if
that will change my operating habits or interest, which are principly
in VHF and UHF. The things I would like to do don't really belong on
HF. So I probably won't be "in the ranks" all that much.

| This finally demotes the CW requirement to "minimally important", and
| probably only keeps it around to satisfy international treaty.

Agreed.

| My own feeling is that CW is unimportant (even though I once held a 35
| wpm ARRL certificate) and that it needs to be eliminated as a
| requirement ASAP.

CW is still important. It's just not important for actually getting a
license, now. For the very same reasons computer science students should
learn some computer hardware and assembly progamming as a foundation,
hams should still learn at least what Morse Code is all about, why it
was used, and how it could be used if all else fails. But to fully
operate in it at high speed just to get a license to operate CW, I don't
think that's important because that kind of practice is no longer
essential for all hams to learn (some will anyway). I would not have
minded if 20 WPM was retained to earn rights to the lower 25 or 50 kHz
of the 5 larger HF bands.

If I were vocally incapacitated, or the mic failed on my 2m HT, I could
still get attention by kerchunking SOS via a repeater, and hams would still
recognize it. It wouldn't be anywhere near 5 WPM, obviously.

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!

.....

>From the Editor's Desk:

This represents the last bulletin for the Millenium. When we first started the Newsletter project two years ago, I had no idea how popular it would become. We have seen a tremendous exchange of ideas in this forum: we have lots of things planned for the New Year! Thanks to everyone who has contributed to the success of the Newsletter, and to the ACS program. We finish our RIMS series this week with 2 bulletins; our regular Newsletter returns next week.

Stay safe everybody -- see you next year!
Dave Larton, Editor

.....

This week's EMCOMM Bulletin:

EMC216 PACKET/AMTOR RIMS FORMS 2/3
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC216 PACKET/AMTOR RIMS FORMS 2/3 For release 12/27/99

- The ACS/RACES operator may need to use the hard copy of the correct form as a guide for some minor reconstruction that may be required. All fonts highlighted areas, italicized letters or words, colors and graphics will disappear during the conversion. Centering, a space added between each numbered statement or paragraph, alignment of columns and rows, etc. will need to be done. Some will only take a few seconds, others a few minutes.

- The completed ASCII form is then reviewed by the EMA official for correctness and approved.

- The ACS/RACES then sends the form via prearranged channels and modes to the REOC.

- The REOC reviews the documentation. Sometimes a mission may be issued by the REOC to meet the mutual aid or resource requirements of the situation. The Mission forms can also be sent back to the OA in the same manner by the REOC ACS.

Now some of the local and OA governments have the Lotus Notes on just one or two computers. If these go down then the blank ASCII files of these forms that have been provided can be used in the interim. It will mean more work re-accomplishing these forms in Lotus Notes when the computer is repaired but there will only be a very few forms that ever have to be sent this way.

These forms have been set up so that any fills that may be required on those sent via HF (Amtor, Pactor, etc.) can be accomplished via voice using standard traffic handling procedures as all the paragraphs and blocks are designated alpha/numerically.

NOTE: Remember to use standard ASCII editing procedures and turn off the 'Insert' and to use the 'Up/Down/Left/Right' arrows (NOT SPACE OR ENTER/RETURN, except when needed for that specific function) to move the cursor to fill out these forms. Any columns and rows will get distorted and important information could be misread or 'appear' incorrect.

NOTE: On these forms there will be information within parenthesis. Select the right response or follow the instructions AND THEN DELETE THE PARENTHESIS AND THE UNUSED CONTENTS OR THE INSTRUCTIONS.

NOTE: DO NOT ENTER THE ASCII FORMS OR RE-ACCOMPLISH THEM INTO THE SYSTEM AND/OR COMPUTER(S) AT THE RECEIVING END. This would cause a Replication Conflict or duplication error after the phone lines or OASIS System come back on

line. (Replication is a process that insures each computer
in the system has the same information as all others.)

PRACTICE IS THE ONLY WAY THESE PROCEDURES CAN BE PERFECTED
AT EACH LOCAL, OA OR REGIONAL LEVEL. Fill out the both
types (REMEMBERING TO ADD 'DRILL OR 'EXERCISE' TO THE
BEGINNING AND END OF EACH) of the forms and send them via
Packet or Amtor etc.

Next bulletin will provide the list of forms

To subscribe to bulletins, use the Subscription Services
web page at <http://acs.oes.ca.gov/subscribe.html>. If
you don't have web access, just send an e-mail message to
<mailto:emcomm-bulletin-sub@harthaven.com>.

I think it's a good thing. My time is better spent on theory
than code anyway. After April 15th, I can upgrade to General
for "free", that is, because I got my Tech back in 1976 I took
the General theory and 5wpm already. BUT----

Not that the code is now "done" with me, I'll probably get
the study guides to do an upgrade to Extra. And I'll keep
my current callsign. As my company is doing some IC design
of 2.4 GHz radios on a chip, that theory could come in handy.
Code isn't useful at work anyway....

> but may know next to nothing about electronics.

It is a fact and there are numerous examples. No ham radio
test ever was that difficult, in terms of comparing it with
engineering, but the question pool scheme has been too far
out of range.

> That has now been simplified to only needing to learn 5 wpm Morse.
> You can handle about that speed after simply memorizing the code.

I doubt that very many hams will pursue it further now that
it won't be required.

> I guess I will finally be getting my Extra Class

I sure would. in your circumstances. I'd imagine a couple
hundred thousand others will, too since most won't be
required to much of anything else. How do you sort them
today? You don't.

The
> 11 wpm plateau where I have been stuck for several years will no
> longer be a barrier.

Mostly those barriers are caused by a couple of things.
One, learning the code character formations at too slow a
speed and never finding a way to re-learn them at speeds
higher than the "plateau". When one learns with Farnsworth
speed character formation speeds, where the code is formed
at ~15 to 18 wpm. but sent at slow-spaced, slow word speeds
it helps eliminate that difficult "hump" transition. Most
people who stay stuck at a "plateau" fail to learn that.

The other factor is that one will never learn code at
higher speeds unless he "pushes" himself to try to copy
considerably faster than he is able to copy. When you listen
to faster code, copying first the simple short words that
you can pick out, you find with a little time that you're
copying more and more of it as practice goes on, and you

start to hear words instead of just characters. Then when
you listen to the slower speed practice, it seems astounding
how slow "ordinary" speeds are, and how much of it you copy.

So you have to really make yourself work to practice beyond
your capacity, and you find that your capacity moves on up
to levels you never expected.

> I just wish they had the old style questions - where real electronic
> knowledge was required.

Ain't gonna happen anytime soon, I'm afraid. FCC just
dumped the whole testing scheme on to the VEC system, and
W5YI is on record as intending to eliminate theory from
written tests. Since he has installed himself in the
3-member Question Pool committee which decides exactly what
will constitute *all* the tests, it seems like done deal.

My time as a VE ended permanently yesterday, unless
something pretty drastic changes that I can't forsee at this
time.

Sure it is, as INFORMATION PRESENTED, not the exact
questions and answers.
Nice try at distortion, but it didn't work. There's NO
correlation whatever. You have to read and understand the
material to come up with the answers.

CONSIDER THIS! Along came an Enforcer from Gettyburg to save ham radio from foreign interests but who'll come along to save it for American interests? How can the FCC reconcile their attempts on one hand to clean up the hobby; to "gentlemanize" it; to polish it up spic and span to offer a new and better image and then turn around and stab it in the back by now allowing every Tom, Dick and Harry, to enter it? How will they justify the turning of this proud hobby into a full blown CB cesspool through deregulation? If you think I'm melodramatic, consider this. How'd you like it if a great institution like the U.S.Marine Corps began to put up recruitment posters saying that they no long-ger were interested in obtaining the few and the
proud, but instead the thumbsuckers, bedwetters and deviates? The ranks would swell; more money would be allotted but the basic infrastructure would become decimated. That's exactly what is going to happen to amateur radio and faster rather than slower. If the best is wanted, the criteria and prerequisite qualifications are RAISED,not lowered. Several years ago WB2OTK told me about an incident with a gentleman named Bob McKinney if memory serves me right. I believe that the latter was watch officer at one of the FCC field offices in the south. Rich relayed this info:he had called to lodge a justifiable complaint about KV4FZ or one of his brownnosers and was told in as much words that ham radio was useless and if it turned into CB, no one would care. I thought Rich had exaggerated; now I know he DIDN'T!

Source record: 123841
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

It just ain't gonna affect us, boys.

Novice - No change for current licensees.
Technician Class - No change.
Technician Plus - Name reverts to "Technician" but they keep current
privileges. A few 'old' Techs can request upgrade
to General.
General - No change.
Advanced - No change for current licensees.
Extra - No change.

Now can we drop this argument and figure out how to increase the fun
and value of amateur radio?

73, Hans, K0HB

So being that i now hold tech+ license all i will have to do is pass a written test & i get my general? Wow thats cool cuz i got my tech when i was 12 & a year later learned the code for just long enuf to pass the 5 wpm test. now i'm 20 & have totally forgotten the code. so to get my general all i gotta do is study & take the exam, am i right? ant to those who think the question pools are a bad idea, i can still answer most of the questions in my technician study book after 8 years. I didn't memorize it, i learned it. and i assume that's what's inevitable when studying for the exam if you have an interest in radio (if not, then why do you want a license?) allright.... 73

>April 14. You can get the 20wpm code in a month if you use
>the W1AW code practice sessions on the air- which I would
>imagine they'll probably discontinue after April 15 since no

Oh, that's the plan, but time to practice is the problem. People have asked me if my hearing is bad because I go around with an MFJ tutor in my shirt pocket and earphone in my ear.

I wonder if the ARRL bulletins will drop down to 5wpm, too or just go away. I find it strangely schizoid that ARRL "broadcasts" (hey, that's not legal anyway!) code practice 3 times a day and is against a 20wpm proficiency test..

>Bill Nelson wrote:

>> I just wish they had the old style questions - where real electronic
>> knowledge was required.

>Amen to that!

Old style questions? Let's see what the 1912 written test consisted
of:

"The written examination consists of seven questions and to answer
these you should know:
1. How to make a diagram of the transmitting and receiving apparatus.
2. How the transmitting apparatus is made and how it works.
3. How the receiving apparatus is made and how it works.
4. The International regulations for wireless communications and
the U.S. wireless laws and regulations."

Taken from _The_Book_Of_Wireless_, Collins, 1915.

These were essay-type questions, and as the government examiners
were fond of saying, "What you fail to say, you don't know."

I have a Midland 13-895 Single Side Band and AM CB Transceiver that I purchase from someone on eBay (Big mistake) The manual with it says it was also marketed by JCPenney (I suspect back around 1975). The model number for JCPenney is 6240A. I am looking for a power cord for the unit. If you know where I might pick one up it would be most appreciated.
Thanks,
AJ

My extra class means something. TO ME. I could care less if someone is "impressed" by the extra class license. The fact that the FCC is lowering the standard does NOT CHANGE my accomplishment. As for all your complaining about the latest dumbing down of America tactic....you deserve it. You support that criminal in D.C. now live with it.

You liberals wanted this fool, now you got your just deserts. Unfortunatly the rest of us have to live with it too. But not for much longer....remember VOTE them out. End this dumbing down of America. Stand up for your rights as a citizen of the greatest country on Earth. Show these knee jerk, bleeding heart fools that we are sick of it. VOTE THEM OUT.

And remember....the FCC is a politically appointed commission. Need I say more.

Dan/W4NTI

Well, this is what was printed, how do YOU read it? Apparently SOMEBODY does get a free upgrade providing they can document thier testing date.

Starting April 15, 2000, individuals who qualified for the
Technician class license prior to March 21, 1987, will be able to
upgrade to General class by providing documentary proof to a
Volunteer Examiner Coordinator, paying an application fee, and
completing FCC Form 605.

Interesting analysis. And in the early days of amateur exams (pre-1930), what was the Morse proficiency requirement?

Since we have such a fixation on the way things used to be, I would argue that before incentive licensing, the pre-1950s amateur exam resembled more closely the new licensing structure that will take effect next year. What was the Morse requirement on the Class A and Class B amateur exams?

If we are trying to appeal to kids nothing we can do will help,for the
most part it is an adults hobby,nothing wrong with that.
The ARRL has always been against any code requirement regardless of
what they say.

It's not knowing the code,it's being willing to make a small
investment in the way of a little effort to get something worth
having,and if the crybabies didn't think it was worth having they
wouldn't be crying.
Having a few simple hoops to jump through helps keep out the moderatly
interested that wonder from hobby to hobby,job to job,wife to wife,and
take what they can get but never give because they were really never
that interested.

I know such guys, too. And their main reason not to bothr about an amateur radio ticket is that they prefer to talk to sensible guys. And somehow, the above quote proves their point.

To hold CW responsible for the presence of alternatives for long distance communication, and thus of the presence of choice, and thus of a significant number of people opting for internet instead of amateur radio, is simply absurde.

KB2YVC (Technican with a morse key, who also uses it)

Mr. William, Be Nice. Although you may not agree with someone's opinion, respect there right to express it. I will be one of those Y2K hams. I received my first ham ticket back in 1974 and the test was given at that time by the "FCC". On or about 4-15-20 under the NEW rules, I will receive an upgrade without having to take another darn test. I qualify so why not take advantage of this opportunity. Frankly William there comes a time in ones life when they just get tired of taking tests. In my case and like many others, I have been taking tests most of my life beginning with grade school and through my college years. Then in my vocation of law enforcement and with amateur radio. One test after another.

May I wish you and yours a most "Joyous and Prosperous New Year".

"Due process?" What a joke! There is no "due process" when the heavy hand of the government with it's unlimited financial resources swoops down on a small business, then forces the business owner to incur huge legal fees for his defense. Even if ultimately found innocent, the business is usually ruined in the process.

The key word is "MAY." The FCC is severely underfunded as it is. Do you really think they will have time and budget to monitor 10 meters and run a check on every callsign they hear? Do they even care? No. A Technician operating your typical 25 watts on 10 without passing a Morse exam is WAY down on their list of enforcement priorities.

The FCC issued this ruling to LESSEN it's regulatory burden, not to increase it.

Bill:

Admittedly, I am one of those amateurs of which you speak. I hold an extra class license simply because of my ability to memorize the entire question pool and one lucky guess on the multiple choice code test (knew 6 of the answers, guessed one out of four on the remaining ones). Still, you can't memorize the question pools without learning something.

Agreed. This service/hobby is so vast that there will always be something to learn and I will always be a Novice at heart. It should be the same for everyone in the service. After all, the license should be a starting point, not the ending point as some of you think it is.

> and there's not a damn thing you can

I suppose the new rules will lead to a few changes for sure. W1aw code practice will go away , no need for that any more.
The Y2k hams will all be extra class , a tech or general will be an oddity in the future. The new Y2k extras will fighting over the few 1X2 calls that show every year. The cw bands will be under attack from the new Y2k extras , more phone band space will be demanded to accommodate the thousands of new extras.Look for the cw bands to be first shared with phone, then a movement to restrict cw to 30 meters only. After all, why should half the ham bands be reserved for cw , when most hams of today hate cw. Look for the qrp news in qst to disappear since its driven by cw for the most part. Look for the formation of some new organization devoted to keeping alive cw , perhaps "fists" may get a jump start in yk2. Look for a real division in the ham ranks between the yk2 extras and the older hams who really want have much in common after april 2000.

>activity," i.e., V/UHF.
>
>73, Jeff KH6O/6
>

Jeff, There used to be a lot of local activity here on HF, several local HF nets that I used to check into are now gone due to a lack interest. I am hoping that maybe more of the Technician class hams will now persue a higher graded license now that most of the perceived code "barrier" will be gone on 4/15/00. On the down side I imagine if all the growth that has been predicted happen's its going to be difficult to find a clear frequency to operate phone in a few short years. I think everybody needs to keep an open mind about all of this, the gavel has already fallen, the order is here and we have to make the best of it. I don't wan't to be like the ham I heard yesterday on 20m. This moron said he will never talk to any of these new appliance operators and if any come on "his frequency" he's gonna jam their signal and f__k Rilley Hollingsworth and on and on, this diatribe lasted about 15 minutes, so much for ham radio etiquette. I guess its like the heading on an early post says "Its all over except the crying"

6531. grid-dip meter useage question.....

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: sjcduke@aol.com
Message-ID: <19991231095233.22391.00000207@ng-fu1.aol.com>
Source record: 123892

I have a military grid dipper..the AN/PRM-10

I have a bit of experience with it.

However.....using it for one wave-length wire loops has me puzzled.

I want to use it to help me cut a bare, solid copper 12 gauge wire to the correct length. I want to make a loop of wire....one wavelength long.......a continuous, unbroken loop.......at 146 Mhz. Lets say that I start with my wire loop obviously too long, so I have the ability to trim the circumference of my loop. Lets say I start with a loop of 86 inch circumference.

For 146 Mhz....one wavelength loop...at what freq on the dipper should I look for a dip? Is it possible to get a dip, at the fundamental one wavelength freq...., in a continuous loop? Or should the loop be broken....to dip?

I have tried to dip both a continuous, unbroken 86 inch loop, and a "broken" 86 inch loop. I ** DO NOT** get a dip anywhere near 146 Mhz........ What do I need to know here? I think maybe it has to do with 1/4....3/4....etc.......wavelengths? Or harmonics.......?? Broken loop versus unbroken loop?? How....PRECISELY......do I use a dipper to get a one wavelength unbroken loop of wire at 146 Mhz? An unbroken loop of wire, resonant at 146 Mhz, is what I seek.

Thank you.....
sjc KA0FPJ

I would say "amen," especially to #3, but the problem is that most of the guys who overdrive transmitters and cause splatter over a 20 KHz bandwidth already know how and why to avoid doing it -- but just don't care.

I sure don't see a problem with the changes. We now have
CB'ers in the 10 meter band, we have Generals, Techs and
Advanced operators in portions of bands there not supposed
to be on. We have all classes of operators in violation of
the rules everyday of the week. The problem here as I see it
is the same as its been for years, "ENFORCEMENT of the
RULES" We have groups of hams that seem to think they own
some frequencies. We have groups that cuss and swear on the
bands. We have groups that if someone gets within 3kc, go to
that frequency and try to take over. In my years of being on
ham radio, it sure seems to me the Advanced and Extra class
have the worst operating habits on the HF bands. And of
these poor operators many were CB operators at one time and
were rude there, ran big amplifiers, had to king of the
band. They came to ham radio and continue to have to be
king of the band. This is the way I feel about it, If you
feel other wise that's fine. Bill/KG8AW

Amen to that!

I'll be getting my "extra" as well, even though many of the old stuffed shirts won't recognize it as such. I may even apply for an "old" vanity call, to really confuse them.

Good things come to those that are willing to wait.....

Dave

Guys like you said the same thing when they enacted "novice Enhancement". I remeber the old farts selling off their 220 gear, because they didn't want to associate with novices. Life went on.

Guys like you said the same thing when the no-code tech came out. "Those no-coders are not "real" hams". Life went on.

Now we finally are recognizing the pointlessness of requiring advanced CW simply to access phone HF, and of course the old farts will whine about the doom and gloom that it will bring.

As far as I'm concerned, ham radio is much better off without guys that cannot accept people for who they are and not what class of license that they hold. I sincerely hope that this FCC action causes a lot of old stuffed shirts to sell all their equipment and throw in the towel. More room for the rest of us, that truly want to see ham radio progress, and who don't have a close minded, bigoted, and predjudicial attitude.

The real joke here is that you won't be able to really tell who the
so-called "real" hams are after a while, so you might some day end up
finding out that your best ham buddy never took above a 5 WPM test. What
will you do then?

Hello, In my opinion this is really bad. I wonder if they will go after radio shack? I'm sure the Shack's lawyers would have a lot more to say than picking on a smaller company like Ramsey. I guess we're getting to the point that thinking of a crime will be just as illegal as doing it. I think that almos anything can be used illegally. The fed's actions smack of big brother tactics that should not be tolerated.

Well, Tech Plus wasn't available until 1994, so it hasn't been quite 10
years, but going beyond nit picking, you have a license which states
Tech Plus? Or the original CSCE? Failing all that, get a current RAC
callbook CD and hang on to it. It will show that you were a Tech plus.

WE tech+ holders have passed the general theory. I took my general theory test some 25 years ago before an FCC Agent along with having passed the 5 WPM requirement.

I presume we are in limbo for now. The FCC needs to explain there and our position much more than was described.

The same analogy can be said for guns. Look at how many guns are used illegally, but you don't see the feds rushing in to all the gun shops to shut them down. The gun lobby has too much money to fight back, Ramsey dosen't. Wonder how many people have been killed by a wireless mic kit?

Not particularly, but the more awakening of this type I see, the
safer I feel.

Eventually, one hopes, enough people to form a decisive bloc will
understand that a coup d'etat occurred in America many years ago,
which kept the outward _forms_ of the founders' Republic while at
its highest levels hating and subverting the essence of that
Republic.

With happy New Year wishes,

--

Kevin Alfred Strom.

Hi Bill -
Don't you feel sorry that you had to work so hard to pass the 20
wpm Extra exam? Remember I was one of the VEs who finally saw you make
it. Why can't you tell Dick what a good post he wrote below? I know
that you could pass a real technical exam with ease because you are a
technical writer. There will always be some people who fail...Isn't it
a shame that those people may not want to join the ARRL after failing?

Good post Dick,
As you can see by my other posts I agree entirely with you.
IMHO the FCC needs to be driven by a congressional committee that will
listen to all of the facts and not be swayed solely by the ARRL lobby.
This might happen in the future.

Hams need MORE modern comprehensive exams and MORE license classes,
73 es Happy Y2K,
Bob Wex w2ilp (Ignorant License Passers?)

Dogs "look good on paper"...better than on the
carpet! Cats know where their litter boxes
are.
--w2ilp--

The purpose of an examination is to examine.
The purpose of a test is to test. If everyone
can pass an examination or a test then there is
no purpose for the test or examination...and
thus we can all become Citizen's Multi-Band (CMB).
--w2ilp--

If they don't get rid of fixed Q & As, maybe ALL
hams will become EXTRAs on April 15, 2000 and
from then on they can just give a dumbed down
120 question multiple choice test for just
ONE CLASS of license. Is it possible that the
ARRL thinks that anyone who could pass a harder
test would buy a new PC instead of ham radio equipment?
Nah...I dunno if they realize that because they
can't afford to hire a good product line manager.
--w2ilp--

There may be a new type of physician's certification
required for all Hams who can't make "Extra class"
by the end of 2000, so that it can be determined
if they are safe to park their bicycles or spin
the propellers on their hats in public places.

As a General I could certainly operate in the lower 25KHz too, since my code speed is 30wpm or better. Whose going to know? My callsign is certainly old enough for it not to be questioned. I don't do it because I prefer to operate my station legally, if I really want that extra 25 KHz I'll study and pass the test.
I suppose it's really an issue of character, if you think it's OK, as long as you can get away with it that's your prerogative.

... or memorize ACSII codes for all of the characters, or
explain perigee/apogee for OSCAR satellites, or explain how a PSK
signal is generated... It's funny that I had to know about Baudot for
my General exam, yet I never had Novice/Tech+ priveledges to be able
to learn about RTTY by actually running it. There is a lot of
confusion about whether knowledge is legitimate given its source. Book
knowledge provides the background, but actually doing it provides
exoerience. Knowing code does not automatically make you a
respectable, knowlegable operator, nor does it guarantee that you will
contribute to the hobby.

>What we really need is a written test that includes:
>1) FCC rules and regs.
>2) Accepted operating proceedures and practices.
>3) General electronic theory including how and why *not* to overdrive
>a transmitter.

Absolutely! I work in a medical laboratory, and I am required
by law to demonstrate a yearly proficiency with all types of testing,
manual or automated, including knowledge of regulations and theory
behind transfusion medicine. In addition, some states require so many
credits of continuing education for Medical Technologists. Requiring a
yearly test of knowledge of FCC regs and **on-air** demonstration of
proper set up and operation would do a world more than 20 wpm ever
could.

Pete Womack, BS MT(ASCP), KF4VCC.

If you are an "old" tech, and can prove it, you get credit for the 5 wpm
code test and the full general written which you took. All you have to
do is show up at a VE session after April 15, 2000 with the necessary
documentation, pay the application fee, and file the Form 605, and
you'll get an upgrade to General without having to re-take any tests.

If you haven't read the Report and Order, it's available in Adobe
.pdf format at either

http://www.nocode.org/articles

or my personal web page at

http://wwwusers.fast.net/~wa6vse

happy reading and happy new year!

You can pound Morse code at 20WPM, but you can't spell worth a damn. The word is "SCHLEPPED."

Which one of these skills, Morse code or spelling, do you feel will be most useful in day-to-day life?

Oh, by the way, I'm still waiting to hear about what happened to your dental practice.

The GREAT flaw in your logic is the ASSUMPTION of later "due process", or that the court process is somehow isolated from *law enforcement* - hasn't it YET occured to you that events LEADING to the reported incidents are a PART of our "due process" that are set forth and permitted by our current legal system?

Or do you REALLY think those two institutions operate entirely independently from each other? Who do you think gives the search warrants - or wiretap permissions? Here's a clue - IT'S THE JUDGES!

The SAME judges who will next render the "due process you speak of..."

6571. Re: Anyone know if no-code tech will exist

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: ab4d@aol.com
Message-ID: <19991230233152.09300.00000372@ng-fp1.aol.com>
Source record: 123932

Tim, the way I read the document is that the no-code technician's and tech plus's will all be lumped together into the new "technician" class, but current tech plus licensee's will retain their current hf privileges, the new structure will be Technician, General, and Extra the requirments for each class are:

Technician = Element 2, which is the tech written.

General = Element 1, which is the 5wpm code test, Element 2, and Element 3 which is the General written.

Extra = Elements 1, 2, 3, and 4 which is the Extra written.

Post March of 1987 Tech Plus licensee's need to take element 3 to upgrade to General.

73 de AB4D.

Brian you may get a piece of paper that says Extra but you
will ALWAYS be a Novice and there's not a damn thing you can
do about it, except to get your sorry ass down to the local
VE session and pass 20wpm before April 14th. Live with it,
cuz you have no choice.

I look for the FCC to issue a slight correction to the
names of the two HF license classes. They will be corrected
to Extra and Novxtra.

Well, now I wonder - has the FCC considered the fact that there will be too few Extra class callsigns to go around?

I don't care what they say, I'm still taking the 13wpm next week and "they" can't stop me!

Why couldn't they do something really constructive, like move the 40M novice CW segment someplace where the broadcast stations aren't stacked end to end every night?

And Surprise! I am already on record as being able to buy
that, even though I believe that every ham radio operator
should take it upon himself to be able to use code.
But you saw what the FCC said--essentially that "Our
solution is the one that causes us least work and time to
administer". Clearly they're never going to change it, in
our lifetimes.

Way to go, Don. YOU will be one of the few *REAL HAMS* to
emerge from all this.

While you're at it, just go for the Extra, too, prior to
April 14. You can get the 20wpm code in a month if you use
the W1AW code practice sessions on the air- which I would
imagine they'll probably discontinue after April 15 since no
one will need to use them for upgrading anymore.
If you do, try copying the sessions where they start faster
code first, then slow down progressively. Just relax and
listen, copying whatever you can at the faster speeds, then
when the slower segments come along you find that you can do
better than you thought! Try this for a month and you'll
have it. Good luck.

You will Lloyd. Does that mean anything to you?

And no, you won't be getting any free upgrades if your a Novice or Technician class.

"The FCC decided to lump Technician and Tech Plus licensees into a single licensee database, all designated as ''Technician'' licensees. Those who can document having passed the 5 WPM Morse code examination will continue to have the current Tech Plus HF privileges. The FCC said it may request documentation from a licensee or VEC to verify whether a licensee has passed a telegraphy examination."

This means you.

Have a nice day :)

You're going to have to clarify that last remark, 4D. By "local activity"
I assume you mean V/UHF? How would reducing the HF code requirement
spur "local activity"? There is no code requirement for "local
activity," i.e., V/UHF.

Hi Guys!

I think this is a VERY good thing.

For one, it catches up to the wrld ham community and out of the 70's
testing requirements.

For two, it'll get alot more good people into ham radio, especially
HF. Very few Tech's I've run into are bad operators and/or bad people.

For three, I think it will eventually drive the price down for HF gear
and give incentive to the manufacturers of HF rigs to develop better
gear for less $.

My 2 cents - Ed - KF6YKM

Effective date April 15, 2000. 3 license classes (Tech, General, Extra)
1 (ONE) code test @ 5 wpm.

Best thing the FCC has done for ham radio ever, even counting the
WRC bands.

Jeffy is whiney, but he's not a geezer (except in attitudes). However,
he is right that I will be able to upgrade to General "without working
for it" (taking another test) ... I passed the full general written in late
75 or early 76 ... same time as my Commercial 'Phone license ... as
an "old" tech, I won't have to take the General test since I already have
credit for it (not that it would be a problem).

In fact, I think I'll see if I can work in a VE session to take 4A and 4B
before April 15 and just upgrade straight to extra just to gall Jeffy and
the other PCTA olde fartz :-)

(remember "olde farte" is a state of MIND, not of chronological age)

Yep. I always thought that the pre-published question pool was a
mistake. If a person was able to learn CW at 20 wpm and do a bit
of memorization, then they could have an Amateur Extra Class license.
The result - an Amateur who can send/receive code at a high speed,
but may know next to nothing about electronics.

That has now been simplified to only needing to learn 5 wpm Morse.
You can handle about that speed after simply memorizing the code.

I guess I will finally be getting my Extra Class license. The
11 wpm plateau where I have been stuck for several years will no
longer be a barrier.

I just wish they had the old style questions - where real electronic
knowledge was required.

You mean like the driving test, Dick? Every state publishes a simple
study guide for the license test, and the tests are even shorter than
the ham license test. Every answer on that test is in that short thirty
or forty page booklet. I don't hear your outrage over this. And I
don't see you handing in your driver's license to demand a new, tougher, test.

Congrats Jane,

There could be several things causing you problem, one, luck or maybe your not being "heard." You should check the output power at your transmitter, then where the feedline attached to your antenna and if you have a field strength meter, measure the strength near your anttenna. Remember the old adage, a station is only as good as its antenna system. If that doesn't work, try arranging a QSO with someone (I would volunteer, but due to covenants etc, etc, I currently do not have a an HF station on air.), also you may want to try some bands other than 20 or 40.

May I recomend the 12 Meter (24.93 through 24.99 Mhz), 15 Meter (21.3 through 21.45 Mhz) and 17 Meters (18.11 through 18.168 Mhz. to get started then move down to 20, 40 and 80 meters after you get some experience.

Good luck and 73's

John, kd3wy

Anybody who takes the time to look up the history of your call sign. It's easy with all those back issues of Buckmaster or QRZ cd's most hams have laying around. I suspect there will be quite a bit of checking on the newcomers to the bands...

Hammer007

Is there something queer going on in NYC? I can't wait til the new info on "Gunzunta" (big) Nose AF2Y gets out. He has called people names, grave danced on their loved ones graves, ask K9RY, he had the mean spirited fool to grave dance for him. He has acted a general horses ass. Meanwhile, he is in a glass house with a lot of stones laying around up there in the "Big Apple" to crack the glass into a pile of shards and let all the corruption fall out for the amateur world to know.. Give us the details because there are a lot of people out here who love to hear the dirt on The Crazy fool AF2Y.

6611. WONDER WHAT THIS MEANS?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: zz4@webtv.net
Message-ID: <2527-386C8FF4-144@storefull-133.iap.bryant.webtv.net>
Source record: 123972

I must say the new amateur radio is interesting. I wonder what it means? I'm a general that got demoted back in incentive licensing.(that was arrl sponsored) This new thing arrl sponsored?

On the plus side I guess I now only have to take one test to get to extra.(after 30 years I got disgusted and went to extra test and I could not take it because I never had advanced---hey my father still has advanced from 1932 and has not taken a test since).

Wonder how big the q&a memory pools will be?

On the minus I COULD NEVER BELIEVE THAT A FEW DOTS AND DASH'S WERE SO DIFFICULT THAT IT KEPT SOMEBODY OUT OF AMATEUR RADIO IF THEY MADE ANY EFFORT.-------furthermore people think cw'ers still can operate forever as desired.Where when the cw sub-bands gone?

Ah..I'd like to see a growing and happy amateur radio service but I'm not too sure this 5wpm and a 35 question something really equals a collection of intelligent people.

I can see 'extra's' getting a little irked. They worked for the cw test and maybe the theory test.

My grumbles with the no-cw crowd is WHAT DO YOU WANT? YOU CAN'T LEARN CW AT 5 WPM? THEY DON'T WANT TO OPERATE AMATEUR RADIO TO USE 'ADVANCED MODES' BUT JUST TO YAP IN SSB OR FM. If cw were inferior I'd support the ssb crowd. Why grumbling for 50 years about a mode thats superior to their ssb? Nobody says you have to manually punch out cw. hey..cw gone...what mode can I use thats popular without yapping my mouth?

That is total nonsense, Bill. Even a child can pass an Extra exam, including the morse code test. Many do. What does that prove? If we apply the standard you use above, it proves that no knowledge is necessary to pass the Extra exam, or that no knowledge is required to learn morse code?

most are NOT interested in ham radio nor have money to buy HF gears
when they can buy a computer and receive free internet access.

i already sold HF gears. now i am tryiong to get away with my 2m and
scanner but i have troubles with it because fewer is interested in ham
radio now.

6616. FS or T: Twenty-one Heathkit Lunchboxes

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: gharmon@idworld.net
Message-ID: <386cb44e.161662354@news.idworld.net>
Source record: 123977

Why does one person need 21 extra Lunchboxes, my sweet XYL asks? Spare parts, I sheepishly reply. NOT, says she. Further she says, either the Lunchboxes or the SX-88 go." Easy choice. I have 21 Heathkit Lunchboxes for sale or trade. I have examined each unit to the best of my ability and listed the descriptions below. Obviously I could make more selling the better ones and then selling the rest for parts, but I would prefer to sell as a package mainly because it gets them out of the garage at the same time which improves credibility with She Who Must Be Obeyed.

01. CB-1 (SO-239; xtal socket on rear; hole on front; volume control replaced; 1 small knob missing; no xtal; tubes light)
02. CB-1 (SO-239; xtal socket on front; no handle; extra holes in top; no xtal; audio static)
03. CB-1 (SO-239; no handle; hole on top; different mike connector; 3 holes on front; no emblem; no meter jack; no xtal; needs 6AQ5 for audio static)
04. HW-29/Sixer (SO-239; xtal socket and extra control/knob on front; no xtal; audio static)
05. HW-29/Sixer (SO-239; xtal socket and extra mike socket on front; extra chassis w/tube inside; no xtal; feedback)
06. HW-29/Sixer (SO-239; 2 holes on top; xtal socket holes on front; center of large knob missing; no xtal; audio static)
07. HW-29/Sixer (SO-239; one small knob wrong; emblem missing; mike connector replaced with phone jack; extra mike socket on front; extra holes on back; extra chassis w/tube inside; no xtal; feedback)
08. HW-29A/Sixer (Spotting switch on front; xtal; audio static)
09. HW-29A/Sixer (SO-239; xtal socket on front; no xtal; audio static)
10. HW-29A/Sixer (SO-239; xtal; audio static)
11. HW-30/Twoer (SO-239; xtal; audio static)
12. HW-30/Twoer (Xtal; tubes light)
13. HW-30/Twoer (Two holes in top; xtal; audio static)
14. HW-30/Twoer (Xtal; hum)
15. HW-30/Twoer (Xtal; hum)
16. HW-30/Twoer (SO-239; xtal socket on front; large mike connector; Trans-Rec-Trans switch replaced with toggle; wrong knobs; large relay and rectifier inside, hole in top; xtal; hum)
17. HW-30/Twoer (BNC; S-meter; xtal socket on front; 2 small knobs wrong; wrong handle; xtal; hum)
18. HW-30/Twoer (Xtal socket on front; pin connector on top; no xtal; tubes light)
19. HW-30/Twoer (Xtal; audio static)
20. HW-30/Twoer (Xtal; audio static)

21. Unknown (SO-239; no handle; no xtal; no meter jack; model and name removed; hum)

Note: None of these units have been serviced or cleaned. There may be other internal mods which I did not notice. Most of these came without microphones or power cables but I do have one extra mike and one extra power cable. Manual copies available for each model.

$21.50 each gets you the whole grouping. That's $451.50 plus shipping. For further information or pictures please email me directly.

Thanks and 73,

I passed the 13wpm exam 48 years ago, Dick. Why will Don be a
*REAL HAM* and I'm not?

From an interview with an English street criminal: He said
that any criminal in England can obtain a gun while knowing
that law-abiding citizens are unarmed. Think about it.

Well "Dipcrap" you will not be the one who rules on this. In case you did not know , you have no decision making duties in any court that would try any case I am involved in. You have a "DRUG" problem don't you know and as such, you are unfit for jury duty and you sure as hell not a Judge in any court of law.. My My, talking to birds down there in Alkabama are you. What a crazy. I thought you wanted to stay out of this. Using a "handle" to do your dirty work. Just as I expected from you... Go take a "HIT! get mellow again for Y2K... There a lot of undocumented shit house lawyers like you and Sherrin on this forum giving bad advise, go to law school and pass the bar, set up a practice and then talk to me. Don't do like your buddy NK4D, and announce he is a "LAWYER".
that "HAM RADIO OPERATOR",Bob Youngblood, Kt4TR, put the stop on that scam right quick!!

Gotchagoat 2000 ain't life fun!!!

What will be so significant about Jan.1,2000? NOTHING. It will mean of course that the date of death on your tombstones will begin with a 2 rather than 1. Big flaming deal. So much of a stink has been made about the Y2K stuff, gullible dopes actually think something earth shattering will AUTOMATICALLY happen. Gaaabage...nothing but gaaabage. For you who think it will mark the beginning of the apocalypse, you're nuts. Some think that Jesus will appear. Screwballs. Some swear that when John sat in his cave on the island of Patmos who knows how long ago, his confusing, childish blabber with all those signs and symbols pointed to the destruction of the world right about now. You gotta be a simpleton to believe that stuff. Johnny was as drunk as a skunk and the same things, the same beasts he wrote about, he saw on the walls of the cave. 1/1/00 will be exactly as significant as will be 12/31/99-just one more day-one more yawn and before you know it, it'll be 1/3/00 and everyone will be back in the corset factory earning a buck. And hopefully when the populace realizes that they've been hoodwinked by charlatans playing on fear, they'll take religion more sincerely and privately instead of relegating it to weirdos and kooks who are as dumb as foxes having made a bundle on this Y2K crap? Upon listening to many shortwave survivalist and rightwing religious programs, the nothingness that will surround 1/1/00 will prove how many listeners have been "took." I can't imagine the number of shnooks and shlemiels who purchased nightscopes, canned foodstuff, clothes and whatnot in order to escape from the invasion of U.N. forces having been trained here to take over various states? Incidentally North Jersey has already been taken over by Indians and Latinos and we're all doing fine, thank you. I'm studing Spanish and learning to charm a cobra. But all kidding aside, you who have been planning for major events on 1/1/00 are in for major disappointments. The sun will rise in the east(and if it doesn't, you have quite a scoop) and will set in the west. Some will be born while others will die and earth will stay in orbit and revolve on its own axis for 24 hours and GOLLY, it'll then become 1/2/00 and so on and so forth and guaranteed somewhere in this country a bunch of survivalist and shortwave evangelists will crowd into meeting rooms to plan on how to scare us out of more money while inventing more superstitious absurdities.

LOOK AT THIS!

THIS MAY BE THE MOST SIGNIFICANT LETTER YOU RECEIVE THIS YEAR!!

May I have your permission to send you free information of an exciting
and very profitable home business which exploding in 1999?
it is truly the EASIEST and the HOTTEST home business Today it is NOT chain
letter, not AN ILLEGAL get rich quick scam it is a legitinate business
which has been around for over THREE years..!
this program has always been successfull , bu now it has become even more
attractive because of three facilities about which I shall tell at the end
of the letter.

if you have questions about the program then you are through or if you
need help getting start e-mail me..Iwill be more than happy to help you
...
if you will not be satisfied from this program reply to this
email address with the word " Remove" in the subject line..
sender: (Nabil)elhofi99@hotmail.com.
emailto:elhofi99@hotmail.com?subject=remove

Please follow the instructions of this letter very carefully,

Greetings,

Hopefully, my name is still on the list. When I first read this letter,
I thought it was some off-the-wall idea to make money. A week later I met
again with my client to discuss the issue. I told him that the letter
originally brought to me was not 100% legal.I advised him to make a small
change in the letter and it would be alright.

I was curious about the letter, so he told me how it works.
I thought it was a long shot, so I decided against participating.Before my
client left, I asked him to keep me updated as to his results. About two
months later he called to tell me that he had received over $800,000 in
cash!! I didn't believe him so he asked me to try the plan and see for
myself. I thought about it for a few days and decided that there was not
much to lose. I followed the instructions exactly and mailed out 200
letters. Sure enough the money started coming in!! It
came slowly at first, but after three weeks I was getting more than I could
open in a day. After about three months the money stopped coming. I kept a
precise record of my
earnings and at the end they totaled $868,439.00!

I was earning a good living as a lawyer, but as anyone
in the legal profession will tell you, there is a lot of stress
that comes with the job. I told myself if things worked
out I would retire from practice and play golf. I decided
to try the letter again, but this time I sent out 500 letters.
Well, three months after that I had totaled $2,344,178.00!!
I just couldn't believe it. I met my old client for lunch to find
out exactly how this program works. He told me that there were a few
similar letters going around. What made this one different is the fact that
there are seven names on the
letter, not five like most others. This fact, alone, resulted
in more returns. The other factor was the advice I gave
him in making sure the whole thing was perfectly legal,
since no one wants to risk doing anything illegal.

I bet now you are curious about what changes I told him to
make. Well, if you send a letter like this out, to be legal,
you must sell something if you expect to receive a dollar.
I told him that anyone sending a dollar out must receive
something in return. So when you send a dollar to each
of the seven names on the list you must include a piece
of paper saying "please put me on you mailing list" and
include your name and mailing address.

Follow these simple instructions exactly and in less
that three months you will receive over $800,000.00.
****
Here are THE STEPS:
****
STEP 1:
=======
A) IMMEDIATELY SEND $1 (wrapped in a piece of blank paper) to each of
the seven names below. Include a note (typed or handwritten saying "Please
add me to your mailing list" .
and include: your name and mailing address.
You MUST include this note for this to be legal.
==========
Mailing list NAMES:
==========
1. MB Neely 4867 Ashford Dunwoody Rd. #5302, Dunwoody, GA 30338

2. Anthony Merck, 20202 SW Butler Road, Rose Hill, Kansas 67133

3. J. Newman, PMB449, 31855 Date Palm Drive Suite 3, Cathedral City, CA
92234

4. AHMED NABIL- EL SHAIMAA PHARMA- malak hefni-asafraa-Alex/EGYPT

5. Rudy Smith 102 Valley View Drive Coatesville, PA 19320

6. R.T. Medford PO Box 540747 Green Acres, FL 33454

7. N.Moh.ABDEL KADER,ahmed fouad darwich, bulkly-Alexandria-Egypt
==========

STEP 2:
=======
B) Remove the name next and ADDRESS NEXT to #1 at the top of the list and move the rest of the names up one position.
Then place your name in the #7 spot. This is done by saving this to a file and the entering your information on line #7. Be very careful when you type the addresses and be sure to proof read them.

C) When you have completed the above instructions you have an option of mailing your new letter in two ways.
1) Through US Postal Service or
2) through e-mail.
This letter has been proven perfectly legal for both ways as long as you follow the above instructions, because you're purchasing membership in our exclusive mailing list.
To mail this out over the internet, you could browse through areas and find people to send this to all the time. All you have to do is cut and paste e-mail addresses whenever you are on the internet. Or you can use a Mass E-mail Network to mail your letter in large volumes for you. We highly recommend this method. Contact this Bulk E-mail Company now. They have the lowest rates on the net and they are fast, provide effective results and give
excellent service. They are running a special for $89.00 per 100,000 mailings and if you order now they are giving away an extra 50,000 mailings FREE. The number is 207-896-7915.

Send this letter to thousands, even millions. This will bring you big payoffs.

Keep in mind there is no limit to the amount of names you could send out. The more names you send, the more money you will make. We strongly encourage you to mail this letter to family and friends as well.

THIS IS A SERVICE AND IS 100% LEGAL!!!
(refer to title 18, section 1302 & 1342 of the U.S. Postal and Lottery Laws). This program is also legal in Canada.

Assume for example, that you get 7.5% return rate, which is very conservative. My first attempt was about 9.5% and my second was over 11%.

1) When you mail out 200 letters, 15 people will send
out $1.00
2) Those 15 people mail out 200 letters and 225 people
send you $1.00
3) Those 225 mail out 200 letters and 3,375 people
send you $1.00
4) Those 3,375 people mail out 200 letters and 50,625
send you $1.00
5) Those 50,625 people mail out 200 letters and 759,375 people
send you $1.00
6) Those 759,375 people mail out 200 letters and 11,390,625 people
send you $1.00

At this point, your name drops off the list. Think about it.
With only the first six levels, you have received over
$813,615.00!!
JUST TRY IT AND YOU WILL HAPPILY believe because you will receive proof in
MANY ONE-DOLLAR.!!!
MAKE sure you send a dollar to each and every one of the seven names on the
list..FIRST, (THIS IS VERY IMPORTANT) , WITH A NOTE SAYING:
" PLease put me in your mailing list "
WHAT HAVE YOU GOT TO LOSE.?Even with 1% return you will still
get $100 000..
I invite you to JOIN our Mailing List RIGHT NOW..!!

MAKE YOUR DREAM COME TRUE...

Smile all the way to the bank.AND GET START..

Good luck
if you are not satisfied please reply by remove

the addresses and be sure to proof read them.

C) When you have completed the above instructions you have an option of mai=
ling your new letter in two ways.

1) Through US Postal Service or

2) through e-mail.

This letter has been proven perfectly legal for both ways as long as you fo=
llow the above instructions, because you're purchasing membership in our ex=
clusive mailing list.

To mail this out over the internet, you could browse through areas and f=
ind people to send this to all the time. All you have to do is cut and past=
e e-mail addresses whenever you are on the internet. Or you can use a Mass =
E-mail Network to mail your letter in large volumes for you. We highly

recommend this method. Contact this Bulk E-mail Company now. They have the =
lowest rates on the net and they are fast, provide effective results and gi=
ve

excellent service. They are running a special for $89.00 per 100,000 mailin=
gs and if you order now they are giving away an extra 50,000 mailings FREE.=
The number is 207-896-7915.

Send this letter to thousands, even millions. This will bring you big payof=
fs.

Keep in mind there is no limit to the amount of names you could send out. T=
he more names you send, the more money you will make. We strongly encourage=
you to mail this letter to family and friends as well.

THIS IS A SERVICE AND IS 100% LEGAL!!!

(refer to title 18, section 1302 & 1342 of the U.S. Postal and Lottery Laws=
). This program is also legal in Canada.

Assume for example, that you get 7.5% return rate, which is very con=
servative. My first attempt was about 9.5% and my second was over 11%.

1) When you mail out 200 letters, 15 people will send

out $1.00

2) Those 15 people mail out 200 letters and 225 people

send you $1.00

3) Those 225 mail out 200 letters and 3,375 people

send you $1.00

4) Those 3,375 people mail out 200 letters and 50,625

send you $1.00

5) Those 50,625 people mail out 200 letters and 759,375 people

send you $1.00

6) Those 759,375 people mail out 200 letters and 11,390,625 people

send you $1.00

At this point, your name drops off the list. Think about it.

With only the first six levels, you have received over

$813,615.00!!

JUST TRY IT AND YOU WILL HAPPILY believe because you will receive proof in=
MANY ONE-DOLLAR.!!!

MAKE sure you send a dollar to each and every one of the seven names on the=
list..FIRST, (THIS IS VERY IMPORTANT) , WITH A NOTE SAYING:

" PLease put me in your mailing list "

WHAT HAVE YOU GOT TO LOSE.?Even with 1% return you will still

get $100 000..

I invite you to JOIN our Mailing List RIGHT NOW..!!

MAKE YOUR DREAM COME TRUE...

Smile all the way to the bank.AND GET START..

Good luck

if you are not satisfied please reply by remove

mailto:elhofi@intouc=
h.com?subject=3Dremove

I thoink its great! Code is almost history as it should be. It is a very out
moded non-21st century means of communication.

6629. Heard two of the best things in ham radio.

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: ab4d@aol.com
Message-ID: <19991230201926.22047.00000170@ng-fz1.aol.com>
Source record: 124005

I was monitoring 14.313 today and I heard a 4 land station about 12 noon discussing how you need to use a Hi-Q coil for HF mobiling on 160 meters. After a barage of comments from unidentfied stations, this station commented "Look what we are coming to, insults from anonymous stations without any intelligence"
I couldn't help but laugh out load because a few of the anonymous individuals on this NG came to mind.

Then I heard the big announcement on the FCC restructuring of the ARS, Great! Hopefully we will see a jump start of continued growth in this hobby, as the way it's been going around here, local activity on the ham bands has been slowly evaporating down to nothing. Unfortunantly it seems like the only part of ham radio that has seen any growth recently is the silent key list in QST, 73 de AB4D.

Carl R. Stevenson <wa6vse@fast.net> wrote:

>Full HF access for 5 wpm is a MAJOR change and will provide incentive
>for the technically inclined to get involved, participate, and contribute.

Those folks could have gotten involved, participated, and contributed
up on V/UHF all this time, code-free.

>As I've stated on several occasions, I know of about a dozen folks that
>I work with who would not become hams because of a ridiculous system
>which relegated them to 2nd class citizen status unless they were willing
>to submit to "hazing by Morse." I'm betting that I can convince at least
>1/2 of them to jump through the hoop now that it's only 5 wpm high.

They could have been contributing to the art up on V/UHF.

>That will result in progress and modernization as more and more of the
>technical experts who have shyed away from ham radio purely because
>of high speed Morse requirements join our ranks.

They could have been conducting progress and modernization on V/UHF,
code-free.

If you're wrong, do you agree to raise the code speeds?

>The people I'm talking about could pass the Extra theory on a bad morning
>with a severe hangover and a bad case of the flu

Just think of all that research they could have already conducted up
on V/UHF all this time. I imagine we'll hear them working DX, ragchewing,
and contesting.

>that many NCTs will upgrade to General, become more involved,

Involved in What? DX, ragchewing, contesting?

>Carl R. Stevenson - wa6vse

Well, you got what you've wanted for the last 25 years: A free upgrade
to General without working for it.

-73 (that's negative, Carl),
Jeff KH6O/6

NEWINGTON, CT, Dec 30, 2029

"We believe that an individual's ability to tune a radio, display any
knowledge of antenna theory, radio theory or general electronics theory,
is not necessarily indicative of that individual's ability to contribute
to the advancement of the radio art. Therefore, all future tests shall be
based solely on payment of the appropriate licensing fee, whose amount the
individual will need to memorize from the sheet provided to the individual
during the testing session, and to then write a check in such amount
payable to the FCC. Those who successfully write a check in the
appropriate amount shall be licensed, and shall join the long and proud
community and heritage of the Amateur Radio Operating Community."

I think that a successful examinee would really deserve the license
if one of the questions was to derive Maxwell's equations and a second
was to use the equations to derive the properties of waveguides. What
I'm saying is that it's not the number of questions it's the quality
that counts.

John KB9MIE.

6638. Who cares ? ("restructuring")

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <84h6dg$k2q$1@nnrp1.deja.com>
Source record: 124014
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

A brief sample of cluster comments:

KE4SCY 14000.0 N0JOKE the new cb radio 0215 31 Dec
AA9VV 14009.0 DS5USH CW, the poor man's Kilowatt! 0205 31 Dec
31 Dec N8MOJ-@ (0204Z) : Say goodbye to dxpeditions on CW freqs from now

By and large the world now couldn't care less about ham radio and it's fake role as a "pool of trained radio" operators, if it ever did. I have degrees on the wall the ARRL staff could never afford matriculation for, let alone have the brains to graduate from.

I don't like having wasted my time on a 20 wpm code test that the old fart Navy vet VE made me copy one minute straight for, but who cares ?

The point ?

I'll actually defer to my good buddy (get it ?) Jeff on this one, but I believe the orginal 1917 CW test was 5 wpm.

To those who are crying that 5 wpm will let the idiots in, get real. We've been here before. The internet is no new device either. A new generation just rediscovered the printed word and non-wireless communications. Progress ?

The only people who are going to get the "new" licenses are those people who are already hams- the people you FCC- tested old contester farts ignore when they call CQ nowadays.

But that's OK. I haven't worked a US ham in 6 years either. Know why ? Because most of the US hams working other US hams on phone ALREADY belong on 2 meter FM, or the FRS, or even on CB. And that includes the "A-1" and "FOC" lids.

The code test isn't the problem in ham radio. The driving test isn't the problem on the road.

It's a problem that entails the fact that most Americans are just idiots. Period.

The real death of ham radio will come not at the hands of a code test, but will come at the hands of the ARRL.

As long as they don't get the word out beyond QST, ham radio will shrink over time. As long as every day goes by that I don't see an ad in computer magazines or in the WSJ or the Financial Times, ham radio will shrink.

As long as ARRL staff promote good operating through mega watt ERP contest stations that ruin the bands nearly every weekend of the year, (when most hams are home from work) and foreign societies follow suit, the population will shrink.

As long as ARRL staff create 3 or 4 unpopulated, dangerous, uninhabited "countries" a year, the bands will shrink as the casual operator loses interest at the prospects of a 10,000 dollar antenna investment and hundreds for QSL postage.

It'll die someday, but not because of the delusions that ARRL staff have fed you people, with their night school MBAs and associates degrees.

I'll just keep my hip waders on for now when I go near them. So should you.

Bravo, Joe. Going after John Ramsey was no more than an
act of sheer uncontrolled lunacy, tinged sith ignorance,
stupidity and egomaniacism. Like some other Federal

initiatives we've seen in the past few years. I'll use your letter to help form mine.

Meanwhile, next time you see a freight train loaded with shipping containers go by, understand that only one in every 10,000 gets opened and checked *AT ALL* by US Customs (Source: A U S Customs inspector) and almost all originate in some other land, many where the inhabitants do not wish us well....

There will always be 'cheaters' no matter how easy or hard the
rules for a given subject may be! Just like the 'get rich quick'
schemes, people would rather try the easy way instead of
working for it! THAT'S JUST HUMAN NATURE!!!

>

Above 27 MHz maybe, above 30 MHz definitely!

That don't make any sense! Clearly you are on the side of
those who think you have "LOST" some of the value of
your amateur ticket from this ruling.

>
> Amateur Radio, RIP. Alas, we hardly knew ye. And the
> no-coders barely did at all.....

I think Rest In Peace is a bit premature for the ARS.
But now maybe the no-coders will want to KNOW ye old
Amateur Radio, code test and all now that we won't be
beat to death with a high speed code test.

To be or not to be a coded ham, THAT is the question.

Prediction.... Within five to ten years you will be five
to ten years older and still whining about how the
FCC has ruined the Amateur Radio Service for all of you.

>AT&T/Lucent. Hmmmm, wonder who works for them?

Darn sure ain't me! And I've got the holes in my moth eaten
pockets to prove it! :^)

>
> Bonus time, Carl???
>

The only bonus for me is now I'm 3 tests away from the highest
class ticket instead of 6. :^0

Indeed. And how *ANYONE* can consider a test that uses only
prepublished questions with their exact answers,studied at
will and completely possible to memorize unrelated word
associations to accomplish a passing score, as "of quality"
is beyond reason. It's just another Federal copout. Looks
good on paper if that's all you see.

And that, Gentlemen, *says it all* WRT the current amateur
radio restructuring.

ATTENTION: ALL HAMS:
Get your upgrades completed NOW, within the next two and a
half months, if you want to be considered a **REAL HAM.**

Otherwise, as Brian has so clearly stated, you will be only
a Novice with Extra class spectrum at your disposal.

And that, gentle readers is exactly where we are.

The key was that you said it was off the wall on the bands. Sounds like
the problem is in the feed line going to the antenna. Check for a short.
For what it's worth, I have a vertical next to the house for space
reasons and have worked 306 countries on it with good swr.

6651. The New License Structure - My Opinion

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-31 00:00:00 UTC
From: tlbryant@my-deja.com
Message-ID: <84h65v01pof@enews2.newsguy.com>

Let me tell you a little story...

I work in maintenance at a very large company. My co-workers and I have always been considered to be nothing more than a pimple on the company's ass. Recently, after many years of fighting for it, we were included on the company incentive plan. Now, although maintenance workers are paid a higher hourly wage than production, production workers often outdraw us lowly maintenance people by several thousand dollars each year because of the incentive payment plan. Some production assholes can't stand this. They're saying that maintenance doesn nothing but sit on their asses all day and collect a paycheck. This is coming from someone who does nothing but push a few buttons all day long, and manages to get a few paperbacks read on afternoon and midnight shifts. However, it's funny that I'm usually so busy that I haven't time to sit and read anything. But now that I'm making incentive, I'm going to rub it in every chance I get. The more he bitches, the more overtime I request to work (and there's plenty of overtime to work)

What's this story have to do with the license re-structure?

It's quite simple if you haven't figured it out already. A few olde farhtz have a pre-conceived notions that the ham operator of the future is lazy, un-motivated, looking for a handout, etc.. I'm hoping that they all take the same attitude towards you that I have taken towards the people I work with. You know nothing about their backgrounds, skills, ambitions, or desires. You are in no place to judge them. I hope that the HF bands become flooded with the new Generals and Extras. In fact, as soon as the question pools are available, I'm probably going to write a memory-association guide for each question, so that many more will pass (even ace) the tests. The more you bitch, the more I'll encourage newcomers to upgrade.

The new license classes will soon be reality. Deal with it.

Ramsey electronics was raided. They sell a bunch of little electronic kits.
Even Radio Shack sells little FM transmitter kits.

A nice example of our tax dollars going to waste. These kits are NOT illegal
to buy or own, It's only illegal if used in the wrong way.
As a matter of fact it was little kits like these that got me and probably
many others involved
with radio.

You should have told Richard that he should have taken a babe to europe instead of that boyfriend How does it feel to have that problem in the family ????

I just got back from N.Y. and I have lots of new information. Happy new year Chuckie.

There seems to be a little problerm in N.Y. cty a few years back, do you care to explain ??????
